## EDITORIAL

With the 2018 edition of our catalogue, we are proud to present the new products that we have developed with the utmost care and in tight collaboration with our R&D specialists and the technical expertise of our GUNKI team.

You will instantly notice that the GUNKI family has grown and that a "WATER CRAFT" range with belly-boats and accessories have been added. We have designed a totally modular and upgradable concept that you can customise to suit comfort and mobility.

True to our skilled workmanship in the production of high class technical rods, the IRON-T series is enhanced with the addition of the CHOOTEN generation. The specifications and top range quality of our flagship rods will undoubtedly catch the eye.

Our lure range has grown, thanks to new models and colours, and has been specifically developed for European venues and species. The « DARK WATER & CLEAR WATER », « IN THE BOX » assortments will enable you to choose from a wide variety of colours and perfectly match any conditions.

2018 will also be marked by the arrival of Gaël Even on our team. The talented angler and renowned fishing guide is now a consultant for our brands.

His vast knowledge of different ecosystems, species and impressive technical skills are just a few of the assets he will use to present our products and to give advice and detailed explanations on how to fish with them throughout the year. Be sure to follow him through his articles on our website, his blog, <http://www.gaelevenpeche.fr>, and make the most of his advice at trade shows and fishing conventions.

Working with our specialists and our R&D department, he will actively take part in the every step of the product development process: range orientation, product conception and extreme field testing in order to validate them.

We sincerely thank you for the trust you have honoured us with over the years and wish you a great season for 2018.

The GUNKI team & J.Riffaud.

## SPINNING

### GUNKI SLV FV 1000 REEL 9643 / V308

This is a specialist reel developed for situations where a small reel is vital to balance with light, short rods. A real plus for technical styles like ultra-light lure fishing or vertical fishing. If you are looking for a compact, light yet powerful reel this is the perfect choice!

The ratio reel size- length of the reel leg has been thoroughly analysed to guarantee maximum comfort and great handling without the bail arm clipping your fingers. Slightly displacing the reel leg is a bonus when vertical fishing as it can be adapted to any reel seat (classic or featherweight) in total comfort. The spool has been designed for use with low diameter mono or braid. Drag power: 4kg recuperation: 64cm/ handle turn.

Plus Points:

- Carbon composite body – ultra-light and strong
- Ultra compact design with long stem for perfect balance
- Infinite anti-reverse
- Aluminium shallow spool
- S curve cross spiral oscillation system
- Long-life pickup spring
- Consolidated bail arm
- Line guide with anti-spin technology
- Progressive micrometric drag system
- «Easygrip» handle.

		Line cap.	Weight (g)	Ratio	Line cm/Handle Turn	Needle Bearing	Ball Bearings
GUNKI SLV FV 1000 REEL 61149		0.16mm/ 110m	195	5.1/1	64	1	6

### GUNKI THG FV REEL 9645 / V308

These reels are a distillation of the very latest technologies to produce two top quality models with very precise gearing for ultra-smooth winding that you will appreciate particularly when playing hard fighting fish. Very light and compact. We have selected a carbon composite material for the body and rotor as it offers the best balance between weight and strength. The reel handle is screwed directly into the command gear and eliminates any risk of play when winding and adds extra cranking power when playing large fish. Multi disk micrometric drag system is protected by a waterproof seal so it stays running smoothly no matter what the weather. Drag power: 4kg THG FV 1500/ 7kg THG FV 2500

Plus Points:

- Compact design
- Exceptionally smooth
- Carbon composite body – ultra-light and strong
- Precision turned stainless ball bearings
- All key areas treated against corrosion – (main shaft, handle shaft and rollers)
- Integrated infinite anti-reverse
- Aluminium spools “shallow lip” and LC (long cast) lip\*
- \*designed for a more fluid line transit over the spool lip for better casting performance.
- Ultra-S curve cross spiral oscillation system
- Long-life pickup spring
- Oversized titanium line guide with anti-spin technology

		Line cap.	Weight (g)	Ratio	Line cm/Handle Turn	Needle Bearing	Ball Bearings
GUNKI THG FV REEL 1000 61249		0.16mm/ 100m	155	5.2/1	60	1	10
GUNKI THG FV REEL 1500 61096		0.16mm/ 140m	175	5.2/1	65	1	10
GUNKI THG FV REEL 2500 61094		0.205mm/ 150m	215	5.2/1	73	1	10

GUNKI SWM FV REEL 9644 / V308

To coincide with the launch of our GUNKI UMI rod range we are bringing out a new GUNKI SWM reel range as their perfect partners. Whatever style of sea lure fishing you are into, we have the ideal reel in this range! Particular attention has been paid to the drag system both in terms of power (6kg FV 250 and 7kg FV 300 & 400) and the longevity of the components (waterproof seals have been incorporated around the drag tension button). The spool size has been carefully selected for braid fishing.

- Plus Points:
- Carbon composite body – ultra-light and strong
  - Compact design
  - Stainless ball bearings
  - Integrated infinite anti-reverse
  - Aluminium spool “shallow lip” with anti-slide band
  - S curve cross spiral oscillation system
  - Long-life pickup spring
  - Consolidated bail arm
  - Titanium line guide with anti-spin technology
  - Progressive micrometric drag system
  - “Easygrip” handle.

			Line cap.	Weight (g)	Ratio	Line cm/Handle Turn	Needle Bearing	Ball Bearings
GUNKI SWM FV REEL 250 61184			0.17mm/ 130m	269	5.0/1	69	1	5
GUNKI SWM FV REEL 300 61185			0.17mm/ 150m	286	5.0/1	70	1	5
GUNKI SWM FV REEL 400 61186			0.17mm/ 230m	379	4.6/1	75	1	5

**N** GUNKI XGF FV REEL 9766 / V308

To succeed using modern lure tactics you need the right reel for the job! Our GUNKI XFG reel range has been developed specifically for modern lure tactics and are built to give you reliable smooth performance so you can concentrate on enjoying your fishing. The rotor is extremely fluid and the gearing ultra-smooth which combined make these reels very comfortable to fish with. The two sizes cover most open water situations from distance to precision casting. The drag system is progressive and precise allowing for fine tuning to suit different hooklengths. The line lay is smooth every time again essential for consistent casting. These reels are light, smooth, silent and technologically perfect for the modern lure angler!

- Plus points:
- Body and rotor in light and strong composite material
  - Compact design
  - Infinite anti-reverse
  - Aluminium spool with LC (long cast) lip\*
  - \*designed for a more fluid line transit over the spool lip for better casting performance.
  - Metal line clip
  - Spare aluminium spool
  - S-curve spiral oscillation system
  - Long life pick-up spring
  - Consolidated bail arm
  - Anti-spin line guide
  - Progressive micrometric drag system
  - «Easygrip» handle

			Line cap.	Weight (g)	Ratio	Line cm/Handle Turn	Needle Bearing	Ball Bearings
GUNKI XGF FV REEL 250 61408			0.26mm/ 160m	245	5.2/1	73	1	6
GUNKI XGF FV REEL 350 61409			0.26mm/ 200m	255	5.2/1	79	1	6

**N GUNKI WRC FV 25 REEL**

**9761 / V308**

Compact and classy spinning reel with incredible technical performance for the money! This reel has all the key features required of a reliable product designed for modern lure fishing. The gearing is smooth and fluid the drag extremely accurate and there is plenty of cranking power. All these qualities come together in this well designed reel that is a pleasure to fish with. The perfect partner for your GUNKI WARM-UP rod!

- Plus points:
- Body and rotor in light and strong composite material
  - Aluminium spools “shallow lip” and LC (long cast) lip\*
  - \*designed for a more fluid line transit over the spool lip for better casting performance.
  - Infinite anti-reverse
  - S-curve spiral oscillation system
  - Long life pick-up spring
  - Consolidated bail arm
  - Anti-spin line guide
  - Progressive micrometric drag system
  - «Easygrip» handle

		Line cap.	Weight (g)	Ratio	Line cm/Handle Turn	Needle Bearing	Ball Bearings
GUNKI WRC FV 25 REEL 61229		0.18mm/ 210m	248	5.2/1	73	1	5

BAITCASTING

GUNKI BC 4000 XHD REEL

9649 / V308

Low profile reel designed for more extreme power fishing situations. Capable of long distance casting and cranking with big lures. This is the reel you need for prospecting big lakes and reservoirs looking for fish patrolling suspended in the water column. Pulls back an impressive 77cm of line/handle turn which helps when working lures back hard and fast. The powerful gearing comes into its own when playing large fish. The perfect complement for our IRON-T Pike Addict rods. A great product designed for the discerning specimen hunter!

Plus points:

- Single piece aluminium body
- Compact low profile body design
- Large capacity (0.33mm/240m)
- Powerful
- Top quality stainless bearings
- Perforated aluminium spool
- Powerful (14kg) multidisc drag system with carbon washers
- Accurate casting drag with centrifugal control
- EVA «suregrip» handle

		Line cap.	Weight (g)	Ratio	Needle Bearing	Ball Bearings
GUNKI BC 4000 XHD REEL 61139		0.33mm/ 240m	315	7.1/1	1	5

GUNKI BCR 400 HD REEL

9520 / V308

Modern big bait fishing requires baitcasting style reels to partner rods like the SHIGEKI, the IRON-T and our YURAI XXH. This Gunki reel fits the bill perfectly. Firstly it is a solid piece of kit with a relatively slow ratio (4.7/1) to give you more control over the retrieve speed. The reel is powerful and deliberately asymmetric to give you better grip as the body casing on the right hand side is slightly smaller. The oval line guide helps with fluid long distance casting with thick monos. Designed and built for use on specimen sized fish with the crank power to work big lures properly and the strength to bring hard fighting specimen fish under control!

Plus points!

- Ergonomic shape for easy handling
- High quality stainless bearings
- Infinite anti-reverse
- Aluminium spool
- Powerful and progressive fighting drag
- Oval line guide
- «Easygrip» handle

		Line cap.	Weight (g)	Ratio	Needle Bearing	Ball Bearings
GUNKI BCR 400 HD REEL 61109		0.32mm/ 170m	268	4.7/1	1	7

## GUNKI BC 200 XHS REEL 9648 / V308

High speed reel that cranks back an impressive 80cm line /handle turn. Designed for active fishing like quick roving sessions or where fish can be provoked into attacking lures worked back hard. The extra winching power means you can work lures back fast without straining your wrist. A real advantage when covering large areas of water quickly. It also helps with techniques where you want to keep the line tight to the lure as you can quickly wind down any slack.. The BC 200 XHS is particularly suited to fishing with shads on loaded heads, shad on blades, Texan rigs or jigs and any other rig where up and down style animations bring extra bites. If speed and control are important to your fishing then this is the reel for you!

Drag power: 5kg.

Plus points :

- Single piece composite body construction – light and strong
- Maximum retrieve speed
- Top quality stainless bearings
- Infinite anti-reverse
- Perforated Aluminium spool
- Multi-disk combat drag
- Magnetic double control casting drag: magnetic and centrifuge (zero friction)
- «Easygrip» EVA handle

		Line cap.	Weight (g)	Ratio	Needle Bearing	Ball Bearings
GUNKI BC 200 XHS REEL 61331		0.29mm/ 150m	211	8.1/1	1	9

## GUNKI BC 200 ITC REEL 9647 / V308

Great value for money reel that comes with a Dual Brake System spool as standard. This system uses magnetic and centrifugal braking to control casting. This gives very smooth and reliable precise casting performance. Finished in GUNKI colours, this modern low profile reel is the perfect partner or our Yurai, Plugi and iron-T rods. 5kg of drag power. Line retrieve 69cm/handle turn.

Plus points :

- Single piece composite body construction – light and strong
- Top quality stainless bearings
- Infinite anti-reverse
- Perforated Aluminium spool
- Multi-disk combat drag
- Magnetic double control casting drag: magnetic and centrifuge (zero friction)
- Anti-backlash spool
- «Easygrip» EVA handle

		Line cap.	Weight (g)	Ratio	Needle Bearing	Ball Bearings
GUNKI BC 200 ITC REEL 61311		0.28mm/ 140m	220	6.2/1	1	5

## GUNKI BC 200 NG REEL 9646 / V308

Cool looking modern design characterise this low profile casting reel that strikes the perfect balance between performance and price! Tough, reliable gearing with an accurate drag system and smooth action. A great reel for anglers looking to develop their skills in baitcasting. Drag rated to 5kg. Line retrieve: 69cm/turn.

Plus points :

- Single piece composite body construction – light and strong
- Infinite anti-reverse
- Aluminium spool
- Multi-disk progressive combat drag
- Magnetic casting drag with precision settings
- «Easygrip» handle

		Line cap.	Weight (g)	Ratio	Needle Bearing	Ball Bearings
GUNKI BC 200 NG REEL 61291		0.28mm/ 140m	214	6.2/1	1	3

## IRON-T CHOOTEN

Our IRON-T CHOOTEN rod range comprises a series of top end sporting rods built on high performance Japanese Toray blanks (high density IM30 & IM40 carbons with an exceptionally low resin count). The taper of each blank has been designed to maximise precision and sensitivity. The rods are very tactile and their resonance enhanced by our unique Fuji reel seat featuring carbon inserts that amplify vibrations from the blank. You will be able to read every knock or tap on the rod be it from the bottom, from hitting snags or chasing fish. The shape of each handle has been customised to suit different techniques so optimising precision and comfort. Fitted with Fuji K rings or micro guides, depending on the model. The first thing to strike you about the rods is how light and well balanced they are. We have chosen fast or ultra-fast actions on all of the blanks for superior casting performance and superior reactivity. The butt sections have been reinforced with a carbon braid to add a reserve of power to help handle big fish. The rods look great and have a touch of GUNKI class that is the hallmark of our IRON-T series!

### **N** GUNKI IRON-T ROD 9796 / C31205

These POWER FEELING blanks have extra-sensitive tips that pick up the slightest bite or movement on your lure. Fitted with Fuji K rings and micro-guides, the rods are extremely responsive – ideal for all tactile styles of fishing. The fast action lends itself to a wide range of tactics and with rods of different lengths and power in the range you can cover all finesse style situations - drop shot, micro jig, light jig head, weightless... Also great for linear fishing with plugs or soft baits. A lot of thought has gone into the handle design. Made entirely from cork with a uniquely comfortable ergonomic profile, these handles improve casting and lure control with the added bonus that cork is a good insulating material so your hands stay warmer when fishing in cold winter weather!

		Action	Section	Size (cm)	Length (cm)	Guides (Qty)	Weight (g)	Power (gr)
GUNKI IRON-T ROD S 183L CHOOTEN 52444		Fast	1	183	183	8	92	3.5-7/ Max 12

GUNKI IRON-T ROD S 210M CHOOTEN 52446		Extra Fast	2	109	210	8	107	7-21/ Max 28
GUNKI IRON-T ROD S 228 M/ML CHOOTEN 52447		Extra Fast	2	118	228	9	119	5-18/ Max 25

### **N** GUNKI IRON-T ROD 9798 / C31205

Simply incredible purpose made vertical rods! The balance of low weight, responsiveness, and raw power is technically perfect! The slim blanks are well balanced for precise lure control and fitted with our tactile and comfortable Full Grip cork handle. The action of the blanks has some softness in the tip to absorb savage takes and reduce hook pulls yet have enough steel through the rod to detect bites and strike cleanly. Power builds up progressively along the blank and cushions violent headshakes that can snap lighter hooklengths. There is enough power in the butt of each rod to stop even the biggest of fish. The 183MH model is designed for classic river and lake situations whereas the 186H is better suited to deep lakes or heavy fishing on bigger rivers targeting specifically pike.

		Action	Section	Size (cm)	Length (cm)	Guides (Qty)	Weight (g)	Power (gr)
GUNKI IRON-T ROD 183MH CHOOTEN 52804		Extra Fast	1	183	183	7	106	10-28/ Max 35
GUNKI IRON-T ROD 186H CHOOTEN 52805		Extra Fast	1	186	186	7	119	14-35/ Max 45

### **N** GUNKI IRON-T S ROD 9797 / C31205

Our POWER CAST & SWIM rods are fitted with Fuji TVS handles for extra comfort and direct contact with the blank. This is the best way to guarantee clear bite transmission through the rod. Powerful and tactile, they also cast brilliantly! The S-200 XH+ for example is a real workhorse perfect for heavy pike fishing with big jerkbaits and swim baits. The S-240H is the perfect size for distance fishing with big soft baits and swimbaits.

		Action	Section	Size (cm)	Length (cm)	Guides (Qty)	Weight (g)	Power (gr)
GUNKI IRON-T S ROD 200XH+ CHOOTEN 52794		Fast	2	104	200	8	155	21-84/ Max 110
GUNKI IRON-T S ROD 240 H CHOOTEN 52795		Fast	2	124	240	9	169	14-42/ Max 56

## **N GUNKI IRON-T ROD 9799 / C31205**

This range of CHOOTEN rods are amongst the most versatile of our casting models. Fast actioned, responsive and tactile, the blanks lend themselves to a variety of tactics depending on the length and power of each rod. These POWER FEELING rods will handle cast and retrieve fishing with lures and plugs (jerkbaits, top water, crankbaits, spinnerbaits, chatterbaits...etc) and the range of soft bait tactics essential to the modern angler (linear, swimbaits, rubber jigs, texan...etc).

		Action	Section	Size (cm)	Length (cm)	Guides (Qty)	Weight (g)	Power (gr)
GUNKI IRON-T ROD C 190 MH CHOOTEN 52986		Extra Fast	1+1	159	190	9	126	10-28/ Max 35

## **N GUNKI IRON-T ROD 9800 / C31205**

Range of power rods designed for heavier tactics (heavy Texan, heavy cover jig, heavy linear, deep spinbaiting...). The longer rods are particularly suited to swimming styles with big lures on big waters. Tactile, powerful and well balanced. These are rods designed for true specimen hunters!

		Action	Section	Size (cm)	Length (cm)	Guides (Qty)	Weight (g)	Power (gr)
GUNKI IRON-T ROD C 123H CHOOTEN 52823		Fast	1+1	181	213	10	152	14-42/ Max 56

GUNKI IRON-T ROD 190XXH CHOOTEN 52815		Extra Fast	1+1	146	190	9	167	42-120/ Max 140

## IRON-T

### Welcome to the world of IRON-T!

Built with meticulous attention to detail to create a striking and innovative range of rods. The technical properties of each rod have been designed to meet the needs of anglers fishing with the latest techniques. Whether you are fishing ultra-light rigs or a heavier «Pike Addict» approach there will be a rod in the range to cover your requirements. Built using top quality materials, the resins and carbons in each blank have been rigorously selected to maximise resonance and make fishing with them as comfortable and efficient as possible. We have used FUJI K-R Concept rings to get greater distance and accuracy when casting. No matter what technique you are using there will be an IRON-T rod to suit!

### GUNKI IRON-T C 9509 / C31205

The ultimate Finesse rod for fishing small soft or hard baits! The blank is responsive and superbly balanced and will cast light rigs and baits with unerring accuracy. A lot of work has gone into designing the structure of the blank and its "fast regular" action is perfect for playing big fish on light lines and braids. This is a top quality piece of angling engineering for the serious Finesse fisherman.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI IRON-T C 198-ML 57461		2	103	198	121	3.5-15

### GUNKI IRON-T S 9508 / C31205

A series of rods designed for light lure fishing styles – micro jig, drop shot, micro rubberjigs etc. Ideal for using with our GUNKI "Think Finesse Game" lures or small plugs like Gamera 50, Gigan 38 or Kaiju Blade 42 etc. They have a "fast regular" action that works perfectly with light lures and rigs. Light, sensitive, responsive ... These are the words that best describe the qualities of this collection.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI IRON-T S 183-L/ML 57477		2	95	183	106	1.5-10
GUNKI IRON-T S 190-ML 57478		2	99	190	113	3-12
GUNKI IRON-T S 210-ML 57479		2	109	210	125	3.5-15

### GUNKI IRON-T S 9510 / C31205

Classed as genuine SHOOTING series rods these are pure-bred casting machines! The rods have the length, the fast action and the balance needed to dynamise the blank and make accurate distance casting effortless. These are versatile rods that will cover all cast-and-retrieve situations where distance casting will give you an edge. The blanks are responsive and have the backbone for clean, crisp striking.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI IRON-T S 198-M 57311		2	103	198	132	5-21
GUNKI IRON-T S 210-MH 57312		2	110	210	138	7-32
GUNKI IRON-T S 228-M 57313		2	118	228	142	5-18

### GUNKI IRON-T 230-XH++ 9511 / C31205

"Pike Addict" XH++ spinning version designed for extreme fishing with big baits. This rod has the power to cope with the very biggest specimens. The one piece blank has a "fast regular" action that strikes the perfect compromise between brute strength and flex for propulsion. The reel seat and balance point of the rod have been carefully positioned so that you can fish for hours on end without getting too tired. FUJI K twin legged rings.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI IRON-T 230-XH++ 56961		1+1	195	230	197	21-110

## GUNKI IRON-T C 9512 / C31205

"Pike Addict" casting rods designed for fishing with big baits. Like the spinning version, these rods are built on single section blanks with a fast/regular action and can handle specimen sized fish. The long handle ensures that the rod stays comfortable to fish with as it helps makes casting smoother and less strenuous. This is vital when casting big baits all day long! Both rods are perfect for "swimming" big baits. FUJI K twin legged rings.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI IRON-T C 225-XH+ 56962		1+1	190	225	194	30-80
GUNKI IRON-T C 240 -XXH 56963		1+1	196	240	239	40-140

## CONCEPT STREET FISHING

*These new-generation street fishing rods are technologically advanced and brilliantly designed. Each component has been carefully selected to economise weight and maximise sensitivity. Stripped back reel seat offers direct contact with the high modulus slim-line carbon blank. Long leg SIC rings and micro guides. Each rod is a technological masterpiece! Two different options are available. One with a solid carbon tip the other with a hollow carbon tip. We proudly sport the GUNKI logo on the handle as we are major players in the street fishing movement across Europe and are proud to organise and develop major competitions such as the GUNKI IRON TOURNAMENT.*

## GUNKI STREET FISHING 9668 / C31205

A solid carbon tip ensures an ultra-fast action with exceptional sensitivity where the tiniest of plucks and knocks can be registered. The action is fantastic for very accurate casting of light rigs and small lures. The tip cushions the force of striking and helps avoid hook pulls. These incredible rods are finesse fishing tools par excellence and lend themselves particularly to techniques like drop shotting, micro jigs and micro loaded heads.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)

## GUNKI STREET FISHING 9669 / C31205

The hollow carbon tip gives a progressive, softer action that is more versatile and can be used with small plugs, lures and spinners. Great casting rods and ideally suited to very light lures and rigs – perfect for weightless fishing styles, for example. High modulus carbon blank is very responsive and will let you feel the slightest indication from an interested fish.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)

## **GUNKI POCKET NET HANDLE**

9795 / C31205

Practical net handle that packs away to just 31cm! So compact that you can always find a place for it for even the shortest fishing sessions! Comes with an adjustable shoulder strap and integrated screw fitting to take a landing net.

		Section	Size (cm)	Length (cm)	Weight (g)
GUNKI POCKET NET HANDLE 200 51811		10	31	190	302

## **GUNKI STREET FISHING HANDLE**

9670 / C31205

Net handles designed for street fishing which pack away small thanks to the number of telescopic sections. Simply pull on the screw fitting to extend the handle rapidly. The long handle length is ideal for anglers fishing of higher quaysides. Can be slung over your shoulder with an adjustable strap.

## **YURAI**

*These latest YURAI rods are right at the heart of the GUNKI philosophy: ultra-modern technical rods that draw on the latest advances in rod design and materials to create specialist fishing tools that are still exceptional value for money! Built on high modulus carbon blanks fitted with top performance FUJI rings. Designed by our team of specialist European field testers. The range covers all the options and each model is designed to be as versatile as possible. We have rigorously developed each blank to get the perfect balance between power, handling, precision and comfort. The result is a great range of rods that cast well, are crisp on the strike and detect every knock or tap no matter what method you choose to use!*

## **GUNKI YURAI S** 9504 / C31205

This range of spinning rods covers most modern lure fishing situations. From finesse techniques to open water power fishing, from shore, float tube or boats targeting freshwater or sea fish. This range has rods that cover all these options!

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)

## GUNKI YURAI S 9506 / C31205

From the «Pike Addict» stable these rods are designed for handling big baits fished either jerking or swimming styles. Ideally suited to sea bass angling from the shore (S240XH) or boat (S195XH+)

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI YURAI S 195 XH+ 56851		1+1	159	195	155	30-80
GUNKI YURAI S 240-XH 56852		2	125	240	166	20-60

## GUNKI YURAI C 9507 / C31205

Two rods that have the right length and action to handle big jerkbaits. Fitted with a long handle for extra casting power and better handling. The action transmits sharp, aggressive twitching direct to your lure even at long range. This is vital to finding the right fishing rhythm to provoke bites. Powerful, comfortable rods that are enjoyable to fish all day long when targeting specimen fish.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)
GUNKI YURAI C 195-XH+ 56862		1+1	159	195	169	30-80

## GUNKI YURAI C 9505 / C31205

Two rods designed for their versatility. The YURAI C190MH is light and fluid designed for precision cast-and-retrieve lure fishing with softbaits, spinnerbaits and plugs like Gamera, Mothera or Megalon. The YURAI C210H is longer and more powerful -better suited to power fishing with big lures or for cranking and swimming big baits in deep water looking for bigger fish.

## WARM-UP

### **N** GUNKI WARM-UP RODS 9793 / C31205

Our WARM UP rods are right at the cutting edge of technical performance in lure fishing. The action of each blank is ultra-precise helped by the quality of carbons used in their construction. The result is a series of incredibly responsive rods. The fittings enhance their performance from the ergonomic reel seats to the carbon sensitive grip handle which is both incredibly comfortable and tactile. The moment you pick one up you can feel the quality in the blanks and fittings. Available in both casting and spinning versions and fitted with SIC profiled low-friction rings and an elegant discrete finish. The range covers every application from pike to game fishing from boats or the bank

## PLUGIN

*These new PLUGIN rods have been designed to offer you unparalleled technical performance and the best value for money possible. Designed to cover all modern lure fishing styles we have not compromised on the quality and reliability of any element of these rods. There are 6 models available in spinning and casting styles. It has been quite a challenge to produce technical, high performance rods for each specific style of fishing at an attractive price but we feel that our new PLUGIN rods fit the bill rather nicely. Try one yourself to find out more! SIC rings and MI carbon blanks.*

UMI

UMI is a new concept in our GUNKI rod range developed expressly for sea anglers. High tech rods that cover all the current lure fishing techniques used of our different coastlines. We have used top quality materials throughout including high modulus carbon wraps reinforced with braided carbon on the butt sections, FUJI rings and high density EVA handles. The minimalist design is perfectly balanced and very comfortable to fish with. Great rods for the passionate saltwater lure angler!

**SWM** SALT WATER MISSION **GUNKI UMI 9673 / C31205**

Range of rods developed for cast and retrieve lure fishing. Whether fishing with plugs or soft baits from boats or the shore there will be a rod that meets your requirements. Fast action responsive blanks that are well balanced with plenty of power in the butt sections thanks to an additional a wrap of braided carbon. These rods will handle the hardest fighting fish with authority! Fuji rings.

		Section	Size (cm)	Length (cm)	Weight (g)	Power (gr)

**SWM** SALT WATER MISSION **GUNKI-UMI S -190 9672 / C31205**

Our UMI rods are designed for jig fishing. Comes in two different versions with distinct actions and power. The UMI 190 XXH is built on a progressive blank with the right blend of softness and responsiveness to perfectly work jigs. Under pressure the blank progressively powers up giving you plenty of reserve power to control hard fighting fish. The rod is designed to maximise angler comfort which you will appreciate if you are jigging intensively for several hours at a time. The blank is versatile and lends itself to jigs of all sizes. The UMI 190 XH+ has a faster action and is designed specifically for smaller jigs. The tip in particular is very responsive which is vital for working lighter lures. The rod is particularly light and comfortable to hold and fish with. The butt section has an additional wrap of braided carbon which gives plenty of power to handle big fish with ease.

## MINNOW'SERIES

### GAMERA 39 F

0330 / J3810

Don't be deceived by the diminutive size of the GAMERA 39F. This lure makes plenty of impact under water! The chunky body size and large lip generate plenty of wake the moment you start winding back in. Works well just cranked or with the occasional twitch to get the flanks flashing enticingly. A floating lure that can become a "slow sinker" with the addition of a 00 swivel. The GAMERA 39 F is the perfect size for summer perch, trout and chub fishing.

### GAMERA 39 HW

9608 / J3810

Smaller version of the GAMERA HW designed specifically for flowing water. Slim line body profile and low centre of gravity help keep this lure stable in a flow. We have worked on the body density so it is heavy enough to work round likely fish holding holes without compromising its natural movement. The lip has a fairly tight angle on it that again strikes the right balance between stability and energy when twitching. The Gamera 39 HW is a must have lure for fishing downstream in shallow water or simply when downsizing when bites get difficult.

## GAMERA 50 SP

7191 / J3810

Streamlined little minnow perfectly adapted for light roving work on fast rivers and streams. The perfectly stable body is very accurate to cast and can be worked through the fastest riffles and rapids. A versatile all-year-round fish catching machine that will tempt salmonoids, perch, chub and other predators.

## GAMERA 50 HW

9478 / J3810

The GAMMERA 50 HW is perfectly balanced and designed to be worked steadily through strong currents vibrating constantly to stay attractive and provocative. This heavy weight version (HW) has a straighter body profile and a low centre of gravity to maximise its stability in really fast flows. The extra weight will also help you fish deeper river sections when trout are posted deep. The large lip has been carefully angled to get the balance between stability in fast flows and lively darting when twitched just right. If you fish on bigger, faster rivers this is the lure for you!

## GAMERA 63 HW

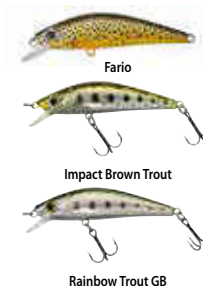

9479 / J3810

The bigger brother of the GAMMERA 50 HW has all the same technical characteristics but is designed to imitate a larger prey. Perfectly balanced and designed to be worked steadily through strong currents vibrating constantly to stay attractive and provocative. This heavy weight version (HW) has a straighter body profile and a low centre of gravity to maximise its stability in really fast flows. The extra weight will also help you fish deeper river sections when trout are posted deep. The large lip has been carefully angled to get the balance right between stability in fast flows and lively darting when twitched. If you fish on bigger, faster rivers this is the lure for you!

## GAMARA 65 SP

7192 / J3810

This little lure can be cast a long way thanks to the weight transfer design. The GAMARA 65 SP is a fantastic jerkbait that can be worked back with short twitches by simply pulling on the rod tip or made to lunge suddenly to imitate the panic of an escaping prey fish. A well balanced and lifelike lure that can also be used to create killer stop and go style retrieves.

## GAMERA 90 F

7193 / J3810

Stable and compact lure that has a wide wobbling action when brought straight back. You can add a more pronounced rolling action to your retrieves by twitching and jerking the lure. Takes are provoked by the water displacement generated by this dense lure which gives off the impression of a sizeable prey fish on the move. A great lure for the roving angler trying to locate fish on new waters.

## GAMERA 128 SP

7194 / J3810

The two key attributes of this lure are an extreme rolling action and a pronounced sinuous swimming action. Put together these characteristics give the GAMARA 128 SP a very natural and fluid action in the water particularly when being cranked straight back. Internal weight transfer makes this lure easy to cast and perfect for prospecting a wide area be it on freshwater lakes or even at sea! Take the time now and then to pause your retrieves and let the lure hang seductively in mid water. It just might give a following fish the chance to seize it!

## GAMERA SLIM 110 SP

9609 / J3810

When cranked the GAMERA SLIM SP has a tight, lively swimming action. It does not create a lot of water turbulence relying on visual attraction with the flanks provocatively flashing on every move. This finesse jerk-bait has one other deadly attraction built in- the "roll twitch". The rear of the head section is angled downwards and this provokes a stationary rolling lung when twitched with a slack line. This ability to roll without moving means you can keep twitching the bait over the tightest of likely fish holding spots – like a hole in a bed of lilies. This will get bites when other lures simply don't work! Try with a GAMERA 128SP for a great complementary lure pairing.

# GAPPA 130 F

8806 / J3810

The Gappa has been specially developed for targeting big catfish. A reinforced floating lure that will dive down to depths of 3 meters ideal for prospecting drop-offs and ledges for big cats and other large fish. This articulated lure will wobble seductively back to the surface when paused. This is often the moment when a following fish decides to snaffle your bait!

# ZIGRA 130 F

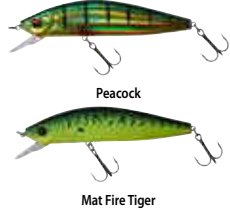

8802 / J3810

The Zigra has a flattened body shape that helps flash the flanks of the lure and displace water. The lure is super-stable and is best worked alternating phases of rapid jerking with long stops. Hold on to your rod, though as big pike or zander will often take during these stop phases! Easy to use lures that can be fished straight from the packet!

## MOTHRA 60 SP

7195 / J3810

This long bill minnow lure is designed to resemble a small prey fish. Can be worked deeper than the GAMERA lures this small lure will get you plenty of takes if you just let it hang for a couple of seconds near to any likely predator posts. If you need to trigger attacks then get the lure flashing by using small titches and jerks on the rod tip. A discrete rolling action coupled with a more pronounced wobble will arouse the curiosity of predators in deeper water who can't help but become curious after repeated retrieves across their hunting zone.

## MOTHRA 75 F

7196 / J3810

Designed to get down quickly to deeper water the MOTHRA 75 F is perfect for working along ledges and drop offs. Designed for trying to catch predators where they are stationed rather than getting them chasing a lure. Very attractive because you can impart a wide range of movement to this lure from minimal twitching to violent pulls and jerks. This long bill minnow will attract perch, bass, pike etc? its density can be coupled with fast retrieves to create a frenetic action that works well in flowing water.

## HEDORA 55 F

8085 / J3815

HEDORA 55 is a little popper that is both compact and stable. Great for gliding and popping! Surprisingly heavy for its size the weight helps both with casting accuracy and creating those all important noisy pops following sharp pulls of the rod. We have worked hard on the shape of the lure so that the first sprays of water as it hits the surface set of a stream of micro bubbles which fox and intrigue more wary older fish

MEGALON 75 S

9613 / J3815

Sometimes fish back off attacking surface stick baits. This is when the MEGALON 75S should come out of the tackle box. Lively looking bait that creates a discrete sub surface wake and has just the right density to be twitched quickly without breaking the surface. When stopped the lure rolls from side to side as it sinks with the flanks flashing enticingly. This small lure casts well and is already gaining a reputation with our European field testers as the no.1 lure for asp!

## MEGALON 105 F

7204 / J3815

The MEGALON is a stickbait built to be cast a long long way ! Clever design enables this lure will sit stable in waves no matter how rough the conditions. Worked back walking the dog style the lure has an erratic swimming action which gives off the same signals as a distressed prey fish. Worked back more slowly with frequent pauses the lure has a distinct right/left sliding action and will hang at a 45° angle during pauses. Gives off low deep vibrations that are particularly attractive to larger predators.

## MEGALON 130 F

9483 / J3815

This XL Megalon is engineered to attract big fish. Deep level noise attraction is generated from the unusually large single bead rattling in a deliberately oversized cavity. The lure sits low in the water so chasing fish still get hooked even when they miss the head of the lure and snatch at its wake. The MEGALON 130F casts easily and is quick to snap into action. The lure is versatile and lends itself to different types of retrieve. Slow and steady for wide sweeping arcs or brought back faster with more jerking for a more erratic, jerky type of action.

CRANKBAIT'SERIES

GIGAN 39 F

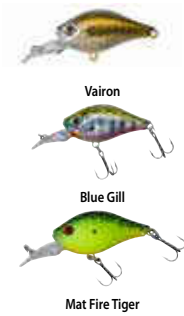

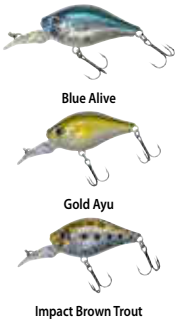

7199 / J3813

Shallow crankbait that can be fished up to 60 cm deep is ideal for covering large amounts of water looking for surface and sub-surface feeding predators. Fitted with a curved lip that will dive immediately the moment you start retrieving. This lure is ideal for «slow fishing» retrieves working the lure back at different speeds and alternating this with frequent pauses. Internal weight transfer guarantees great casting performance.

## GIGAN 50 F

7200 / J3813

Internal weight transfer system helps this lure to cast long distances no matter what the weather. The elegant design of the GIGAN 50 gives a fluid, stable swimming style that can be fished at different speeds with ease. Curved lip that will dive immediately so the bait starts working from the first moment of every retrieve. This lure does not vibrate a lot in the water and is very comfortable to fish with. It also lets you detect the nature of each swim as you can feel if the bait is going through weeds or bouncing over rocks etc. Worked back medium-slow you can let the wobbling and rolling action of this lure do all the work. Predators will not be able to resist it!

## GIGAN 55 F

7201 / J3813

A 55 mm crankbait that is quickly detected by any nearby predators thanks to the large amount of water it displaces. This is an all-round lure that can easily be worked round branches and obstacles. The lip has been made using a polycarbonate plastic which is very solid. Ideal for anglers who like to fish «bottom tapping» style. The Gigan is designed to be fished deep where its pronounced wobbling action coupled with a gentle rolling movement will seduce perch, zander and pike, of course. We have deliberately reduced the vibration attraction on this lure so it can be fished all season long even during periods when the fish are less confident about feeding.

GIGAN 65 F

8080 / J3813

Deep diving crankbait that can get down more than 4 metres. Weight transfer system helps with distance casting. The GIGAN 65 is not too bulky for its length and will get down quickly through the water ideal for bottom tapping over ledges and across bars. Great too for classic open water cranking. The deep resonance of this lure in the water is particularly attractive to larger fish and the unusual vibrations set off by a mix of rolling and wobbling through the water will fool even wary educated fish.

## BIG BAIT' SERIES

**N** OTACHI 125 S

9735 / J3812

A must-have pike lure! The design has been inspired by Scandinavian jerkbaits and is perfectly balanced and easy to work, darting off at the slightest impulsion. Will do anything from minimalist jerking to more aggressive styles. Weighing in at 61.5 g, this slow sinking lure has great casting potential and works best between 0.5M and 1,5M. You can maintain the OTACHI 125 S at a steady depth by changing the angle of your rod as you wind in. The triple hooks are mounted on quality rolling swivels located on the stomach to avoid hook pulls and there is a third swivel for fitting a blade which can often be the trigger when pike are particularly wary.

## ITOKA 155 F

7198 / J3811

This floating swimbait is a real pike magnet! Its characteristic S shaped swimming action displaces a lot of water which never fails to arouse the interest of any neighbouring pike. Its high buoyancy enables you to work the lure very slowly over weedbeds «wake bait» style. With an adjustable lip it is possible to fish the bait up to 70 cm below the surface. When fishing with the lure underwater try twitching and stopping on the retrieve to create the impression of a dying prey fish. A two in one lure ideal for carefully exploring the surface and sub surface options of a swim.

## ITOKA 210 F

8078 / J3811

This is a proper «big bait» - all 21 centimetres of it - that will help target bigger pike. Available in a slow sinking version that can be used when the fish are posted deep or right up in the water in weedbeds and round snags. The ITOKA 210 is a profiled lure which gives fish a large target to go at without being unnecessarily heavy.

KAIJU BLADE 29

8818 / J3814

The two new Kaiju Blade lures- the 29mm and the 43mm - have been developed for street fishing and/or when predators are obsessed with fry. We have not just made the blades smaller, we have redesigned them so the balance is perfect and they stay stable at all speeds. Try the smallest KAIJA blade trout fishing and be ready for a surprise or two ;this lure took some very big fish during field testing!

## KAIJU BLADE 55

8083 / J3814

Perch and zander love spinning baits so we have developed specially for them the KAIJU blade! 55 millimeters of highly versatile metal with 3 different fixing points to vary the speed and depth of retrieve in seconds. The forward fixing point is for ultra fast retrieves. The intermediate point is best for deeper retrieves at variable speed and the furthest back point favours more jerky saw-tooth style retrieves.

## KAIJU 60 S

7202 / J3814

This lipless crankbait is fitted with 3 different fixing positions to vary the way it swims and give you more options when working an area of water. Worked back ultra-fast, more slowly or with a jagged saw blade action the KEIJU works perfectly and you can ring the presentation changes to find out how the fish want the bait on any given day. Unbeatable for «power fishing» styles where you can interest predators posted 20 or 30 metres away. The slender profile of this bait is perfectly balanced and can be guided easily over snags. Particularly efficient when worked through weedbeds. Strong vibration attraction on the 60S model and even stronger for the 70S.

## JIGER 42 S

8820 / J3814

The dense body of the Jiger lets you work different water layers depending on the speed of retrieve and the way you work it. Perfectly balanced for vertical fishing along quaysides or from a boat the Jiger can also be used for power fishing to quickly cover areas of open water. The lead core of the lure has been coated in a special polymer that will stand up to repeated attacks from fish. The blade will keep turning and giving off deep vibrations even at very low speeds. Like the Kaiju lures there are 3 fixing points so you can vary the swimming action on the bankside. This is a versatile lure that catches plenty of big fish!

## KAIJU SPIN 70 S

8817 / J3814

To complement the Kaiju 70 we have removed the tail hook and replace it with a willow blade and added some extra weight to take it to 35g. These modifications have increased the visual and vibratory attractiveness of the lure. Another advantage is that the blade helps slow the bait down during paused retrieves and hold it longer in the strike zone. Great for jig along the side of ledges and drop-offs. The perfect lure for power fishing and trying to provoke reaction takes from fish.

## SPINNERBAITS

### SPINNAKER 1/4

9484 / J3816

Unique head design ensures that the Spinnaker has a low balance point which helps keep the lure stable when retrieved and horizontal as it sinks. Great for slow rolling type retrieves. This spinnerbait has a few other special features. Great balance is also an advantage when power fishing as it stays stable when drawn between obstacles. The silicone skirt, made up of 24 separate silicone strands, makes the bait sway naturally and look like a much bigger prey fish. 0.9mm stainless wire needle has the right balance between strength and flexibility. The oversized Willow blade gives a «parachute» effect as the bait sinks. Fitted with a quality bearing swivel that starts rotating immediately. The skirt is secured by wire thread whipping, the wire needle is soldered to trap the Willow blade, a realistic 3D eye, secure fitting for taking a trailer bait, rubber security ring on the needle. This is a top quality versatile lure that can be adapted on any fishing situation! Willow #3.5 blade and Mustad 2/0 hook.

## LS GUNKI TIPSY-SXL

9767 / J3801

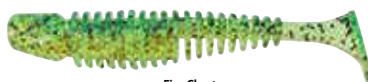

TIPSY SXL has a distinctive dynamic swimming action ideal for linear fishing. The body shape is wider than it is tall which makes the lure stable and helps it glide effortlessly when teamed up with lighter jig heads. When worked faster the tail which is set at 90° starts the whole body vibrating. The body is built like a skeleton so relatively little material has been used for a bait of this volume giving the lure its incredible ability to vibrate. The sides of the bait are ribbed again to make the surface softer making sure that predators hang on to the bait once they've taken it. Aniseed flavour.

## JUNGLE

9620 / J3800

Shad destined to become the perfect prospection lure! Designed for cast and retrieve cranking the streamlined body gives a tight rolling action which is particularly attractive when coupled with the pulses from the large tail. During descents or pauses the tail continues to vibrate and the flanks of the lure flash and sparkle constantly. Try a G'TEX head to get the perfect all-round prospecting lure. This lets you explore new areas without fear of snagging up. The shape is designed for Texan hooks and the small channel under the head keeps the hook located in the middle of the lure thus keeping the rig well balanced. The slits along the stomach and dorsal of the lure liberate the hook under pressure from a fishes jaw. Comes in a selection of 8 colours with our «colour tail» design that offers different horizontal and vertical contrasts. Aniseed flavour.

## PEPS

9621 / J3800

Pumped up soft bait that moves even on its own! The light round tail starts vibrating at the slightest impulse. Great for slow or very slow retrieves (linear or vertical) where the angle of the tail creates an S shaped rolling swimming action that gets more pronounced the faster you retrieve the lure. Try under loading the rig with a micro head, for example, to get even more vibration and flank flashing that many fish find irresistible. Dorsal and stomach slits allow you to rig up a G TEX head to fish the lure right in the heart of snags and obstacles either on the bottom (dead tree roots, for example) or through weedbeds. Aniseed flavour.

## GUNKI GRUBBY SHAD SL

8285 / J3800

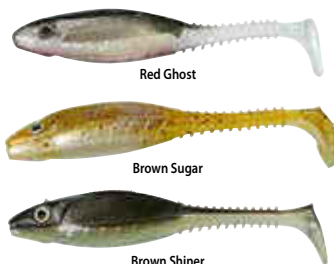

This shad takes on the same large body shape as the GRUBBY GUN with an even larger head to get a better grip on a loaded head. Designed with a large, thick paddle to add extra movement right along the body. The GRUBBY SHAD displaces a lot of water and gives off powerful vibrations. This lure works particularly well when predators will only chase a prey worth catching! Mobile through the water the slightest movement of the rod will set the lure in action. GRUBBY SHAD is now available with new colours that have proved their worth during extensive field testing. Aniseed flavour!

## GUNKI GRUBBY FROG SL

8289 / J3800

The GRUBBY FROG has been reworked to create a larger head for more secure contact with your head. The broad round profile creates a strong gliding effect through the water. Unbeatable for fishing round structures and submerged vegetation. The 12 cm version used Texan style is perfect for getting right into the middle of snags. The smaller size would also make an excellent trailer for your jigs. Thick body and double tail generate strong vibrations that even a well posted predator will find hard to resist. Aniseed flavour.

## GUNKI GRUBBY GUN

6746 / J3800

The large stocky body helps the lure dart off in various directions as it swims through the water whilst the shape of the caudal section pulsates strong vibrations. The nutshell shape of its body is stable and allows a slow fall through the water giving big fish plenty of time to snaffle the lure! Can be fished vertically, horizontally, on a Texan rig or even as a buzzing grub! These are versatile and provocative soft lures. The 13mm. size is particularly interesting for pike hunters. The attractor pocket extends right along the body which helps mask the hook when fishing through weedbeds. Add to this a little rolling action and you have a lure that is sure to provoke take after take!

## GRUBBY FLASH

9756 / J3800

There are certain days when you need plenty of visual attraction and vibrations to provoke bites. So we have created a special lipped shad version of our famous Grubby, taking the bent tail of the classic grubby- well known for giving off strong vibrations- and added a large lip that gives off even more energy. The bib digs into the water and slows the lure down considerably on the drop, giving you more variations in how you fish the lure. The 170 shallow is perfect for fishing over weedbeds or shallow margins. If you are looking for a lure that drops slowly and can be worked back with saw tooth type jerks this is the lure for you!

## «THINK FINESS GAME» RANGE

### LS GUNKI NAIAD

9615 / J3801

This nymph style bait seems in a state of perpetual motion thanks to the numerous tassels and the supple plastics used to mould it. Equally at home in fast water for trout or drop-shotting for perch. This lure is widely used by Czech competition anglers to win numerous lure matches across Europe. Match this with a G'FLIP head to optimise your chances. Flavoured with aniseed.

### GUNKI SCATTER SB

9474 / J3801

Imagine how deadly a vibrating earthworm type softbait would be for perch and trout. Imagine no more. The Scatter W45 has been designed by our team to create the perfect worm bait. The curved tail vibrates with the slightest movement and the bait will sway even when held still - perfect for delicate situations when hardly any movement is required on a bait. No perch or trout can resist this! Shellfish flavour.

## GUNKI TIPSYY-S 9556 / J3801

Our two TIPSYY baits are tiny. Measuring less than 4 centimetres each (38mm to be precise) these baits have a nervous wriggling action that is ideal for ultra-light styles on freshwater and rock fishing. The body shape is wider than it is long which helps give the bait stability particularly when fished drop shotting or on extra light jigheads. The body is not totally solid but built like a skeleton with rings of material round a central spine which give the bait great freedom of movement either on still or straight back style retrieves. Perch and trout will find this lure easy to take. Available with a shad type tail (S38) or a split tail (V38). Shellfish flavour.

## LS GUNKI KIDDY

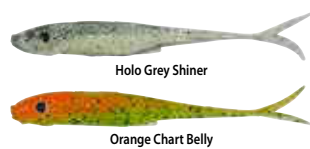

9471 / J3801

The KIDDY is a finesse lure par excellence! We have worked hard to create the perfect imitation of a prey fish. The silhouette is identical to a small fish, the oversized realistic eye, the rounded pectoral fin designed to attract predators preying on fry. The long shad type tail gives off lively but tight vibrations that work particularly well on perch and zander. The split tail vibrates at the slightest movement. The bright flanks are easily spotted and shimmer from top to bottom flashing seductively. The large head makes hooking easy no matter what rig you are using – drop shot, jighead etc. There is a slit along the back for Texan style hooks. Great all-round lure for finesse-style tactics on pressurised venues where bites are delicate and fish are focused on preying on small fry. Flavoured with shellfish attractant

## LS GUNKI WHIZ

9472 / J3801

The body shape of the WHIZ has all the same great qualities found in the KIDDY. We have worked hard on creating the perfect imitation of a prey fish. The silhouette is identical to a small fish, the oversized realistic eye, the rounded pectoral fin are designed to attract predators preying on fry. The long shad type tail gives off lively but tight vibrations that work particularly well on perch and zander. The long tail vibrates at the slightest movement so is also perfect for static approaches such as drop shotting. When twitched the whole body starts moving in a tight rolling action making the flanks flash seductively. There is a slit along the back for Texan style hooks. Great all-round lure for finesse style tactics on pressurised venues where bites are delicate and fish are focused on preying on small fry. Flavoured with shellfish attractant.

## V<sup>2</sup> CONCEPT RANGE

### GUNKI V<sup>2</sup>RIGGLE

8824 / J3802

A V<sup>2</sup> lure that has been designed specifically for vertical fishing. The lure gives off subtle vibrations from its split tail and the pronounced ribbing on the body made from particularly supple plastic. We have managed to add a shimmering micro-movement to the main swinging action of the lure that is amazingly life like. Great lure to try when conditions are tough (cold water, lethargic fish etc.). This lure gives off the right signals to trigger a bite!

## GUNKI V<sup>2</sup>IB SOFTBAIT

**8822 / J3802**

Our V<sup>2</sup> range has as its mission to create softbaits that gave off more complex underwater vibrations. The V<sup>2</sup>ib is our first lure of this type. We have taken the high frequency attractions of a blade and added the beating of a sail which recreates the life like movements of a fin beating. No matter which way you fish this lure it will give off some vibration. A simple flutter in the sail is enough to trigger an attack when conditions are hard. Faster retrieves will create stronger vibrations but these are different to those of classic shad lures which wary fish shy away from on many hard fished waters. By varying your retrieve speeds and animations you can create a host of different vibrations that our tests have shown time and time again to get positive results.

## GUNKI BOX G'BUMP

**8825 / J3804**

This new shad bait will not go unnoticed! The tail is large and imparts a distinct rolling action which runs right through the body sure to tempt any opportunistic predators. The triangular shape of the body is very stable and holds the bait well in the water. Ideal for cast and retrieve prospecting be it for perch, zander or pike. For specimen pike try the big 20 cm lure with a 10g jig head. The lure is amazingly stable and gives off surprisingly strong deep vibrations sure to attract any passing essox!

## GUNKI BOX CLIPPER

9475 / J3804

After the success of our G'BUMP softbait we decided to add the CLIPPER to add to our range of triangular bodied baits. The same body shape as used on the G'BUMP means the bait is stable and easy to rig. The CLIPPER has an added tail which vibrates freely, the body is slightly wider and a little longer to give off more powerful vibrations. A truly universal bait that will take fish of all species at any time of year!

## GUNKI BOX GRUB FREE

9476 / J3804

The famous GRUBBY now available ready mounted! Easy to use in any situation you will notice that this GRUBBY is a little leaner to help keep the lure stable on straight retrieves. Rest assured that the body is still big enough to attract the attention of marauding predators. Designed to vibrate at any speed, the Grubby Free works particularly well when worked very slowly as the vibration attraction works on even the slowest retrieves, a tactic that often gets a take from educated and wary pike. Available in 3 sizes you can cover all the depths. Try winding in a bit faster with the rod held high when fish are active and feeding at midwater. This lure is really easy to use – cast, retrieve and strike! The GRUBBY does the rest of the work! The 130 and 170 sizes have a stomach ring for fitting an extra treble or a blade if wanted.

## GUNKI «BASS ADDICT»

### HOURRA CRAW 100

9617 / J3805

Crayfish will open their claws when threatened. The HOURRA CRAW imitates this natural behaviour perfectly. The claws are full of air bubbles and open whenever the lure is stopped. The HOURRA CRAW uses its large body to maintain as natural a position as possible and the hook is kept central in a line along the thorax to keep the bait well balanced. The long antennas and claws vibrate strongly and can often provoke instinct attacks after long pauses. Combine this with a G'FLIP head for a mesmerising, natural moving bait that predators simply cannot resist! Impregnated to the core with salt. Shellfish flavour.

### MEDUSA 100

9616 / J3805

The MEDUSA is a dedicated compact skipping lure loaded with salt. The articulation at the base of the neck is unusually mobile so even when stopped and allowed to drop around structures, for example, the lure animates itself. The asymmetrical form means you can dictate how much darting movement you get by changing the hook position – similar to the VISTA WORM. When twitched the lure rises in the water and give off an enticing dog walking movement every time. There is a central line running along the stomach section to keep the hook perfectly balanced. Shellfish flavour.

## BOOGIE CRAW

8826 / J3805

Crayfish are on the menu of every predator black bass included! The GUNK! boogie craw imitates the freshwater crayfish perfectly. A two part body is extremely supple and the claws flap at the slightest movement which often triggers a reaction bite from bass. Additional bristles and claws add to the realism of this lure. Can be fished on a loaded head, behind a jig or a chatterbait. Best worked by twitching back along the bottom. Great for deep swims or near cover. Shellfish flavour and salt are impregnated in the body. Quick tip if you are short of insect baits when chub fishing try cutting a Boogie Craw in two and use the abdomen section as an insect imitation!

## FIX MINNOW 8829 / J3805

There are certain days when black bass are obsessed with prey fish and give themselves away through violent surface attacks. On days like these then you should try the Fix Minnow either on the surface, midwater or on the bottom (depending on what rig you use). The lure is very stable thanks partly to their shape but also the salt that is impregnated in the body. The slender split tail moves at the slightest twitch. Easy to cast around snags skipping style and the body shape will easily hide a Texan hook. Try a non-loaded Texan rig to perfectly imitate a fleeing prey fish this can be deadly for black bass! There is no doubt that the Fix Minnow has been designed with black bass in mind but it will catch plenty of other predators too! Flavoured with shellfish.

## VISTA WORM 8827 / J3805

Choose your rig wacky, drop shot, Texan with or without weight. Whatever you prefer the Vista Worm is a classic for black bass fishing! The body is segmented with a flat back and round belly. This asymmetry lets you get the bait to dart in different ways depending on where you hook it. The tail is more ribbed than the rest of the body so it moves more. In the water each ribbed section gives off slight vibrations that are very life like. The Vista Worm will wriggle of its own accord just like a real worm! The body is dense and impregnated with salt so it can be cast a long way and worked back even by skipping over weeds or branches. A must have lure for all black bass fans! Impregnated with worm flavour.

C'EEL WORM 8828 / J3805

The C'eel worm has all the same features of the Vista worm but with a thinner tail that moves at the slightest knock. This lure resembles a worm or a small eel natural foods loved by all predators. Can be used on many different set ups Texan, drop shot, wacky, loaded head. The best way to fish it is to bounce it along the bottom but you can also try up in the water on a Texas rig through weedbeds. This is also a great bait to try as a trailer on jigs, spinnerbiats and chatterbaits. A versatile lure that black bass in particular love but is just as effective for zander and perch!

## BRAID

**N SLIDE BRAID 125 FLUO GREEN 9751 / D340**

Japanese braid made using the latest braiding technology to obtain a perfectly round 8 strand polyethylene line. Very soft to the touch, the braid casts fantastically well. Available in low diameters, this braid cuts through water and is perfect for precision techniques like vertical fishing and all finesse styles. The braid is exceptionally strong and extremely resistant to abrasion! Sold in 125M spools.

		Diam. (/100)	Length (m)	b.s.(Kg)
SLIDE BRAID 125 FLUO GREEN 0,08 37937		08	125	6.60

SLIDE BRAID 125 FLUO GREEN 0,13 37939		13	125	8.80

**N SLIDE BRAID IRON-T 120 FLUO GREEN 9752 / D340**

Made from top quality PE fibres, we have worked on the density of this braid to get a perfectly round profile. This rigid line is great for intensive cast and retrieve lure fishing. A Teflon surface coating improves casting performance gaining valuable extra meters every cast. The absence of stretch gives the line excellent linear strength and great knot resistance. The Fluo Green colour allows you follow every cast and detect subtle pulls on the line. Also available on Olive Green for extra discretion.

## FLUOROCARBON & HARD MONO

### **N** GUNKI ICE FLOUROCARBON 9749 / D341

Top of the range fluorocarbon (PVDF) with some very special qualities. The refractive index is very close to that of water so it is virtually invisible. Being totally waterproof means almost no stretch compared with nylon and this is particularly impressive in the lower diameters. Sinks three times quicker than classic lines which helps with precision fishing or where you don't want a slack belly of line to form. The line is exceptionally abrasion resistant- perfect for sanggy swims – and strong. Supplied in a plastic spool with soft edges that automatically catches the line. Great for technical hook lengths! 25m spools (20 m from 0.64mm upwards).

		Diam. (/100)	Length (m)	b.s.(Kg)
GUNKI ICE FLOUROCARBON 0.17 82280		0.17	25	2.21

GUNKI ICE FLOUROCARBON 0.86 82292		0.865	20	41.00

### **N** GUNKI HARD MONO 9750 / D341

This hard mono is ultra-resistant to abrasion and cutting. Perfect for making rigs targeting pike, catfish, sea bass and cod. Less stiff and easier to knot than a 100% fluorocarbon, this nylon is a great choice for longer hooklengths in thicker diameters and for shock leaders. Great knot resistance. 50m spools.

		Diam. (/100)	Length (m)	b.s.(Kg)
GUNKI HARD MONO 0,40 40291		0.40	50	8.40

## RIG BITS

### GUNKI CAROLINA CHARTREUSE BEAD

9697 / J3829

Serves as a shock absorber for your knots. The extra touch of colour increases the attractiveness of your Carolina rigs.

		Qty/pack	Size (mm)
6MM 39019		15	6

### GUNKI CAROLINA RED BEAD

9696 / J3829

Serves as a shock-absorber for your knots. The extra touch of colour increases the attractiveness of your Carolina rigs.

		Qty/pack	Size (mm)
6.5MM 39141		15	6.5x8

### GUNKI CAROLINA STOP FLOAT

9695 / J3829

This stopper slides firmly on the line then stays securely in place once fixed. On a Carolina rig place it above the lead and adjust up and down to give more or less freedom of movement to your lure. Discrete oblong shape.

		Qty/pack	SIZE
L 39131		8	L

### GUNKI CAROLINA BALL LEAD

9623 / J3829

Ball shaped leads – a key element in Texas rigs. The silver coating is an added bonus when after perch and other predators attracted by reflections.

## FIX'FLASH C BLADES 7603 / J3829

Blades designed for attaching to soft baits! Adding a blade increases the visual attraction of any soft bait plus adds to the noise/vibration attraction. Placed above your lure a Fix'Flash blade will also help your bait to glide through the water, particularly effective when you are after pike. Different colours let you play with a showy flash or a more discrete colour contrast. These blades are great when the fishing is harder and have been used for years by top perch and pike anglers!

		Color	Size (mm)	Type
FIX'FLASH C BLADES C17 TIGER PINK/YELLOW 20813		Tiger Pink Yellow	17	Colorado

## SHALLOW SCREW 9698 / J3829

Scandinavian system for attaching non-loaded soft baits and fishing shallow over weedbeds or in the margins. Reliable, easy to use corkscrew attachment. This accessory can also be used on Texan hooks and our articulated G'FLIP weights. A trace can be added to the eye.

		Ø mm	Length (mm)	Qty/pack	Steel/Strands
SHALLOW SCREW S 39246		3.5	15	5	0.6mm
SHALLOW SCREW M 39247		5	17	5	0.8mm
SHALLOW SCREW L 39248		6	39	5	1.2mm

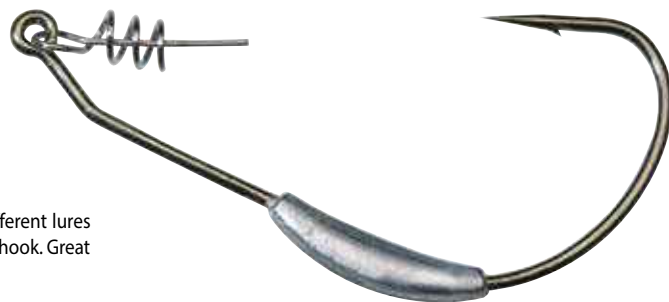

## LOADED HEADS

### GUNKI LOADED TEXAN HOOK

9693 / J3829

Range of loaded (zinc) Texan style hooks in a variety of weights and hook sizes to suit different lures and fishing depths. A screw fitting allows you to easily and securely attach a soft bait to the hook. Great for fishing through weedbeds or other snaggy swims.

		Color	Hook	Weight (g)	Qty/pack
GUNKI LOADED TEXAN HOOK 2G 1/0 39205		Neutre	1/0	2	2

## G'TEX

9636 / J3820

For setting up Texan rigs there is no wider choice of heads on the market than our G'TEX range. The hook hangs at almost a 90° angle to the line which improves your strike rate and gives a smooth gliding action to your lures. Equally at home on straight retrieves or vertical fishing situations the offset centre of gravity on the G'TEX head gives a realistic live bait type action to baits when paused- a sure way to provoke an attack from following fish! Developed to work alongside our new JUNGLE soft baits for searching out snaggy swims where no other anglers dare fish! Available from 3/0 to 5/0 and 5 to 21g, the G'TEX range covers the needs of most European predator anglers!

## G'FLIP

9634 / J3820

An articulated and modular weight system that lets you swap weights and patterns of lures in an instant. The secret of the system lies in the articulation which gives lures tremendous freedom of movement bringing new dimensions to their rolling and gliding actions. Soft baits can be attached and changed by simply screwing or unscrewing the attachment. The screw housing even lets you add extra trailers onto the lure if required. When you want ultra- precise rigs where weight is critical the screw can be replaced by a simple eyed hook. You are then more in control of where the hook is positioned in the bait depending on the type of rig you're using. G'FLIP is an ingenious system that is as effective as it is easy to use. Try G'FLIP and open up a whole new range of possibilities!

## G'FISH SCREW

9635 / J3820

These screw in heads are reliable and discrete leaving your lure to move more freely. Hooks on classic jig heads tend to rigidify soft baits but a G FISH SCREW gives you a short fixing point closer to the head which amplifies the movement and vibration from your lure. This rig also makes it far easier to change weights and lure size and the different arming points leave you freer to set up the lure how you want it in any given conditions, changing the length and size of hook, hooking through the stomach or the back... Personalising and experimenting with rigs becomes so much easier when you only have to screw on or off the jighead!

## G'SKULL NEUTRAL 9230 / J3820

This is an exclusive loaded head design to Gunki®. A great looking head with a low centre of gravity that guarantees perfect lure stability and a pronounced rolling action for your soft bait. Designed for linear fishing the lure will swing at the slightest bit of slack on the line. This is a real plus point as it can trigger instinct bites or help you hug the side of a structure or underwater ledge.

		Color	Hook	Weight (g)	Qty/pack

## G'FISH

7188 / J3820

This is the leaded head for all your Gunki soft baits! The perfect loaded head for delicate straight retrieve rigs. We have improved the design of this head to make it even more stable and perfectly balanced giving a natural swimming action to your bait. A must for those rigs that look to mimic natural prey fish. The Pike Addict versions include a hook that is designed specifically for pike and for use with the Pike Addict Gunki lures from 16-20mm.

## G'VERTI

7190 / J3820

Low profile vertical head designed to be stable and offer little resistance when being worked whilst keeping the lure perfectly horizontal in the water. The head will respond to any angler animation from tiny impulsions to sweeping pulls and jerks. The head can also be made to swing after being paused which will often provoke a take. Try this head on long distance straight retrieves or in deep water to get the most from its smooth gliding action.

## G'ROUND

7189 / J3820

A classic round loaded head that will take any lure type and can be fished with any style. Dense, stable and well balanced. Our round head gives off a strong eye signal to predators that focus attacks on the head itself guaranteeing cleaner hooking and less fish lost. This compact head offers little water resistance and can be worked easily round snags.

## G'FOOT

7187 / J3820

Football shaped for that offers very little water resistance on its sides. A low centre of gravity makes this the perfect loaded head for anglers looking to exaggerate the rolling action of their lure. Handy on sandy or stony bottoms where its natural swinging action let you work the head round any obstacles or snags. Great for just bouncing bottom on linear retrieves or for vertical work with delicate lures like Still Gun. The G'SLIDE heads are fitted with a hook that is designed to be used with the Pike Addict soft lures from the Gunki range between 16 and 20cm long.

## «STREET FISHING CONCEPT» JIG HEADS

*Each aspect of these new GUNKI Concept Street Fishing loaded heads has been carefully considered to cover all «finesse» styles of soft lure fishing. Each of the four models has a precise function. Working on the hydrodynamics and weight distribution we have got some heads to sail smoothly whilst others have a more darting action, other heads that suit a more static presentation of a lure and respond to tiny micro animations. Fine wire but remarkably strong hooks complete each micro rig. Mat finish for extra discretion.*

### G'FOOT GUARD MAT NATURAL 8228 / J3822

Similar to the G'FOOT MAT NATURAL in style and function but with an added anti-weed guard to let you explore sunken trees, roots and weedbeds in safety.

G'FOOT GUARD MAT NATURAL 5G / 1/0 41146		Mat Natural	1/0	5	3

### G'FOOT MAT NATURAL 8227 / J3822

Football shaped weight designed specifically to get a lure down quickly. Most attractive when scraped and bounced over snaggy bottoms (rockin' motion style). Perfect for working round deeper jetties and moorings with shads and other lures. The mat finish is discrete and blends in with darker rocky bottoms.

		Color	Hook	Weight (g)	Qty/pack

G'FOOT MAT NATURAL 5G / 1/0 41136		Mat Natural	1/0	5	3

### G SLIDE MAT NATURAL 8226 / J3822

The G Slide is a truly dynamic loaded head with a distinctive missile shape. Perfect for linear fishing from the bank. With the weight distribution loaded to the front of the head you can generate sudden dives which will often trigger an attack. Worked back more actively with fast short pulls you can get a lure to dart looking just like a panicking prey fish. Absolutely deadly on perch!

		Color	Hook	Weight (g)	Qty/pack

G SLIDE MAT NATURAL 5G / 1/0 41126		Mat Natural	1/0	5	3

## G'ROUND GUARD MAT NATURAL 8229 / J3822

The G'ROUND GUARD heads are the perfect shape for sliding along the sides of sunken obstacles and snags. Great for trying to thread a lure through gaps in snaggy swims. An anti-weed guard limits the risks of catching up and gives you that extra security when fishing in real snag pits. Available in very small sizes too!

## «PIKE ADDICT» JIG HEADS

### G ROUND PIKE SHORT - S 9637 / J3821

Sometimes pike get obsessed with smaller prey so we have developed a head with a strong wire hook with a short shank so you can set up reliable rigs with small soft baits. They are also good for fishing in big rivers where you want a hook that will not open as fish use the force of the river current to fight harder. The short shank leaves more freedom of movement for softbaits. With a 90° angle in all sizes these heads are perfectly balanced for both linear and vertical fishing and from 15 grams upwards there is an attachment for a second hook if wished.

## G ROUND PIKE LONG - S 9638 / J3821

Targeting record size pike requires beefed up rigs. So we have incorporated strong wire 8/0 and 10/0 hooks on our G ROUND L-SHANK heads to accommodate the biggest soft baits targeting specimen size fish on big waters. Perfectly balanced, these heads are the ideal partner for our PIKE ADDICT soft baits. From 15 grams upwards there is an attachment for a second hook if wished.

## G FOOT PIKE ADDICT NEUTRAL 5G 5/0

7748 / J3821

This classic football shaped head really cuts through the water cleanly. The low centre of gravity makes this the perfect head for anglers wanting to exaggerate the rolling action of a soft bait. These also work well on sandy or stony bottoms where the swinging action of the head can be worked round snags and blocks. Perfect for bouncing the bottom on linear retrieves or for vertical fishing with delicate rigs like the STILL GUN. The G SLIDE Pike Addict heads are perfectly adapted for pike fishing with Gunki pike addict lures from 16 to 20 cm long.

G’FISH PIKE 7749 / J3821

Leaded head for your GUNKI soft baits. This is your first choice for natural and discrete presentations fished cast and retrieve. We have improved the design of this head to make it more stable and get the balance absolutely right. This gives an incredibly natural swimming action to your lure which closely mimics that of unaware prey fish. The Pike Addict models have a hook designed specifically for pike and work well with the Pike Addict Gunki soft baits of between 16 and 20 cm in length.

## «IN THE BOX» JIG HEADS

### **N** G'FISH SCREW IN THE BOX

9755 / J3823

Screw-in heads have quickly become a vital part of pike angling! The reliable screw fixing only holds a short section of your lure and frees up more of the soft body to vibrate and pulse in the water. You can balance your rigs and lure sizes easily so with various fixing points you can attach soft baits how you like varying the length of connection and size of hook. These screw-in heads let you modify and adapt rigs quickly to find the right presentation on the day!

# FLOAT TUBE SQUAD

*An exciting and innovative concept in float tube fishing that is modular, adjustable and can be added to as you go along! Now you can personalise your float tube set up in a way that suits you! Our SQUAD and FURTI-V float tubes are two technically different products yet the accessories that come with each one are complementary and can be swapped and added to either float tube. The key elements are the pockets-specially designed to hold all your accessories. They can be positioned where you want round the float tube so you can organise your fishing station to suit the way you fish!*

*The main features of our removable and modular pocket system are:*

- Select the right pocket size for different venues
- Swap over pockets for different venues and styles of fishing
- They can be positioned exactly where you want round the float tube so they don't hinder your fishing action
- You can take them off the float tube to reduce weight when carrying it
- You can do all the preparation at home and have made up pockets ready to go
- All your tackle can be transported separately from the tube and quickly dried out, for example, after each trip
- You can keep your pockets if you change model of GUNKI float tube

*Also available are a range of accessories from rod roosts to waterproof side trays to complement your GUNKI float tube system and get you perfectly set up in the water.*

## GUNKI SQUAD FLOAT TUBE 9739 / Q30

With its streamlined V shape, the comfortable seat and excellent buoyancy this float tube makes moving on water easy! Exceptionally stable you can get into the best fishing spots quickly. It is incredibly manoeuvrable yet discrete in the water. Finished in a camo-fish colour for extra discretion. Removable Velcro reflective security bands. Comprises:

- Gunki medium pocket (x1)
- Gunki Team pocket (x1)
- Repair kit
- Transport straps
- Foot pump
- Rod scratch (x2)
- Carry bag
- Reflective security bands (3)

Technical specs:

- Maximum load: 145kg
- Weight with pockets: 6.2kg
- Floating security seat in high density foam with adjustable straps for back rest
- Base in Cordura 100D fabric for minimum water resistance and extra strength
- Removable and repositionable secure pockets
- Numerous fixing rings
- Various storage options (net pocket at back, bottle holder/rod rest..)
- Storage space at back
- Streamlined V shape
- Carry handle
- Unhooking mat with measurements

Made from rigid PVC this SAFE BAG will take the other smaller SAFE BAGS and HAND BAGS in the range. Cover with lip to protect the contents of your bag from rain and spray without having to zip up the cover every time. Comfort grip handle.

		Size (cm)
GUNKI HARD SAFE BAG 36 23719		36x25x24

### GUNKI SAFE BAG 55

7379 / M371

The largest of the GUNKI SAFE BAG range. Will carry all the other storage bags inside.

		Size (cm)
GUNKI SAFE BAG 55 23717		55x25x21

## CLASSIC COLLECTION

*Range of luggage designed to rationalise the organisation of your lures and accessories'. Made from super tough 1600D Cordura fabric each piece of luggage is tough and will stand up to the rigours of modern angling. Reliable fastenings and zips throughout.*

### GUNKI BACKPACK/ 4 BOX

9632 / M370

Large capacity rucksack perfect for the angler/hiker who needs plenty of tackle with them. The main front opening pocket takes 4 boxes (275X195X45mm) and there are plenty of smaller pockets to take various accessories and tackle items. An ergonomically designed back section keeps you comfortable on longer walks. Two large adjustable shoulder straps. Great choice for anglers who like plenty of tackle choices to keep their options open.

Size (cm)		
GUNKI BACKPACK/ 4 BOX 21341		40x20x49

### GUNKI BOX BAG

7370 / M370

Supplied with 3 boxes (315X210) the BOX BAG is a classic storage solution for lure anglers. Practical and adaptable this remains a firm favourite amongst modern anglers.

Size (cm)		
L 25886		33x22x24

### GUNKI CARRY BOX

9631 / M370

Shoulder bag with front opening main compartment for easy access to the 4 boxes they hold box (box size: L=315X210X50MM/S=2715X195x45mm). Each side pocket houses another smaller plastic box (200x135x40mm). An extra compartment accessible from the top of the bag provides handy storage for pliers and other accessories. Well thought out functional lure bag that carries a lot of kit in a compact package.

Size (cm)		
M 21301		38x2x28
L 21321		41x24x30

### GUNKI HAND BAG

7369 / M370

Practical and neat fishing bags that are perfect for short after work fishing sessions. The bag help you organise your gear and distil it down to just what you need for an hour or two fishing. Supplied with a plastic box and 10 envelope pockets.

Size (cm)		
S 25884		22x16x10
L 25885		29x20x15

### GUNKI RUCKSACK

7372 / M370

Light rucksack in GUNKI livery. Built to offer easy access to 3 different accessory boxes in three different pockets (boxes not supplied). Sits very comfortably on your shoulders. Single strap allows you to access the bag simply by turning it round your neck no need to take it off! Highly practical design.

Size (cm)		
GUNKI RUCKSACK 25887		42x28x9

### GUNKI TACKLE BOX

9633 / M370

Small bag with a single opening so you can quickly get to the plastic box (200x135x40MM) and 10 wallet pockets held inside. Ideal for anglers who make a pre-selection of hard and soft baits before each trip.

Size (cm)		
GUNKI TACKLE BOX 21361		23x17x7.5

## GUNKI WALK BAG

7371 / M370

These banana bags have proved a big hit with street fishing anglers. Fitted with plenty of pouches and storage spaces to take all your roving fishing tackle. Belt fastening for comfortable and secure fixing of your bag. The small model is supplied with two accessory boxes.

		Size (cm)
S	25903	24x14x8
L	25904	34x10x20

## GUNKI HARD ROCK CASE

### GUNKI HYDRO GEAR

9703 / N302

Comprising a jacket and a pair of trousers this kit is particularly suited to the wetter months of the year. 100% waterproof with an 8000mm membrane. Made for a 100% polyester fabric finished with a rip stop treatment. All the seams have been heat sealed for extra protection. The material is very breathable (5000g/cm<sup>2</sup>/24). Velcro closing on the wrists with a neoprene band to stop water ingress and heat loss. Comfortable, technical outdoor wear that feels great and does not restrict your movement.
