TROPICAL

ASHURA WAIEFU 250 H BLUE BLASTER 1169/C212

The Waiefu 250H is a technical and extremely versatile rod developed to meet several carvery specific design criteria:

- Great casting properties. Whether from a boat or the shore tis rod will cast 30-120g lures a long way with unerring precision.
- Suitable for light tropical fishing across the globe (targeting barracudas, roosterfish, tarpon...) and of course tuna and jacks in the Med.
- The ultra-fast action is great for more technical fishing with plugs, [poppers and stickbaits.
- Plenty of power to hit and hold big hard fighting fish whilst retaining enough action to enjoy playing your fish.
- Top quality Japanese blanks have been teamed with FUJI fittings: Fuji Alconite series K rings to avoid any chance of tangling and finished with secure double whippings. Each rod is supplied in its own signature rod bag with a Cordura protective rod tube.

ASHURA WAIEFU 250 XH BLUE BLASTER 1170/C212

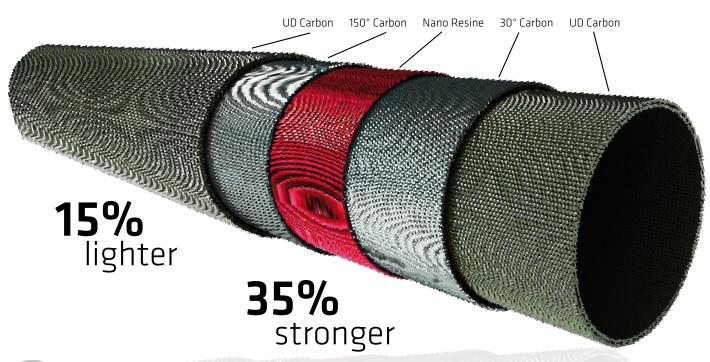

The Waiefu 250 XH is the ideal rod for Mediterranean tuna fishing and for general tropical fishing for species like jacks, trevally, serioles, dolphin fish, roosterfish, tuna, 2m50 is the perfect length for accurate distance casting when fish are feeding at range. Will handle 100g jerkbaits and poppers up to 200g - so very versatile in even rough conditions. The powerful 80lb test blank is great for tackling fish around the 20kg size without over tiring either the fish or the angler – important so that fish can be returned with a good chance of surviving. The blank has enough power in reserve to handle the odd bonus 40 or 50kg fish that seem to show up more and more these days! Top quality Japanese blanks have been teamed with FUJI fittings: Fuji Alconite series K rings to avoid any chance of tangling and finished with secure double whippings. Each rod is supplied in its own signature rod bag with a Cordura protective rod tube.

X5 construction is consisted with 5 layers of graphite sheet, off ering incredible strength and durability. The carbon material used for X5 contains special Nano resin technology patented, achieving lighter weight and better sensitivity.

ELEMENT RIDER

ELEMENT RIDER X5 S 210 M STALKING SPEC 1606/C210

The ELEMENT RIDER S 210M Stalking Special is essentially a rod for surface or shallow sinking lures (Bonnie, SK Pop Grande, Water Monitor as surface lures and Arnaud, Squad Minnow, Squirrel, Rerange as slow sinking lures...) The versatile action is also perfect for using with light soft baits. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight," V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 210 MH LIGHTNING SPEC 1609/C210

The ELEMENT RIDER S 210MH LIGHTNING SPECIAL has been developed specifically for fishing lighter soft baits on lightning head. The versatile action also makes this a perfect rod for all standard size lure fishing situations. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight,"V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

N ELEMENT RIDER X5 S 210 H THUNDER BOLT 1610/C210

The ELEMENT RIDER S 210 H THUNDER BOLT has been developed specifically for vertical fishing with heavy soft baits. The power and action in the blank make it perfect for specimen hunters looking for big fish on open waters. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight," V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 225 H KORRIGAN 1611/C210

ELEMENT RIDER S 225 H KORRIGAN is exceptionally light and responsive. Our team wanted a rod capable of fishing big shad type baits in different ways-from straight retrieves to traction and vertical styles-yet be able to handle big jigs up to 200g. The rod has plenty of power in reserve to handle big bass and pollock even in the roughest sea conditions or the fastest tidal currents. Can also be used to fish over wrecks at depths up to 90m! Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with tri-leg Fuji "K" series rings to eliminate any change of tangles when casting. All rings have been double whipped. An EVA handle sits above the KDPS reel seat designed to help work big lures and jigs and give you plenty of cranking power when it comes to playing big fish! Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 240 MH QUARAB 1617/C210

The ELEMENT RIDER S 240 MH QUARAB is an exceptionally versatile performer. A thoroughbred sea rod that is equally at home targeting bass with plugs and soft baits but can also be used for light tropical fishing. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with tri-leg Fuji "K" series rings to eliminate any change of tangles when casting. All rings have been double whipped for strength. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 250 XH RISING PHOENIX 1619/C210

This ELEMENT RIDER S 250 XH has an extremely powerful action that is perfect for all styles of traction fishing. Will handle the biggest plugs and metal jigs with ease and comes into its own when fishing in more extreme conditions. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with tri-leg Fuji "K" series rings to eliminate any change of tangles when casting. All rings have been double whipped. An EVA handle sits above the KDPS reel seat designed to help work big lures and jigs and give you plenty of cranking power when it comes to playing big fish! We recommend you team the rod with our nitro PE Salt Water 40lb braid. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 260 M RENEGADE 1621/C210

Our ELEMENT RIDER S 260 M RENEGADE is inspired by the rods used by top Japanese bass shore anglers. This is an ultra-sensitive rod great for tactile fishing styles with light soft lures (weightless, Texan or light jig heads) and small plugs like Bonnie, Arnaud and Rerange. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight," V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 220 XH SPECIMEN SPEC 1623/C210

The ELEMENT RIDER S 220 XH SPECIMEN SPECIAL really live up to its name! This is a strong rod made for stopping record sized Atlantic Ocean fish. The rod is designed to handle the savage head shaking of hooked meagre or conger over wrecks and absorb the lunges of bigger fish that simply don't know when they are beaten! The solid tip is surprisingly sensitive and can pick up shy bites from bigger fish so they can be hooked cleanly in the lip avoiding hook pulls as fish turn and twist away from your boat. The softer tip also helps soak up the head shakes of fish as they reach the surface also keeping hook pulls to a minimum. This is the perfect blank to make sure you get that fish of a lifetime safely landed! Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with tri-leg Fuji "K" series rings to eliminate any change of tangles when casting. All rings have been double whipped. An EVA handle sits above the KDPS reel seat designed to help work big lures and jigs and give you plenty of cranking power when it comes to playing big fish! We recommend you team the rod with our nitro PE Salt Water 40lb braid. Supplied in a signature rod bag and a protective Cordura tube.

ELEMENT RIDER X5 S 250 M TENYA SPECIAL 1624/C210

the ELEMENT RIDER S 250 M TENYA SPECIAL is a specialist tool designed for targeting sea bream. Can also be used for more general soft lure fishing with lighter rigs. The solid tip helps read the contours of the bottom and pick up the slightest tap or knock from fish. Even the whippings on the tip are phosphorescent for better bite detection! Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with ultra-light Fuji "K" series rings to eliminate any change of tangles when casting whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

PEPPER

PEPPER X5 B 210 ML MAGIC WAND 1625/C213

The PEPPER B 210 ML Magic Wand really lives up to its name! A technical and responsive ultra-light rod that has been designed for intensive light to medium lure fishing. The action has been designed for small plugs (Topwater, minnow, light buzzing, light spinner baits...) but is equally at home with other styles like drop shotting or split rig fishing. Built on new X5 ultra high quality carbon blanks featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

PEPPER X5 S 198 UL MICRO JIG SPECIAL 1626/C213

The PEPPER S 198 UL Micro Jig Special has been designed specifically for use with mini jigs and light jig heads. The blank is very fast and sensitive – perfect for all power finesse styles like light drop shot, Neko rig, light split shot rigs or wacky rigs. The blank is great for small minnow plug fishing. An extremely sensitive solid tip lets you read the nature of the bottom perfectly and detect the slightest tap from a chasing fish. Built on new X5 ultra high quality carbon blanks featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

PEPPER X5 S 210 L FINESSE PUPPETEER 1627/C213

Living up to its name, the PEPPER S 210 L FINESSE PUPPETEER is a rod developed for all light styles of fishing. The ultra-light blank is responsive and fast actioned- ideal for fishing small plugs like Water Monitor, SK Pop, Squad minnow 65 SP, squirrel 61 SP, Tricoroll or Chubby. The rod is also great for most finesse styles of soft bait fishing for perch or zander (Wacky rig, light drop shot, Neko rig...) An incredibly responsive blank sure to prove a big hit with light lure anglers after pike, perch, zander or bass. Built on a new X5 ultra high quality carbon blank featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

PEPPER X5 S 210 ML AKOYA PEARL 1756/C213

Designed for the lightest and most technical fishing styles, the PEPPER S 210 ML AKOYA PEARL has an incredible reserve of power for a medium light rod which makes it ideal for targeting big fish on finesse style rigs. The blank is ultra-sensitive and resonates the slightest touch from a fish. Perfect for street and rock fishing. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji Torzite Titanium "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight,"V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

PEPPER X5 S 230 L FINESSE SYMPHONY 1667/C213

The PEPPER S 230 L FINESSE SYMPHONY is designed primarily for light fishing up in the water and will give a great zigzag action to your baits. The action is versatile and lends itself to all ultra light techniques such as drop shotting, light jig head, light Texas weightless etc. The length is ideal for casting light lures a long way whilst still keeping tight control of the line from the moment your lure lands. Top quality Japanese blanks finished with the latest FUJI components. The rod is mounted with FUJI TORZITE titanium K rings eliminating any chance of the line catching whilst casting and the latest TVST reel seat which has the following advantages: Ultra-light, "V" shape gives great grip on the handle that is so important for accurate casting and finally direct contact with the blank on top and on the sides of the rod for better bite detection. Supplied with an elegant signature rod bag in a rigid Cordura protective tube.

PEPPER S 240 M OFFSHORE EGING SPECIAL 1290 / C213

A boat rod designed specifically for eging for squid and other cephalopods. The Pepper S 240M Offshore Eging Special is built from very high quality new X5 carbons built from pre-preg comprising carbon fibres laid at 3 different angles. The resultant blank is lighter, more powerful and responsive than previous rods. The Pepper S240 M Offshore Eging Special works best on technical jigging methods like the famous "bichi bachi" method. The length is perfect for distance casting and helps control eging lures in strong currents. Pepper rods are renowned for their sensitivity and this rod is no exception – picking up the tiniest plucks and pulls from cephalopods. The progressive action helps avoid hook pulls and makes playing squid or cuttlefish exciting. The blank is powerful enough to use a range of Eging baits from 2.5 to 25g maximum.

THE ARTIST

THE ARTIST X5 S 2102 M DARK ELF 1634/C213

Our new THE ARTIST S 2120 M DARK ELF is a versatile two-piece spinning rod. Designed principally for plug fishing, the action is also great for fishing soft baits in a variety of finesse styles (weightless, drop shot, jig head or light Texas...) Built on a new X5 ultra high quality carbon blank featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

THE ARTIST X5 S 2902 MH DARK ELF 1640/C214

THE ARTIST S 2902 MH DARK ELF is the perfect rod for casting big hard baits (minnows, poppers, stick bait..) or jigs a long way even in the most challenging weather conditions! Powerful yet well balanced and responsive the rod will handle lures in the 15-50g range. The tip action is perfect for working big lures back or animating soft baits. The rod has plenty of power for tackling hard fighting fish like bass and is great for asp or sea trout and salmon fishing on bigger rivers. Built on a new X5 ultra high quality carbon blank featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

THE ARTIST X5 S 200 MH MARKSMAN 1641/C214

THE ARTIST S 200 MH MARKSMAN is one of the most responsive top of the range rods around! A light yet powerful spinning rod that will handle the most technically demanding techniques where accuracy and sensitivity are key advantages (Texas rig, heavy split shot, vertical and linear styles...). The balance and power of the rod is perfect for intensive fishing with medium sized plugs! Built on a new X5 ultra high quality carbon blank featuring a special pre-preg carbon where the fibres are oriented along three different angles. Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight," V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

THE ARTIST X5 B 200 MH MARKSMAN 1642/C214

THE ARTIST B 200 MH MARKSMAN is perfect for intensive fishing with crankbaits, chatterbaits and spinnerbaits. The rod is perfectly balanced for plug fishing with lures like Magsquad and Rerange. The blank soaks up powerful vibrations from these lures whilst having the power needed to firmly strike bites and get hooked fish away from snags. The rod will also handle power fishing with soft lures. The rod is the perfect tool for bass, pike and zander anglers. Built on a new X5 ultra high quality carbon blank featuring a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Finished with ultra-light Fuji Torzite Titanium "K" rings that eliminate the risk of tangles whilst maximising casting distances. Supplied in a signature rod bag and a protective Cordura tube.

NITRO

NITRO FINESSE S 198 M 1171 / C216

The NITRO S 198 M FINESSE suitable for both freshwater and sea use is ou Light rod par excellence. Designed specifically for use from float tubes, kayaks or light boat fishing this rod has the power to handle specimen fish but remains light and tactile to use. Great with our new 9cm Dexter Shad and Eel baits or smaller Nitro Shad lures on heads up to 7g. The blank will alos handle casting plugs and other lures up to 20g Finished with the latest FUJI Japanese components. Fuji Alconite "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip, perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag with two counterbalance weights added to the butt. The advertised weight of the rod does not include the counterbalances.

NITRO OFF SHORE S 215 MH 1172/C216

A versatile rod for boat fishing at sea or on fresh water. Will handle sift baits and plugs and lures up to 40 g and for vertical fishing lures up to 100g- ideal for targeting cod and pollock in water 20 or 30 metres deep! Fast action blank helps cast lure of different sizes with enough nerve for clean casting and secure playing of bigger fish in sea or river currents. Finished with the latest FUJI Japanese components. Fuji Alconite "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip, perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag with two counterbalance weights added to the butt. The advertised weight of the rod does not include the counterbalances.

NITRO OFF SHORE S 215 H 1173 / C216

The NITRO S 215 H OFFSHORE is the heavy version of the Nitro MH Offshore with extra power to cast lures from 10-60g or troll softbaits like the Nitro Shad 120/150 or Dexter Shad 200. Will handle lures up to 150g for vertical fishing. The tech specs are the same except the blank has an ultra-fast action for even better lure control. A real versatile performer equally at home targeting big pike, sea bass, Pollock, amberjack, cod etc... Finished with the latest FUJI Japanese components. Fuji Alconite "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip, perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag with two counterbalance weights added to the butt. The advertised weight of the rod does not include the counterbalances.

NITRO OFF SHORE S 230 XH 1174/C216

The NITRO S 230 XH OFFSHORE is the most powerful rod in this range. Designed for vertical fishing in relatively deep water. The ultra-fast powerful blank can also be used for light tropical fishing as there is plenty of power for tackling groupers and other reef fish. Rated 20-80g for casting and up to 200g for vertical fishing this is a truly versatile rod. Long enough to be used trolling lures and softbaits like Nitro Shad or Nitro Slim Shad. The perfect rod for heavy vertical fishing for sea bass and Pollock. For vertical fishing the rod will handle lures up to 200g fished at anything up to 100 metres deep! Great for tackling scabbard fish in the Med. Finished with the latest FUJI Japanese components. Fuji three legged Alconite "K" rings mounted with double whippings to eliminate any risk of tangling on the cast and an EVA handle with a KDPS reel seat to optimise working soft baits and jigs and give you a secure grip for playing big fish. Supplied in a labelled rod bag with two counterbalance weights added to the butt. The advertised weight of the rod does not include the counterbalances.

NITRO TRAK S 250 H 1175/C216

A versatile rod for shore or boat fishing on lakes and rivers or at sea. Ideal for linear traction style fishing with soft baits from boats but equally at home casting plugs from the bank. The fast action powerful blank is ideal for these techniques. The perfect action and length for casting jig fishing with hard baits or soft baits like Nitro Shad or the Nitro Slim Shad mounted on Nitro heads up to a maximum of 55 grams. Finished with the latest FUJI Japanese components. Fuji Alconite "K" rings to eliminate any risk of tangling on the cast. Supplied in a labelled rod bag with two counterbalance weights added to the butt. The advertised weight of the rod does not include the counterbalances.

NITRO SLOW JIG B 190 XH 1176/C216

As its name suggests the NITRO B 190 XH Slow Jig is a specialist slow jigging rod. Combining sensitivity, power and versatility this rod will handle Lazy Jigs in all sizes ad has the muscle to tackle hard fighting fish like cod, sea bass, amberjack and Pollock. The action lends itself to all slow jigging techniques like slow pitch, hi pitch, free falling and jerking. The rings are mounted in a spiral known as a "Brazilian" set up. This makes the rod more comfortable to fish with and is a unique feature on a dedicated slow jig rod. Finished with Japanese FUJI fittings- triple leg Fuji Alconite K series rings eliminate any chance of tangling when casting. All rings are double whipped. A B PLSSDG reel seat makes fishing soft baits as well as jigs easy and guarantees a secure grip on the rod when playing hard fighting fish. Supplied in a branded rod bag.

BLUE SHADOW

BLUE SHADOW S 190 MH VERTICAL 1181/C217

Spinning version of the Blue Shadow 190 MH destined to become your go-to rod for vertical fishing from a boat or float tube. Tactile, sensitive and responsive. This rod will let you feel your way round any swim and read the nature of the bottom perfectly. You will pick up every knock or tap from a fish. The tip is soft enough to absorb lure movements and avoid pulling the hook on both savage bites and subtle half takes. Handles lures up to 45g anywhere from deep lakes and reservoirs to flooded rivers or fishing into gale force winds. The base of the blank has plenty of power to handle big fish of any species. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat –a light V shaped seat for easier grip and perforated to give you direct contact with the blank for detecting the subtlest taps and knocks.. Supplied in a labelled rod bag.

BLUE SHADOW S 183 L LIGHT RIG VERSATILE 1182/C217

Developed for finesse approaches like weightless, light jig head and micro rigs. The Blue Shadow S 183 L Light Rig Special is also perfect for light plugs. The rod is every bit as responsive as more powerful jig rods. Its size and weight make it ideal for fishing from a float tube, kayak or small boat. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip, perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag.

BLUE SHADOW S 198 ML POWER FINESSE 1184/C217

The Blue Shadow S 198 ML power Finesse is THE reference rod for general finesse style fishing (weightless, linear, split shot, drop shot, light vertical, wacky rig...) A powerful blank combined with unrivalled sensitivity make it the perfect rod for working round snags and obstacles. This rod is very versatile and will handle a wide variety of small to medium plugs and lures like surface minnows, long bill minnows, crank baits and blades. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip and perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag.

BLUE SHADOW S 2102 M WATER FRONT VERSA 1644/C217

The BLUE SHADOW S 2102 M WATER FRONT VERSATILE is a great all round 2-piece spinning rod for boat or bank fishing. 2.10m is the perfect length for distance casting and working lures at range. Built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight," V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag.

BLUE SHADOW S 210 MH WATER RHYTHM 1186/C217

The perfect rod for linear and Texan styles fished in and around snags. The Blue Shadow S 210MH Water Rhythm is light yet powerful and designed for soft bait techniques that demand precision, sensitivity, control and power (buzzing, weightless, linear, vertical Texas rig, jig rigs, split shot, drop shot.) This rod has the suppleness to absorb the vibrations and pulses of different lures and the backbone needed to strike cleanly. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast and the latest TVST reel seat – a light V shaped seat for easier grip, perforated to give you direct contact with the blank for detecting the subtlest taps and knocks. Supplied in a labelled rod bag.

BLUE SHADOW S 2202 H DEEP RAIDER 1647/C217

The BLUE SHADOW S 2202 H DEEP RAIDER is the perfect 2-piece pike rod for boat or bank fishing. Designed for intensive fishing with Dexter Shad 200 or the Dexter Eel 210, this rod is so versatile it is also great with hard and soft swimbaits. The powerful tip action gets lures working quickly yet has the authority to tame hard fighting pike. Fitted with a keeper ring and built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting and the latest IPSM/KDPS reel seat which gives you great grip when fighting big fish! Supplied in a signature rod bag.

BLUE SHADOW S 220 XH BIG BAIT SPECIAL 1648/C217

The BLUE SHADOW S 220 XH BIG BAIT SPECIAL is a powerful spinning rod designed for fishing with big lure like swimbaits, heavy spinnerbaits and XL shad soft baits like the Dexter Shad. The stepped up action gives you total control when playing fish of all sizes. Although first and foremost a pike rod it is also great for lure fishing for catfish or even light tropical lure situations. Fitted with a keeper ring and built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting and the latest IPSM/KDPS reel seat which gives you great grip when fighting big fish! Supplied in a signature rod bag.

BLUE SHADOW S 240 H SPECIMEN Z DATING 1190/C217

Designed for distance casting with plenty of power. A full 2m40 long, this rod lends itself to all lure fishing for zander or pike from either shore or a boat. A top rod for accurate lure control on deeper venues. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast and an EVA handle with an IPSM/KDPS reel seat which helps lure control and gives an excellent grip when playing hard fighting fish. Supplied in a labelled rod bag.

BLUE SHADOW B 190 MH VERTICAL II 1649/C217

Developed for fans of bait-casting reels the BLUE SHADOW B 190 MH II VERTICAL has all the same characteristics as the spinning version. The responsive blank is perfect for transmitting information about the nature of any swim. The soft and supple tip action has been designed to absorb lure vibration and limit hook pulls when bites are either very aggressive or timid. The rod handles lures from 7-21g linear and up to 35g fished vertically. The blank is powerful enough to strike firmly and control any big fish quickly. The rod is perfectly balanced and light so you can fish for hours without getting tired. Built using the latest Japanese Fuji components including Fuji Micro Alconite CC rings mounted in a spiral so the line can't touch the blank coupled with a skeleton reel seat that is light, ergonomic and keeps you in direct contact with the rod. Supplied in a signature rod bag.

N

BLUE SHADOW B 205 MH FG CRANKING TIME 1650/C217

The BLUE SHADOW B 205 MH FG CRANKING TIME is a baitcasting rod designed for intensive crankbait, lipless crankbait, spinnerbait or chatterbait fishing with standard size lures like Cherry, Mascle Deep, Mushbob, TN or Crusher. The action is also great for wakebaits. Made from a composite of high module carbon and fibreglass. This makes the rod very comfortable to use as the glass softens the action and helps absorb vibrations from these lures. The glass also helps casting and cushions the rod against violent headshakes from hard fighting fish. Mounted with the latest Japanese Fuji components featuring Alconite CC rings. Supplied with a signature rod bag.

	10-0-	C)

BLUE SHADOW B 205 MH FG CRANKING TIME 11237		Extra Fast	1+1	176	7-35	10-20	205	9	128.5		

BLUE SHADOW B 210 MH COVER METHOD 1195 / C217

A light yet powerful casting rod perfectly balanced for intensive fishing with plugs, chatterbaits, spinnerbaits and all soft bait tactics where precision, comfort and extra power to get fihs out ofsnaggy swims is an advantage. For example buzzing, weightless, linear or Texas rig fishing round weedbeds. The action has enough give to soak up vibration form lures coupled with power to strike sharply and steer fish away from trouble with authority. Finished with the latest FUJI Japanese fittings. Rings are FUJI CC Alconites. Supplied in a labelled rod bag.

BLUE SHADOW B 215 H JUNGLE POACHER 1197/C217

The BLUE SHADOW B 215 H JUNGLE POACHER has been developed specifically for fishing jigs and Texan rigs round snaggy swims. The heavy action is very responsive so you can detect the precise nature of any swim and gives you the power to strike hard when fishing round deep water snags. The length and power in the blank let you hold and pump hooked fish away from snags before they have time to react. Strength and power yet light and sensitive. This rod is pure pleasure to fish with! Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast. Supplied in a labelled rod bag.

BLUE SHADOW B 220 XH BIG BAIT SPECIAL 1198 / C217

The BLUE SHADOW B 220 XH BIG BAIT SPECIAL is a powerful rod developed for using with big lures- swimbaits, spinnerbiats and the biggest soft baits like the Dexter Shad. The very powerful action will handle all species and size of freshwater fish! The rings are set in a spiral to avoid any risk of braid touching the rod blank. All our testers recommend this rod for the most extreme freshwater fishing situations. Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast. Supplied in a labelled rod baq.

BLUE SHADOW B 240 XH THE RESERVOIR DOG 1651/C217

The BLUE SHADOW B 240 XH THE RESERVOIR DOG has been specifically developed for specimen hunters. An element of fibreglass has been used in the blank to allow you to fish big swimbaits and shads more comfortably as the glass softens the blank and absorbs more vibrations. The softer action also helps reduce hook pulls when playing big fish and helps fully compress the blank for casting. This is the perfect rod when distance casting is required- for example on very clear waters - and will chuck the biggest XL Dexter Shads a long way from the bank or a boat. Built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting. Supplied in a signature rod bag.

BLUE SHADOW B 250 XXH THE WILD DOG 1201/C217

If you are looking for a rod for targeting specimen size pike then the BLUE SHADOW B 250 XXH THE WILD DOG is for you! Developed principally for using with the biggest lures like swimbaits but also XXL shads like our Dexter Shad 250. The length and power of the blank when compressed can pump lures a long way out. Blending an element of fiberglass into the top quality carbon makes the action more comfortable as glass helps absorb some of the vibrations from oversized lures. The second advantage of softening the rod slightly is when playing fish as the blank simply soaks up lunges and hook pulls are rare. With The Wild Dog you can go after the pike and catfish of your dreams in total security! Finished with the latest FUJI Japanese components. Fuji Alconite CC "K" rings to eliminate any risk of tangling on the cast. Supplied in a labelled rod bag.

BLUE SHADOW S 2104 MH VERSATILE POWER SP 1654/C217

As 4-piece versatile travel rod that covers most power spinning styles from the shore or a boat- after Irish pike, fore example! The BLUE SHADOW S 2104 MH VERSATILE POWER SPIN has a fast action suited to all soft bait styles but also great when fishing plugs and spinnerbaits like Crusher, Arnaud, Marsquad and Rerange. 2.10m is the optimal length for accurate casting performance. Built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight,"V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag.

BLUE SHADOW B 2204 H SPECIMEN OPS 1655/C217

4-piece baitcasting travel rod developed for globetrotting anglers who target big bass and pike on their trips. The BLUE SHADOW B 2204 H SPECIMEN OPS is built for swimbaits and big soft baits where accuracy, sensitivity and comfort are key qualities. The powerful action will subdue the hardest fighting fish and get them away from snags and cover like weed beds and rushes. Built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting. Supplied in a signature rod bag.

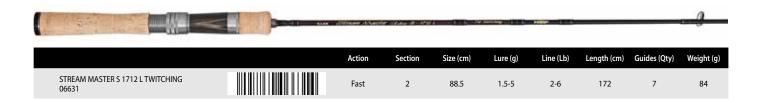

STREAM MASTER

STREAM MASTER S 1712 L TWITCHING 1177/C215

Ultra-light version of our famous Stream Master S 1712 L rod. Designed for ultra-light lures and minnows (Tricoroll 47/55, tiny Fry 38/50 and Chubby Minnow). Great to for fishing with spinners and small spoons (York Mini and New York). The blank is very responsive when twitching with plugs or spoons and allows accurate casting with very light lures. Our field testing team unanimously recommend this rod for upland streams and small to medium lowland rivers. Finished with FUJI Japanese fittings. Rings are Fuji Alconite "K" series to eliminate any chance of tangling on the cast. Supplied in a labelled rod bag.

STREAM MASTER S 1702 ML JERKING 1179/C215

A fast action blank designed for jerking dense plugs with various erratic movements. Perfect for more powerful rivers or spate streams. The ideal rod for reaching trout posted under obstacles or undercut banks. The blank has the steel needed to keep lures drifting naturally and control your line on 3/4 downstream long drifts. Even in strong currents you can jerk a lure and change its course suddenly which will trigger impulse attacks from active trout. Finished with FUJI Japanese fittings. Rings are Fuji Alconite "K" series to eliminate any chance of tangling on the cast. Supplied in a labelled rod bag. Jerking involves more irregular rod movements than twitching interspersed with pauses of different lengths. The principle of jerking is to get the lure working erratically with the rod fished high or down on one side keeping a tight line by winding down at the end of each jerk. How much line you wind back depends partly on how much action you gave the lure but also the strength of the flow as stronger currents will push harder against your lure. Jerking allows you to exaggerate sideways movements of a lure changing the line of drift. This works in your favour as you cover more water and can often pull a lure right in front of a posted fish.

STREAM MASTER S 2002 ML JERKING 1656/C215

The STREAM MASTER S 2002 ML has been developed for jerking and the length makes it perfect for snaggy and overgrown venues. Like the lighter 1702 ML the blank has been designed for jerking by giving irregular rod movements to heavy plug type baits. Great for heavy water and fast currents, this rod seeks out trout holed up in undercut banks or under snags. The action keeps lures drifting naturally and can hold them in the current on ¾ downstream casts without saturating the blank. Built using the very latest Japanese Fuji components: Mounted with Fuji Alconite CC "K" series rings to eliminate any change of tangles when casting. Supplied in a signature rod bag. Jerking involves more irregular rod movements than twitching interspersed with pauses of different lengths. The principle of jerking is to get the lure working erratically with the rod fished high or down on one side keeping a tight line by winding down at the end of each jerk. How much line you wind back depends partly on how much action you gave the lure but also the strength of the flow as stronger currents will push harder against your lure. Jerking allows you to exaggerate sideways movements of a lure changing the line of drift. This works in your favour as you cover more water and can often pull a lure right in front of a posted fish.

ELEMENT RIDER X5 S 210 H THUNDER BOLT 1180/C215

The ELEMENT RIDER S 210 H THUNDER BOLT has been developed specifically for vertical fishing with heavy soft baits. The power and action of the rod make it perfect for specimen hunters looking for big fish on big waters. Built from a new X5 ultra high quality carbon blank which features a special pre-preg carbon where the fibres are oriented along three different angles. The result is an increase in power and resonance and a reduction in weight! Mounted with Fuji "K" series rings to eliminate any change of tangles when casting and the latest TVST reel seat which has these key advantages: low weight,"V" shaped handle for extra comfort and direct contact with the blank. Supplied in a signature rod bag and a protective Cordura tube.

SOFT SWIMBAIT

N DUNKLE 5"

1534 / J2000

The DUNKLE 5" is a soft shad swimbait packed with innovative features. Designed for bass and pike anglers, the dense body helps with long distance casting but is also great at skipping around sunken structures and snags. The lure is armed with an ultra-sharp double hook on a rolling swivel with a split ring and kept in place with a clip that comes free when a fish takes. This reduces hook pulls and missed takes by holding the hook in the optimal position. A second clip is fitted to the back of the DUNKLE to let you fish closer to snags. The body shape tapers fast from the thick shoulders to the large tail generates a seductive swaying action when fished at slow speed. Available in arrange of colour. DUNKLE is a must have lure for the modern angler!

DUNKLE 7"

1540 / J2000

The DUNKLE 7" is a soft shad swimbait packed with the same innovative features as its smaller brother! Designed for bass and pike anglers, the dense body helps with long distance casting but is also great for skipping around weed beds and snags. The lure is armed with an ultra-sharp double hook on a rolling swivel with a split ring and kept in place with a clip that comes free when a fish takes. This reduces hook pulls and missed takes by holding the hook in the optimal position. A second clip is fitted to the back of the DUNKLE to let you fish closer to snags. The body shape tapers fast from the thick shoulders to the large tail generates a seductive swaying action when fished at slow speed. Available in arrange of colour. DUNKLE is a must have lure for the modern angler!

🗖 DERA BALL

1504 / J2002

The DeraBall is a hybrid sot bait crossed between a crank and a shad that is best described as a swimbait. Designed to imitate a range of prey, this small compact ball casts brilliantly and is designed for skipping round obstacles. When worked back on straight retrieves the seductive swimming action is sure to stimulate interest from any predators holed up in weed beds, lily pads, bankside snags or sunken trees. Originally designed for shallow water fishing there is nothing to stop you adding a tungsten ball to get it down deeper. The "Line True" attachment system runs your hooklength through a plastic tube so the lure is free to slide up the line when a fish is on. The DeraBall features an ingenious rigging system. It is supplied with a top quality treble hook with two prongs whipped onto the shank for attaching the hook to the lure and a rolling swivel so the hook can turn a full 360 eliminating the chance of hook pulls when a fish is on.

JOINT & BIG BAIT

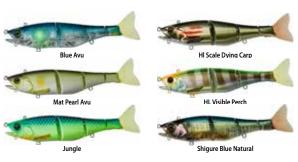

GANTIA 180

1155 / J2000

This hyper-realistic lure is segmented into 4 sections with a soft oversized tail. A real fish magnet that will provoke takes from all predators in any swim (weedbeds, blocks and boulders, jetties and sunken structures...). Unlike classic jointed swim baits the mouth on the Gantia is wide open. This increases water resistance and lets you feel more directly how the lure is behaving as it swims. The ABS lip is also positioned vertically and acts like a bow to help push away any weed or rubbish that might be hanging in suspension. Try working the Gantia back slowly tight to the bottom like a grazing prey fish simply by adding a double hook to the upper eyelet and a removable weight below the throat section. Even the most reticent of predators can be duped into having a go at such a natural looking bait!

B GANTAREL JR.

2732 / J2000

The GANTAREL is a jointed swimbait that oozes realism. The 3 piece jointed body gives the bait a swaying swimming action that looks just like a pumpkin seed fish. This nervous swimming action is reinforced by feather teasers fixed to the hook attachments. The two pectoral fins act like a lip and allow the bait to dive to about a meter deep. The eye attaching your line to the front of the lure has a rolling swivel to avoid the chance of any line twist. A second fixing eye is located under the chin to change the swimming action or allow you to add some weight and transform the GANTAREL into a slow sinking swimbait or fish it unloaded as a reasonable sized wakebait for rapid surface fishing. A third ring is placed at the tail of the lure to take either an extra hook or any other appendage that could further boost the attractiveness of the package. The cherry on the cake is that the Gantarel is capable of turning a full 180 degrees on a single twitch!

PONYTAIL 120

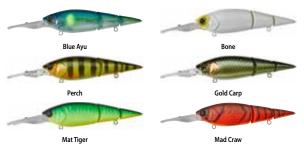

1143 / J2002

This big articulated crankbait can dive to depths of over 4 metres which make it ideal for covering a range of posts at different depths. There is an eyelet on the extreme front end of the lure which can be used to add a spinning blade to provoke a take when the fishing is tough. We recommend a Colorado no.3 blade as the perfect partner to the Pony Tail 120. The Pony Tail has the same devastatingly effective swimming action as the legendary Mikey crankbait.

CHUBBY POPPER 42

7884 / J2002

This small popper is an updated version of the CHUBBY. Simply fantastic when predators are chasing prey of the same size as the lure (larvae, amphibians or fry). Compact and well proportioned, the lure casts like a dream thanks to its internal weight. The Chubby popper has a walking the dog type action and will splash and pop with ease imitating frightened prey. Any popper worth its salt needs to sit well when stopped. To recreate the look of the tail of a prey fish or an insect's wings, the lure is fitted with a feather hook- sure to fool the wariest of chub or black bass.

SK-POP

2182 / J2002

Seiji Kato created the SK Pop using all his knowledge to create the perfect popper bait. The SK Pop is compact, well balanced and can be cast with the precision of a guided rocket thanks to the position of its internal weight. Easy to work with a dog-walking action, it makes a perfect pop and splash imitating closely hunted fry and will trigger predators strikes even from deep waters. Those specials effects are due to Seiji Kato's innovations. He added two small cavities in the hollow concave mouth of this popper. This lure can also be terribly efficient when just stopped and hung in the water during slow retrieves.

WATER MOCCASIN 75

5450 / J2003

The Water Moccassin is the smallest of all Illex's pencil Baits. To make it more versatile than ever the range now goes up to 9.4 gr. You can easily work this tiny lure for ultra cautious fish even under windy conditions. This lure is equipped with the 3 eye attachment system that will let you change swimming depth instantly. The tungsten beads inside the Water Moccassin do two things: perfect cast control in the air and that unique sound when worked through the water.

The Bonnie was designed to cover large areas of water quickly and easily locate fish. Fitted with tungsten beads that help long accurate casting and emit an unusual and seductive noise attraction through the water. This lure comes with the triple eye attachment system that lets you change depth simply by swapping the eye the lure is fixed to. To try and get the lure balanced as close as possible to traditional wooden lures, the tungsten beads are housed in 4 separate chambers.

SQUAD MINNOW 65 SP

4394 / 12022

The squad minnow is a jerkbait that combines all the ingredients needed to trigger a strike. The weights are fixed which allow you to stop the bait dead still during a retrieve. This is often enough to provoke a following fish to strike. The lure can also be made to repeatedly dart on the retrieve allowing you to vary the action from a dog walking action to a sudden twitching and darting movement. The fixed leads are also a great help with accurate distance casting.

MAG SQUAD 128 SP 4750/J2022

The squad minnow promptly became a «must-have» jerkbait for demanding tournament pros, especially among the US bass fishing elite. The great demand for the larger model encouraged us to develop two new sizes (115 and 128 mm) which we have called the «mag squad». Despite the longer length the lure still retains a slender profile. Very stable in action and responds well to many different rod movements. The sound and vibration attraction has been carefully balanced with a combination of metal and glass rattles to draw predators' curiosity.

RERANGE 110 SP

1543 / 12030

This is a smaller version of the RERANGE 130 SP. Sure to find favour with all freshwater and sea lure anglers who regularly fish at long distance and have to cast into headwinds. The patented weight transfer system (a resin coated tungsten cylinder) and profiled sides help maximise casting distances. Perfectly imitates small prey fish and is ideal for more energetic twitching or jerking styles. The lure has a pronounced roll to it and shimmers enticingly even in the worst weather conditions!

HL Pike

Gold Carp

Mat Tiger

RERANGE 130 SP

1156 / J2030

Streamlined and dense jerkbait minnow designed for long distance casting and cutting through the wind on big lakes or at sea. The patented weight transfer system (a tungsten cylinder covered with plastic tubing) and flattened sides help optimise casting distances. The lure has a distinctive rolling action which causes the flanks to flash seductively and gives off deep vibrations that big fish find irresistible.

DD SQUIRREL 67 SP

3194 / J2030

The deep diver Squirrel is the long billed version of the Squirrel. When this Longbill Minnow reaches its optimum depth it will start staggering on every rod movement flashing just like a dying fry. Not only you can work it classically like a regular crankbait on a steady retrieve, you can also easily try a «kick back jerk» keeping your rod tip high while jerking on a slack line.

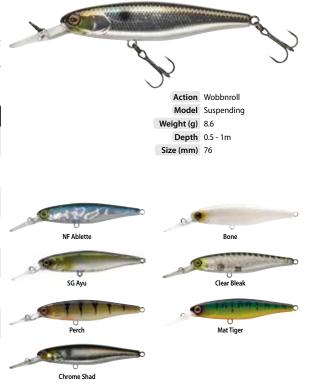

SQUIRREL 76 SP

2184 / J2030

The Squirrel is the most versatile jerkbait in our range. When you twitch the squirrel back with short knocks on the rod tip the lure takes on a squirming motion which is particularly noticeable when worked over a snag. This unpredictable and occasionally frenetic swimming action is remarkably close to that of a distressed prey fish.

DD SQUIRREL 79 SP

2168 / J2030

The deep diver Squirrel is the long billed version of the Squirrel. When this Longbill Minnow reaches its optimum depth it will start staggering on every rod movement, flashing just like a dying fry. Not only you can work it classically like a regular crankbait on a steady retrieve, you can also easily try a «kick back jerk» keeping your rod tip high while jerking on a slack line.

TINY FRY 38 SP

2185 / J2050

The tiny fry was designed to give of strong vibrations similar to a crankbait. What makes Tiny Fry so attractive is its amazing wriggling action.. Easy to use twitching or jerking, it imitates perfectly a panic-stricken fry. The sides of the lure will flash on the slightest rod movement without the lure jerking off course. Its unique body shape makes the Tiny Fry an excellent bait for holding steady in a flow.

The Tricoroll is one of our favourite baits. This little minnow has been specially designed for fast water trout fishing and has all the characteristics needed to become an ultra-light classic!

- * Ultra realistic finish
- * Perfectly balanced body that is stable in fast water
- * 4 different densities:
- F = Floating. This version will allow you to float a bait along with the current without getting snagged up in vegetation or snagged up in very shallow water. SP=Suspended. Particularly effective in steadier rivers when predators are sitting just under shoals of fry.
- S=Sinking. This sinks slowly and HS=Heavy sinking; faster sinking version. Both models are very accurate casters and let you spend time working over likely looking spots.
- * Rolling action that is just as deadly on slow or fast retrieves. The flanks will shimmer at the slightest twitch or pull.
- * Very easy to work with twitches and jerks.
- * OWNER treble hooks

TRICOROLL 67 HW

8831 / J2052

The 67HW is our latest addition to the Tricoroll family. It is a sinking minnow with a flat body and a pronounced wob'n'roll action on both slow and fast retrieves. Designed for fishing medium to large rivers for quality trout. The lure will hold its depth in deep and powerful flows but can also be worked over shallow riffles. When cast ¾ downstream the force of the flow is enough to gently oscillate the lure. You can let the lure drift naturally with your rod high and follow it downstream giving the odd lift on the rod tip to speed the lure up. Vary this with a more classic twitch and jerk retrieve to provoke a wary trout into having a chew on something different.

VIBRATION

This is the latest in the TN lipless series. The TRIGON features an oversized raindrop shaped weight that can be attached to its lip. This adds weight for distance casting and allows the lure to be fished deep and sink fast. Particularly useful when the fish are hugging the bottom or are posted too deep for normal plugs to reach. Perfectly dimensioned for ultra-slow bottom fishing but has all the same great characteristics as other TN lures so can equally be fished fast and straight or with more jerky saw-teeth type retrieves. The rattle system gives off attractive deep vibrations typical of all TN lures. Available in 60 and 70mm lengths.

GLOSSY SHAD & FLICK SHAKE

GLOSSY SHAD 3,8"

7979 / J2110

The new Glossy Shad 3.8» is the perfect bait for difficult clear water conditions. The realism built into this lure is simply breathtaking! It looks for all the world like a small fresh fry fish! Tiny sequins have been injected into the lightly painted body to give a transparent feel to the bait and reflect attractively in different light conditions. Two fixed eyes complete the impression of total realism.

FLICK SHAKE 4.8"

6107 / J2110

The flickshake is one soft lure that fish cannot resist for long because it is an imitation of that most natural of baits - the lobworm! Hooked straight through the middle and fished on a downshot rig or with a jig head the naturally curved body of this lure will waft gently when stopped and respond to the slightest twitch on the line. Fantastic fished on wacky rigs, the Flickshake is a real fishing machine when it comes to perch, zander and black bass but will also catch trout, chub and even barbel ... in fact any fish that will have a go at a worm!

SCISSOR COMB

SCISSOR COMB 3"

8840 / J2110

This creature is a work of art in terms of mobility and sleekness. Testament indeed to the skill of Japanese mould makers. A ribbed body with loads of tiny legs are the key to this lively softbait. Try it on a drop shot or Carolina rig to tempt even the most moody of zander with subtle but continuous rod movements. Set up on a light Texas or microjig the lure will vibrate of its own accord as it drops through the water and once on the bottom it will swing for several seconds after every animation. Bass and perch won't resist this lure for long!

SCISSOR COMB 3,8"

2673 / J2110

The Scissor Comb is a distillation of all the elements likely to arouse the interest of a predator. Ultra mobile appendages, ribbed body for extra fluidity, worm shape, flavoured rubber and realistic colour schemes... This lure has all the ingredients to provoke a look from the most apathetic and wary predators. Great fished on Carolina rigs, for drop shotting, split shot rigs, on a jig head etc. The Scissor comb is the ultimate irresistible morsel and stays attractive even when completely still. This will get you out of jail when the fish are totally disinterested and conditions really tough.

RHYTHM WAVE

The Rhythm Wave is a swimbait-style soft lure with a slender body profile that stays perfectly balanced whilst giving off a dynamic, attractive curving swimming action. The tail is designed to emit rhythmical pulses with metronome like regularity as its name suggests! This versatile lure lends itself to different styles of rigging (jig heads, Wide Gape Offset hooking on Texas or Weightless rigs, as a trailer bait on chatterbaits or spinnerbaits...) The long stomach helps when hooking Texas Wide Gape Offset hooks and the slot on the upper section is designed for housing the hook point to keep it clear of weeds and help centre the lure. The rubber has been impregnated to the core with a special prawn attractor. The Rhythm Wave can be used on straight retrieves, power traction and vertical styles of fishing and the three available sizes will appeal to all freshwater and smaller sea predators!

TEARO

The TEARO spoon is extremely versatile and can be worked at any speed. The teardrop body shape displaces plenty of water and generates a pronounced tight wobble. The head angle starts the lure working the moment it hits the water. Developed originally in Japan for reservoir trout, TEARO has all the attributes needed to attract trout, chub and perch in calmer flows. Available in three sizes.

APEED

The APEED spoon gets its name from a mash up of APPEAL and SPEED. Developed in Japan for reservoir trout, the lure has proven its worth on European wild trout in small to medium rivers. Try swapping between the 3 sizes to cover different conditions: 2.3g = for close range shallow fishing and when fishare sluggish and wary. 2.7g = standard weight - versatile and covers most conditions. 3.3g = for fishing further out and deeper-ideal when fish are feedingaggressively.

T-GROVEL

The T-GROVEL spoon has a chunky compact design. The head is curved to keep the head up and limit hook pulls on very slow retrieves. The way any spoon drops through the water is key to triggering takes. The V shape along the body makes for a slow, discrete descent that triggers takes from wary fish. The lure has been developed for reservoir trout fishing in Japan but is perfect for trout fishing on small to medium sized rivers even in deeper sections. Available in 3 sizes.

NATIVE

The NATIVE spoon has an unusually wide swimming range but does so very discretely. The lure wobbles enticingly on the drop, often provoking near instant takes from trout holed up on far bank snags. This is the perfect lure for fishing against structures and other fish holding features. The slender and slightly rounded profile of the NATIVE makes it ideal for small to medium rivers particularly on slower moving sections. Great also on reservoirs. Available in 3 sizes.

STREAM ROLLER

STREAM ROLLER 4G

8094 / J2081

This is the latest must have micro spinner for perch, all trout and salmon anglers. The latest lure technology has been used to create the ultimate river spinner. Bismuth-Tin weights make the lure easy to cast and ultra-stable in the water. The blade turns with the slightest flow without ever causing line spin and gives off strong vibrations that allow you to work the lure very slowly through fish holding pools. Fished free-falling style will provoke reaction bites from perch, chub and zander along quaysides and other urban structures.

BIG BAIT

DEXTER JERK 70

8086 / J2066

At last here is the new small brother in the Dexter family! A bait you can switch to when you need a more delicate approach to your jerk fishing. This 70 version is a real versatile lure and can be used anywhere as its size and shape imitates a wide spectrum of prey fish. Fishability is a key feature as the Dexter jerk 70 is easy to fish even for beginners. Vary your retrieves with slow pulls, pauses and jerks or even fished walking the dog style. You will quickly work out which way the fish want it on any given day. The lure is dense and sinks quickly allowing you work through the various layers of the water column rapidly.

DEXTER JERK 120

8087 / J2066

Dexter Jerk is fast becoming a name synonymous with big pike right across Europe. And with good reason! This new 120 version will quickly join its bigger brother in notching up impressive big pike catches. These lures are easy to fish with and beginner or expert can quickly vary presentations with slow draws, quick pulls, walking the dog retrieves under the surface. It will not take you long to work out exactly how the fish want the lure presented!

CRAZY CRUSHER 14G

1533 / J2071

New 14g version of the Crazy Crusher designed for shallow water fishing. The exquisitely detailed head is lead free being made from Bismuth-Tin and preceded with a 45° metal lip that will butt into any snags. Coupled with the vibrant silicone skirt the lip adds energy to the swimming action and starts working the second the lure hits the water. The 14g lure is fitted with the same anti-snag system as the bigger 21g version. Designed principally as a pike lure the Crazy Crusher will also select bigger perch and black bass.

CRAZY CRUSHER 21G

3179 / J2071

The Crazzy Crusher 21G is a chatterbait designed with meticulous attention to detail. The intricate head in Bismuth Tin (lead free) is preceded by an articulated 45 degree blade that allows the bait to bump round snags and gives off attractive vibrations. A silicone skirt adds volume to the lure that starts vibrating as soon as it touches the water. The design team have added a clever wire lug that allows you to attach the hook to the head with a bit of silicone tubing to keep it clear of snags. Designed mainly as a pike bait but big black bass, perch, zander and even catfish have fallen for its charms.

CRUSHER 14G

3182 / J2071

The 14g Crusher spinnerbait has all the technical attributes of an all year round lure. The double Willow and Colorado blades are mounted on a wire stem that accentuates their movement and starts working the moment the lure hits the water. The non-loaded head is made from eco-friendly Bismuth Tin. The lure has a unique shape and a low centre of gravity that is stable on the fastest retrieves and well balanced when free falling through weedy areas. The Crusher can be summarised as a true 4 season's fish catching machine!

CRUSHER 1 1/40Z

7250 / J2071

The Crusher is a top class spinnerbait designed with pike in mind but will also attract other fish like big black bass or perch. Two willow blades are mounted on a 1mm stem tough enough to stand up to the most aggressive big fish attacks. The Willow blades give off pulsating vibrations and work from the moment the lure hits the water. The head design guarantees a very stable action particularly when fishing off ledges freefalling style or for working back through weedbeds. The Crusher has all the element needed to be a genuine 4-seasons lure!

TERMINAL TACKLE

DEXTER TIP UP HEAD

1203 / J2068

Tip up loaded head with hook: Stand up loaded heads like the DEXTERTIP UP HEAD were invented to exaggerate the rolling action of a lure making their swimming action even more seductive. The back plate has been designed to fit seamlessly with the flat front of a Dexter Shad. Available in 5 sizes from 5 to 13g. Weights marked on each head. Tip Up Loaded Head with spring: Tip-Up heads feature the ingenious screw in weight system that fits any type of soft bait. The metal stem helps you to centre lures perfectly and the spiral attachment gives a solid hold on the lure. The specific shape of these heads exaggerate the rolling action of a lure making their swimming action even more seductive. The back plate fits seamlessly with the flat front of a Dexter Shad. We recommend the following two set ups:

1) The top ring is used to attach your reel line or trace and the bottom ring used for rigging through the stomach with a DEXTER SHAD TIP UP SCREW RIG.

2) The top ring can also be used as the solid ring for attaching a Scandinavian type DEXTER SHAD SOLID SHARP SHOOTER RIG with your reel line or trace then fixed onto the shooter rig. The bottom ring can be used for adding a metal blade on a rolling swivel.

Using one of these two options you can be sure of finding the right way to rig DEXTER SHADS or DEXTER ELLS.

Available in 9 sizes from 3 to 50 g. Weights marked on each head.

DEXTER TIP UP SCREW RIG

1208 / J2068

Marry a DEXTERTIP UP SCREW RIG with a TIP UP loaded head and you have the perfect rig for a 200 or 250 Dexter Shad. Two triple hooks are fitted to the stomach section of the lure and are linked together by a steel cable. This double hook system works particularly well for pike that often attack their prey from below. The hooks have another advantage in that they separate from the lure when fish are fighting which helps your lures last longer. With the steel cord, 50lb test split rings and top quality triples this rig is designed to withstand the most aggressive fight from big, angry fish!

DEXTER SOLID SHARP SHOOTER RIG-SHAD

1213 / J2068

The DEXTER SOLID SHARP SHOOTER RIG teamed up with a Tip Up loaded head is the perfect rig for Dexter Shads when pike are having a proper go at your lures and targeting the head. Two triple hooks on the side of the head and the other $\frac{3}{4}$ back on the dorsal. The hooks can move freely and are joined to your trace by a solid ring. Designed to withstand the most savage of takes.

DEXTER SOLID SHARP SHOOTER RIG-SHAD 250 37302	1/0

DEXTER TIP UP CLEAR WATER RIG

1346 / J2068

This is a versatile rig that is deadly on lakes or flowing water. It fixes to the front third of soft baits like DEXTER or NITRO SHADS. The rolling swivel enables the triple hook to move freely and avoids hook pulls as fish turn round on themselves.

DEXTER SHAD 90

1028 / J2067

This latest 9cm addition to the Dexter Shad range is great for anglers looking for perch and zander and wanting a smaller version of their favourite soft bait. Like all the rest of the range the rubber is tough yet supple and flavoured to the core with our Nitro Booster flavouring. Fished as a cranking shad or with saw tooth straight retrieves the lure will start working with the slightest impulsion. Great for vertical fishing. The Dexter Shad 90 is the ideal size for a trailer on spinner or chatter baits!

At 15cm long this smaller Dexter Shad is perfect for freshwater fishing as a cranking shad or as a vertical lure. Impregnated to the core with shellfish «Nitro Booster» attractant. The rubber used is soft enough to be taken confidently by fish but strong enough to resist being shredded by teeth even of sea fish. The body shape gives a distinct rolling movement to the lure and the soft tail moves at the slightest nudge on the line. The lure gives off strong vibrations in the water that his find irresistible. The proof is the number of fish each year that are banked on Dexter Shads!

At 20cm long this Dexter Shad is the ideal size for vertical fishing as a cranking shad. Flavoured to the core with "Nitro Booster", our famous shellfish attractant. The materials used are soft so fish can swallow the bait easily but also tough enough to resist being chewed by different attacking fish, even sea species! The body shape gives a pronounced rolling action and the large soft tail works at the slightest touch of the rod. Few predators will resist its charms and this is borne out by the consistent results achieved by this lure.

Developed to target specimen pike the dexter Shad is a very realistic looking soft lure flavoured with our trademark shellfish attractant Nitro Nooster. The materials used are very supple and soft yet tough enough to be skipped round overhanging foliage and stand up to the teeth of big fish. The body shape of the Dexter gives off a pronounced rolling action with any form of loaded head. Particularly attractive is the extra large tail that generates strong vibrations on the slightest of movements. Dexter's' seductive action is most effective on linear retrieves and for working round overhanging vegetation and sunken trees where fish will be stationed in gaps between branches.

DEXTER SHAD UV

Our great new « hand poured » Dexter Shad range has been developed in close collaboration with Kay Steinwerth, fishing guide and Team Illex member known for his experience tracking big pike and zander based at Rungen in Germany. He is famous for using lure colours that work on the ultra violet spectrum. This range of Dexter Shad UV baits are characterised firstly by their extremely tender rubber and a range of 6 colours developed for very precise water conditions: Glowing specialist= Highly coloured water. UV bomb = Coloured waters and morning and evening sessions. Zander special = Lightly coloured waters particularly tinged green. Mototroil special = Lightly coloured green tinged waters in bright sunny conditions. Salt&Pepper Green Belly= Clear and slightly coloured water. Blue&white Orange Belly = Sunny conditions and coloured waters (green or brown tinged). Hot Tiger = Lightly coloured water + clear water, morning and evening. Excellent colour for pike, perch and zander. Hot Orange = heavily coloured water + slightly coloured water, morning and evening. Excellent colour for pike, perch, zander and meagre. The hand pouring process allows us to mix two or three colours and add or omit reflective glitter whilst creating layers of contrasting colours that work at different ends of the ultraviolet spectrum. Flavoured to the core with our famous "Nitro Booster" attractant.

DEXTER EEL

As its name suggests the Dexter Eel is an eel shaped bait designed to appeal to big predators. Certain characteristics like the soft rubber material impregnated with "Nitro Booster" are the same as for our Dexter Shad. But the Dexter Eel has a unique swimming action that makes it a good change bait from classic big shad type lures. The Eel gives of low frequency vibrations that are easily picked up by predators but don't arouse suspicion. On straight retrieves the bait can be cranked rapidly without stopping for quick prospection then slowed down and worked more carefully over more promising fish holding areas. This lure will often get a take from older fish that look on it as a large and easy meal. Originally designed for big pike but now proving its worth as a catfish catcher as well!

DEXTER EEL 90

1029 / J2067

A 9cm small version of our famous Dexter Eel. Classic eel shape, low frequency vibrations, ultra soft yet resistant rubber and impregnated to the core with our Nitro Booster attractant. This small size is perfect for triggering attacks from all predators but especially perch, black bass and zander. Work the baits fast or slow, linear or vertical- the choice is yours! Teamed up with a Texan rig the lure can be worked over the surface of dense weedbeds or for quickly prospecting round snags like dead trees. The Dexter Eel 90 is great as a trailer on spinner or chatter baits.

WOODLOUSE

GAMBIT WOODLOUSE 1,18"

5483 / J212

The Woodlouse is a supple floating lure shaped like an insect designed to target smaller predators like bass, perch, asp, trout and chub. The body has a hollow cavity that give off vibrations in the water. The whole bait is designed to imitate as closely as possible a natural insect. Fit this lure on to a Finesse $Down\,Shot\,or\,Finesse\,Guard\,no.\,3\,hook\,hooking\,it\,though\,the\,head\,between\,the\,two\,antennas.$ This way the lure will stay balanced. Once you let the bait go in the flow it can be worked with subtle shakes of the rod just slightly agitating the bait. The excitement when you watch a fish take it off the surface is sure to get your heart racing!

MAGIC SLIM SHAD

The MAGIC SLIM SHAD is ultra-realistic and responds to the slightest movement. The tail section gives a particularly fluid and graceful swimming action. Being highly mobile the lure is great when targeting river zander with slow and controlled straight or vertical retrieves. The SLIM SHAD is available in 4 sizes: 2.5", 3", 4", 5" (6, 7.5, 10 and 12 cm) covering the range of prey fish sought by most predators. The small sizes in particular are great for perch, trout and wrasse. The finish rivals any other shad bait on the market with great care paid to details like eyes and gills. To complete the package the SLIM SHAD is impregnated with a powerful squid attractant.

MAGIC FAT SHAD

The MAGIC FAT SHAD has a chunky round profile that displaces plenty of water as it moves arousing the curiosity of predators from some distance away. The shape is versatile and can be fished on Texan rigs round weed-beds or as a surface buzzing bait. With a loaded head the strong rolling action is great for focusing actively feeding predators. The FAT SHAD is available in 4 sizes: 2.5", 3", 4", 5" (6, 7.5,10 and 12 cm) which covers the range of prey fish sought by most predators. The finish rivals any other shad bait on the market with great care paid to details like eyes and gills. To guarantee positive takes each FAT SHAD is impregnated with a powerful squid attractant.

HOW TO RIG A NITRO SPRAT SHAD USING THE PUSH 2 LOCK SYSTEM?

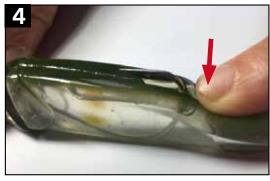

Insert the opened wire clasp into the upper hole by lowering the lure body. Next close the body so it sits flush with the head.

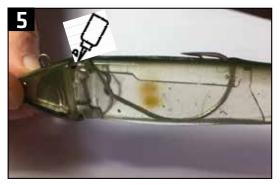

Slide the hook along the Push 2 Lock wire to the start of the bend. $\label{eq:lock}$

Once the hook is attached push the wire to lock it securely in the clasp.

Use the marker to get your hook in exactly the right spot.

Place a drop of glue into the cavity on the head to secure the whole rig.

NITRO SPRAT SHAD

NITRO SPRAT SHAD 90 + HEAD 10G

0170 / J2111

The Nitro Sprat Shad 90 as its name suggests is a shad type lure designed for sea bass fishing. It is extremely supple and looks ultra-realistic with a lifelike swimming action and strong vibrations. The rubber has been flavoured to the core with our famous shellfish "Nitro Booster" attractant. Our ingenious Push 2 Lock system means this bait can be mounted quickly on to a Nitro Sprat Head 90. The Push 2 Lock system houses an articulated Texan hook inside the body so the lure can be worked through snags and weedbeds without catching. The Nitro Sprat 90 head is lead free and made from zinc so kinder to the environment. As well as sea bass the Nitro Sprat 90 is great for perch and zander fishing. Don't hesitate to add more "Nitro Booster" cream to reinforce the attractiveness of your bait.

NITRO SPRAT SHAD 120 + HEAD 10G

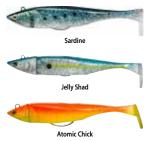

9057 / J2111

The Nitro Sprat Shad is a shad type softbait developed for sea bass fishing. The lure is soft and looks very realistic with a natural swimming action that emits plenty of strong and distinctive vibrations. The bait is impregnated right through with shellfish Nitro Booster. The push 2 lock system with an articulated Texan hook can be attached across the side of the lure to let you explore dense weedbeds or fish through snaggy branches. The Nitro Sprat Head is a loaded head in resin with an internal lead mass that gives you greater casting distance and allows ultra-slow retrieves through likely fish holding spots. The Nitro Sprat Shad is equally as good fished in a straight linear style for zander or perch! Don't hesitate to add some cream Nitro Booster cream whilst fishing to make your lures even more attractive!

NITRO SPRAT SLIM SHAD

The NITRO SPRAT SLIM SHAD 140 is the eel shaped version of our famous Nitro Sprat Shad. The long shape has been specially designed for bass, pollock and meagre (maigre). When these fish are fixated with sandeels the oscillations and realistic eel profile of this lure come into their own. The rubber is extremely supple and it swims just like a real eel. Flavoured to the core with our famous shellfish Nitro Booster attractant. Thanks to the new Push2Lock system this lure can be easily mounted on a Nitro Sprat 90 head. The Push2Lock system comes with a Texan hook that is hidden in the lure so you can work it safely through snaggy areas. The Nitro Sprat 90 head is lead free and made from eco-friendly zinc. Don't hesitate to flavour your lure by adding Nitro Booster cream for that extra edge!

NITRO SHAD

NITRO SHAD HEAD

6276 / J220

The ILLEX Nitro Shad head has been developed specifically for using with Nitro Shad lures. Fish-like in appearance, the head's centre of gravity is slightly loaded downwards giving a gliding action on the way down and allowing the lure to rest on the bottom if wished. Perfect for naturally presenting Nitro Shad's or any other strongly vibrating soft lure. Available in 9 different weights.

NITRO SHAD 90

7243 / J2111

This latest Nitro Shad is sure to become every bit as popular as the rest of the range! Developed for bass fishing, this realistic looking lure perfectly resembles a small prey fish. The small body size and supple viscosity make the Nitro Squad 90 perfect for working up in the water. We recommend that you use our leaded Nitro Squad heads between 7 and 21g coupled with an Ashura Element Rider S 210M Stalking Special rod and fish the Nitro Shad 90 using either light traction or linear retrieves. This little shad with its pronounced rolling action is also deadly for perch and zander. The lure is flavoured with our famous Nitro Booster. Do not hesitate to add some Nitro Booster cream to the lure for that extra fish attracting edge!

NITRO SHAD 120

6271 / J2111

The Nitro Shad is first and foremost a lure for hunting bass traction-style, with the bait touching the bottom. The lure has already won many Labrax Cup competitions. The Nitro Shad can also be used very effectively to fish for zander and pike either jigged or worked straight back. Flavoured with Nitro Booster shellfish attractant. This lure is best fished in conjunction with a Nitro Shad Head. The materials used in this lure give off deep resonance and strong vibrations as it is worked through the water. Do not hesitate to add more Nitro Booster in either cream or liquid form to enhance the lures effectiveness whilst fishing!

The Nitro Shad is first and foremost a lure for hunting bass traction-style, with the bait touching the bottom. The lure has already won many Labrax Cup competitions. The Nitro Shad can also be used very effectively to fish for zander and pike either jigged or worked straight back. Flavoured with Nitro Booster shellfish attractant. This lure is best fished in conjunction with a Nitro Shad Head. The materials used in this lure give off deep resonance and strong vibrations as it is worked through the water. Do not hesitate to add more Nitro Booster in either cream or liquid form to enhance the lures effectiveness whilst fishing!

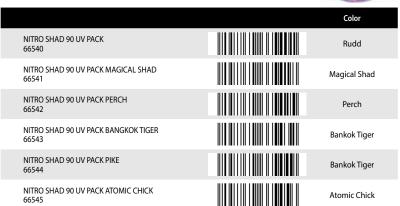

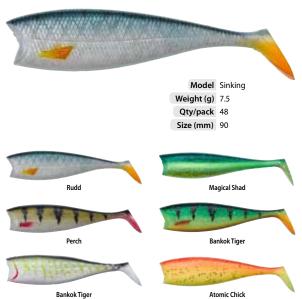

NITRO SHAD UV

The fish catching properties of our NITRO SHAD baits are legendary both in freshwater and sea fishing circles. This year the range is further boosted by the addition of a range of new colours working in the UV (Ultra Violet) spectrum. These new colours have been specifically developed for coloured waters and/or low light levels. Their versatility in low light conditions has been proved time and again by our teams of field testers and competition anglers.

NITRO SHAD MAGNUM

NITRO SHAD 250 + HEAD 250G

1237 / J2111

Our famous Nitro Shad is now available in a magnum size! With all the same great features as its little brothers, this magnum shad measures a whopping 24cm. teamed up with a 250g Nitro Head for a combined weight of 390 grams. Designed specifically for extreme sea fishing. The rubber is stiff and tough with a large tail that gives a powerful natural swimming action with a definite rolling movement and gives off plenty of vibrations even when worked back slowly. Can be fished vertically under your boat, linear, drifting or trolled. Can also be used for heavy cast and retrieve. The Nitro Shad Magnum is a must have lure for the travelling angler whether targeting big Scandinavian cod and pollock, Atlantic red tuna or tacking the Med. Not forgetting tropical travel after big groupers, for example...

NITRO SLIM SHAD

NITRO SLIM SHAD HEAD

7245 / J220

This range of loaded jig heads has been developed specifically for the Nitro Slim Shad and will work wonders with any eel-like lure. The shape of the head itself resembles a fish. In the water this realism is further enhanced by the centre of gravity which gives your Nitro Slim Shad lure a natural drop through the water layers and a very stable settling on the bottom! Available in 5 sizes.

NITRO SLIM SHAD 180

7242 / J2111

As its name suggests this is the slimline version of the famous Nitro Shad! This long, slim version has been developed specifically for bass and pollock fishing. When these two predators are chasing sand eels they can't resist the deep oscillations given off by the Slim Shad and its ultra realistic look! We recommend you use our Nitro Slim Shad heads between 28 and 70 grams married with a rod like the Ashura Element Rider S 225 H which has the muscle to cope with vigorous traction and vertical retrieves. The lure has been flavoured with our legendary shellfish attractant Nitro Booster and can be further boosted whilst fishing simply by adding some Nitro Booster Cream!

RUNNER BLADE & BLUE BLASTER

RUNNER BLADE

1238 / J2063

The Runner Blade is a new type of metal vibration lure that has a complex yet subtle swimming attitude that rivals with the best minnow plugs. This long blade bait has a casting distance exceeding 60 m, which is a major asset when you want to keep some distance from the fish and for quickly prospecting extensive areas. The slender profile is radically different from classic blade baits and emits strong vibrations without pulling excessively on the rod (Low-Stress Concept). The Runner Blade is outstanding with a simple fast and straight retrieve using the forward eye (swimming depth from 3 m to 5 m), or with a slower stop-and-go retrieve using the rear eye (swimming depth from 5 m to 10 m). Great for all kind of vertical fishing as well. This is a must-have lure for power fishing that can be used in any weather conditions. Great as a change lure with soft baits, the Runner Blade will trigger adrenalin-pumping savage reaction strikes!

BLUE BLASTER 75

1284 / J2063

The Blue Blaster is a compact casting jig made from solid tungsten-bismuth. Tough enough to withstand repeated attacks from the toughest predators in the world! This lure casts like a dream despite its relatively small size and is great for reaching long range hunting fish, notably tuna when chasing anchovy shoals. The lure features a flat stomach section that keeps it stable on fast retrieves but still lets you waft it slowly through likely killing zones. The asymmetrical fixing point generates an attractive rolling action as soon as it hits the water. The lure is designed to sink flat and the incurved sides reflect provocative flashes. A lot of care has gone into the finish and the detail around the eyes, the mouth and the gills finished this lure off perfectly.

FIGHTER JIG

A classic jig shape that hides a surprisingly versatile lure. The FIGHTER JIG lends itself to a wide variety of techniques. Responds well to wide slides and back sliding on the drop. Fished classic jigging style the lure is very mobile and highly reflective which is very attractive to mid water species. Finally as a casting jig the FIGHTER JIG performs well. Great for fishing at long range with medium to fast retrieves. The realistic body shape is supported by great details around the eyes and gills.

MICRO SLOW LAZY JIG

This is a small compact metal jig available in 6 sizes. The Micro Slow Lazy jig can be used as an offshore casting jig or from the shore itself. Casts well even into a wind. Perfect for targeting any midwater/surface species feeding on shoals of prey fish like anchovies or fry. Great for sea bream, mackerel and bass. The Micro Slow Lazy jig also works wonders freshwater fishing for perch or zander either vertically or traction style.

SLOW LAZY JIG

If you want a versatile slow jig then the SLOW LAZY JIG is for you! Works just as well on the drop as coming up. On the way down the jig has a lazy wobbling action interrupted by sudden twitches and sideways darts generated by the large asymmetrical body shape. When being more actively fished the SLOW LAZY JIG is surprisingly responsive for a lure of its size and is easy to pitch and slide with broad sideways sweeps. Two great ways to work this jig are slow pitch jigging and long falls. The jigs are very well finished with solid paintwork and a lot of attention to detail around the eyes and gills and are proven baits for a host of sea predators whether in the Atlantic or Med.

OCEAN SKIP

Eging lures designed specifically for targeting celaphods (clams, squid and octopuses. Designed specifically for "bichi bachi" techniques from the shore (Ocean skip 3.25 – silent version) or from a boat (3.5 with the echo location system that is a proven trigger to feed). The body shape has been carefully designed to respond positively to twitching and to glide attractively on descents which can often provoke takes from the most reluctant of squid. The colours, the attention to detail and the overall finish all reflect the highest quality of Japanese workmanship. The lures will stand repeated captures and stay sharp as well. These are destined to be your new reference lures for eging.

OCEAN SKIP 3.25

1465 / J2069

Eging lures designed specifically for targeting celaphods (clams, squid and octopuses. DOCK JIGS SET

0189 / J212

The Dock Jig has been developed as the ultimate tool for discerning street anglers and is already proving its worth in top level competitions. The Dock Jig is at the cutting edge of lure research and technology and will get you takes from all our species predatory fsih. Comes in a range of finishes that have been painstakingly created to mimic prey fish and fool wary and difficult fish. The lure has a silicone skirt which can be adjusted to three different lengths that adds volume and fluidity to the mobile yet subtle gliding action. Our unique jig head is made from non-toxic tungsten and is covered in micro-bobbles designed to let you read the bottom better and to disturb the sediment giving of a slight cloud as it scrapes along. Finally the Dock jig has a "Stand-Up" system built into the design that allows the lure to sit at a perfect 45° angle on the bottom by lowering the centre of gravity to get the perfect balance. This lure is a technical masterpiece, finished with painstaking attention to detail and perfect for all delicate and difficult fishing situations.

JOHN WEIGHT

The John weight is a handy accessory that lets you quickly change the swimming depth of a lure. The exploding grenade shape and the grid square shell helps hold the steel stem in place so you don't lose the weight either casting, working the lure or when playing a fish. Simply attach the John weight as close to the centre of gravity of the lure as you can and you can instantly fish deeper. Top tip- the John weight also makes a great lead for drop shot fishing.
