ACCESSORIES	50

This icon indicates an adjustable (16 different casting settings) magnetic brake is built in to the reel. The magnetic brake system allows you to instantly adjust the braking effect on the spool using the turn dial. Turn clockwise and the brake effect is increased by moving the magnets closer to the spool. Turn anti-clockwise and the magnets move away from the spool reducing braking and speeding up the spool for long range casting. The only current reel in the Penn program with an adjustable magnetic brake is the MAG2 series.

This icon indicates the reel is designed for use with braid lines. Braided lines, unlike mono, have no stretch resulting in greater direct reel pressures. For that reason not every reel on the market is suitable for use with braided lines. The braid ready icon indicates a Penn reel specifically designed for use with braided lines.

Penn Dura-Drag™ was developed in a joint effort between Penn engineers and a leading US Auto Manufacturer supplier, and is based on the same material used in the transmissions of high-performance racing cars. Dura-Drag™ is tough and durable. It endures frequent and heavy use, plus can withstand the high levels of heat generated during big game battles. Dura-Drag™ is pre-treated with a special formula developed by Penn Engineers through extensive testing and research. The combination of new drag material and special formula gives anglers the toughest, smoothest, longest-lasting drag ever developed – a drag so revolutionary it has been trademarked Dura-Drag™.

Sealed from heavy seas and spray, protecting key internal parts.

When you see this icon, the body of the conventional or spinning reel incorporates a metal body, and in the case of conventional reels also metal side plates. This ensures precise gear alignment under heavy retrieve loads.

The Infinite Anti Reverse icon stands for the elimination of back play on the rotor when instantly setting the hook. This effect is created by adding a one way bearing in the reel. All of Penn's spinning reels are delivered with IAR, as are most of the conventional reels.

This icon, displayed on the packaging or website, indicates a reel with perfect oscillation to give an extremely even line lay. This icon relates to the Spinfisher, Atlantis and Slammer reel series.

Rigid Resin 30 - built with 30% carbon fiber our new Rigid Resin material is the perfect combination of strength and weight. Rigid like a metal...light as carbon fiber.

HT-100 is a carbon fiber fabric that's laminated on fiberglass to provide stiffness in large sheets, then cut into strips. The name HT-100 is derived as follows; "HT" stands for High Tech, and the "100" signifies that, during original testing, the equivalent of 100 miles of fishing line was taken against the drag of a reel with no significant change to the drag washers. Inferior washers would not have lasted 20% of that time.

SLS3 construction uses inner and outer spiral wrap layers of carbon fiber to sandwich middle layers of alternating longitudinal carbon and glass. The spiral wraps maintain a round cross section in the blank when under load which helps the blank handle higher loads. The middle layers of unidirectional carbon and glass create the backbone of the rod by utilizing the strength of glass combined with the lightweight of the carbon fiber to deliver a strong, balanced, and thin rod blank.

This icon identifies a reel with the visible sides of the spool clearly marked with line capacity indicator rings. These rings are marked at 1/3, 2/3 and full line capacity. This new feature is only found on newly introduced reels such as the Squall, TRQ 2G, MAG2 and Fathom series.

A Live Spindle is a unique feature! Both the spool and spindle rotate independently from the drive train and frame. This minimizes friction as the spool revolves during free spool, plus eliminates binding during heavy retrieve. This high performance feature is found on some of our new reels like the MAG2, TRQ2G, Squall LD and the Fathom SD.

This feature eliminates any accidental changes to the drag settings. You simply set the drag in the chosen position, then turn the button on the drag handle to secure that setting. This feature is found on the Internationals and TRQ reels.

The Quick Shift™ system is a specially designed 2-speed system that switches easily into high or low gear. This feature is available on the 2-speed version of the Internationals, GS Performance and the Graph Lite LD.

Versa handle system allows the angler to choose how long the handle should be in less than a minute, tools are included with each reel.

Gear box and drag system are fully sealed to protect water intrusion

This icon shows that this spool is suitable for use with Berkley Superlines. The difference between standard spools and Superline spools is that the Superline version is fitted with a rubber gasket in the middle that prevents the Superline from slipping under pressure. These spools are available on the Atlantis and Battle reels.

This indicates switchblade harness lugs are fitted to a conventional reel. These fit flush in the tops of the reel side-plates when not required, but are easily flipped up to position with the tip of your finger when securing the reel to a shoulder harness. This feature is available on the TRQ 2G and the Squall LD.

Penn's Techno-Balanced™ rotor is designed to ensure a very smooth retrieve. Except for the TRQ spinning reel, all the spinning reels in the program have this feature.

The Ultimate Adjustable Clicker is only available on the International V series and provides the widest range of bait clicker settings ever, just by turning the knob.

The Versa-Drag™ is a patented drag system with HT-100 washers. This allows the angler to pre-determine a targeted drag range by rearranging the sequence of keyed metal washers and tabbed friction washers. The Penn Versa-Drag™ provides a tremendous drag range regardless of what line-class and drag settings you are fishing. You can see

below what each setting does. This great feature is unique to Penn and available on the TRQ LD, TRQ SD, Fathom, Squall SD, and GS Performance reels.

Gear box and drag system are sealed to keep out water and other elements

Extreme range, endless adjustment, and a large diameter drag knob so you can easily crank down to max drag

The Live Liner ® system was built for fishing livebait. Simply pull the switch back and the front drag disengages and runs off the rear drag.

The CNC Gear™ is machined from premium metals which provide a durable yet smooth gear train created by the precision of CNC technology.

## International VI - VSX

NEW

The PENN International VI series is designed and manufactured in the USA of domestic and imported components. Precision machined from high-strength, lightweight, aircraft grade aluminum in our Philadelphia machining center. Our experienced crew has been designing and producing durable, high-quality reels in this facility since 1932. The fully machined stainless steel gear train is the biggest in the business. The Dura-Drag system results in a smoother start up and virtually eliminates hesitation, even under extreme drag settings.

- Machined and anodized aluminum body and sideplates
- Stainless steel main and pinion gears
- Quick-Shift II 2-speed system
- Dura-Drag system
- Versa-Strike Adjustable Strike stop
- Double-dog ratchet anti-reverse
- Line Capacity Rings
- Made in the USA of domestic and imported components

## Squall Lever Drag 2 Speed

- Lightweight graphite frame and sideplate
- Stainless steel main and pinion gear
- Quick-Shift TM two-speed system
- Double-dog ratchet anti-reverse
- Forged and aluminium spool
- Dura Drag TM washers to eliminate every hesitation
- 4 Shielded stainless steel ball bearings
- Line Capacity Rings

## Special Senator

The Special Senators feature a higher gear ratio and faster retrieve than standard Senators, but all have a powerful, multi-disc drag system, two stainless steel ball bearings, a manganese-bronze main gear and a precision-machined stainless steel pinion gear. These reels have accounted for more record fish than any other reel over the years, and remain one of the toughest and most durable economically priced reels. Available in sizes 113L2, 114L2, 115L2 and 116L to cover a wide variety of fishing situations throughout the world.

- Machined and anodized aluminum spool
- High-strength marine grade bronze alloy main gear
- HT-100™ drag washers provide smooth drag under heavy loads
- 2 Shielded stainless steel ball bearings
- Convertible power handle
- Precision-machined stainless steel pinion gear
- Stainless steel frame rings enhances rigidity to prevent "frame-flex"
- Multi-disc star drag system for smooth and consistent drag
- Stainless steel reel stand
- Heavy-duty clicker

## Fathom Level Wind LH

A reel series designed for general fishing and incorporating a stainless steel level-wind system that automatically lays the line evenly on the spool. They offer a gear ratio of 4.3:1 to really pressurise big fish, but have a diecast metal reel frame and side-plates, a forged aluminum spool, plus bronze main and pinion gears, all combining to give total strength and lifting power. These reels also feature a proven HT-100 drag system, four strategically positioned stainless steel ball-bearings to smooth the retrieve and spread overall load. Though ultimately tough, the Fathom is also light in weight and compact in size.

- Full metal body and sideplates
- Marine grade bronze alloy main gear
- Versa Drag TM system with HT-100 washers
- 3+1 Stainless steel bearing system
- Precision machined stainless steel pinion gear
- Stainless steel TiN coated levelwind system
- Left handed

## Fathom Level Wind

The Fathom Level Wind heavy-duty construction and low 4.3:1 gear ratio make it a true workhorse and favorite of charter boat captains and hard fishing anglers. It is designed to handle extreme abuse day-in and day-out so whether you are bottom-fishing or casting live bait, the Fathom will stand up to the hardest fishing conditions.

- Full metal body and sideplates
- Precision machined stainless steel pinion gear
- 3 Shielded stainless steel ball bearings
- Instant anti-reverse bearing with silent back up ratchet
- Stainless steel TiN coated levelwind system
- Marine-grade bronze alloy main gear
- Versa Drag TM system with HT-100 TM washers
- Reversible harness lugs on 40 & 60 sizes

## Fathom Star Drag

Designed with a full diecast metal reel frame and side-plates to minimise any chance of gear torsion under pressure, machine cut, marine grade, bronze main gear meshing with a super tough stainless steel pinion gear, 5 + 1 shielded stainless steel ball-bearings for smoothness of operation, and a Versa-Drag system utilizing HT-100 drag washers for a totally smooth drag. The reels also feature a live spindle giving a fully free floating spool, plus an internally adjustable centrifugal brake for exceptional casting performance.

- Diecast alu minu m fra me and sideplates
- Machine cut marine grade bronze main gear with hardened stainless steel pinion
- Versa Drag TM system with HT-100 washers
- Internally adjustable centrifugal brake system
- 5+1 Shielded stainless steel bearing system
- Instant anti-reverse bearing with silent back up ratchet
- HT-100 drag washers provides smooth drag under heavy pressure
- Line Capacity Rings

## Squall Lever Drag

- Lightweight graphite frame and sideplates
- Forged and machined aluminium spool
- Dura-Drag washers virtually eliminate hesitation, even under extreme drag settings
- Line Capacity Rings
- Stainless steel main and pinion gear
- Ratcheted drag lever prevents "drag creep" caused by hours of trolling and vibrations
- 6 Stainless steel bearing system

## Clash

The Clash features everything one would expect from a legendary fishing tackle manufacture such as PENN. Starting from the inside out, the gear train runs off our Dura-Gear technology which offers a more durable and long lasting gear. 9 sealed bearings keep everything in line and moving freely while an Full Metal Body eliminates twist caused by high drag pressure. Other features include a thick aluminum bail wire, slow oscillation system for superb line management, Line Capacity Rings, and a braid ready spool.

- Full Metal Body
- Techno-Balanced™ rotor
- CNC GEAR™ Technology
- HT-100™ carbon fiber drag washers
- 8 Sealed stainless steel ball bearing
- Instant Anti-Reverse bearing
- Heavy-duty aluminum bail wire
- Braid ready spool
- Line Capacity Rings
- Levelevel Oscillation System

## Conflict II

The PENN Conflict II features stealthy cosmetics, a Lightweight design (our lightest spinning reel ever), and silky smooth HT-100 drag. The RR30 Rigid Resin body and rotor are extremely lightweight and durable. Internally the Conflict II is powered with our CNC Gear Technology, and high quality stainless steel ball bearings. With the Superline Spool no backing is needed because of the rubber gasket that keeps superlines from slipping.

- Rigid Resin RR30 body and rotor
- CNC Gear technology
- 7+1 sealed stainless steel ball bearing system

- HT-100 carbon fiber drag washers
- Superline Spool
- Line Capacity Rings

## Spinfisher V

The Spinfisher series is already for more than 50 years the ultimate workhorse in the PENN range. In 2012 we have launched the new Spinfisher V series, stronger, smoother, a perfect drag system and fully sealed. For the first time Penn introduces the Spinfisher V Liveliner and the biggest reel ever, a size 10500 for extreme line capacity. The HT-100 Slammer Drag is very smooth and provides more pressure than before. Spinfisher V, stronger than ever.

## Spinfisher V LC

Introducing the NEW innovative Spinfisher V Longcast, the right reel for all conditions Match them up with or one of the Regiment Surf rods and hit the beach with confidence. Strength, perfect line lay and superb drag settings make this new addition also suitable for the avid carp angler.

- Full Metal Body
- HT-100 sealed drag system
- Solid oversized aluminum bail wire
- Including deep mono spool + shallow braid spool
- Water tight design
- Corrosion resistance construction
- Slow oscillation
- Line capacity rings
- Rotor brake system
- 5+1 Ball bearings

## Battle II

With the same full metal body and drag system you trust, the NEW Battle II has been engineered to cast further, achieve higher drag pressure and resist corrosion better than ever before . For a perfectly balanced combination we recommend the use of the Battle II with one of our Regiment rods.

- Full metal body
- Oversized solid bail arm
- HT-100 Sealed drag system
- Line capacity rings
- E-coating corrosion resistance design
- 5+1 Sealed ball bearings
- Techno balanced rotor
- Superline spool

## Battle II Longcast

The PENN Battle II Longcast series offers attractive cosmetics, durable design, and silky smooth HT-100 drag as just a few of the many reasons why so many anglers fish this reel. The graphite body construction allows it to maintain precision gear alignment under severe punishment. The Longcast spool and the slow oscillation system provides great linelay and casting distances.

1378282

## Fierce II

The PENN® Fierce II® offers dependability and unparalleled power at an affordable price. Its field-proven oiled-felt drag system is extremely reliable and has the muscle to tame fish. Featuring a Full Metal Body, stainless steel main shaft, thick aluminum bail wire, and braid ready spool the Fierce II was engineered to provide unwavering performance in the roughest conditions.

- Full Metal Body and sideplate keep precise gear alignment under heavy loads
- Machined and anodized aluminum spool
- Stainless steel main shaft
- 4 Shielded stainless steel ball bearings
- Instant Anti-Reverse bearing
- Machined and anodized aluminum handle with soft touch knob

## Pursuit II

The Pursuit II is an upgrade of the successful Pursuit spinning reel. This new series has been given true PENN cosmetics, an improved handle knob, and an updated spool with line capacity rings. High value for money and very versatile, from spinning to deep sea fishing and from saltwater fishing to freshwater fishing.

- Lightweight and corrosion-resistant graphite body
- Line capacity rings
- Machined and anodized aluminum spool
- Improved handle knobs
- 4+1 shielded stainless steel bearing system
- Infinite anti-reverse

## Affinity™ II

The all new PENN® Affinity II Black reel features a strong but lightweight graphite frame with graphite side-plates, a forged and machined Long-stroke aluminium spool with line capacity rings, 6+1 stainless steel shielded ball-bearings for smoothness under heavy retrieve pressure, a powerful but smooth HT-100 carbon fibre drag system, rotor brake, and a manual bale-arm. Built in slow oscillation gives incredible line-lay over the spool for ultra long-range casting performance with both braid and mono lines, plus the reel offers two line clips, and is saltwater resistant to minimise long term corrosion. Ideal for all long distance carp angling.

# RODS

## INTERNATIONAL VI

The PENN International VI rods feature a one-piece tubular construction rod that is ideal for maximum pressure to the fish with a mechanical advantage in favor of the angler. With ideal tapers and quality craftsmanship, International V IGFA rods should be your first choice when looking for an offshore trolling rod. Every International VI IGFA rod is equipped with top quality components including Aftco® Roller Guides, Fuji ring guides, Stuart® Aluminum Butts and reel seats, or slick butts with aluminum gimbals. EVA foregrips give anglers added comfort for long battles and maximize grip against hard pulling fish. Made in the USA of domestic and imported components.

- One-piece tubular glass blank - Contoured EVA grips
- Aftco® roller guides (select models) - Fuji® Deep Press Silicon Nitride Guides (select models)
- Stuart® aluminum reel seat (select models) - Stuart® aluminum straight butt section (select models)
- Stuart® aluminum bent butt section (select models) - Slick butt (select models)
- Aluminum gimbal (select models) - Made in the USA of domestic and imported components

## BATTALION Series

A small range of high quality rods suitable for trolling, drifting and popping. The usage of high quality carbon and components like Fuji and ALPS makes this a perfect range for tropical style fishing. This range is suitable for chasing tuna, leaffish and other species that ask for strong and durable rods.

## Battalion Tuna

NEW

The Battalion boat contains a special blend of high performance carbon, producing an exceptionally lightweight, powerful, slim diameter blank. The tip action is progressive but powerfull in the mid section with a stiff butt, creating a rod with amazing sensitivity for bite detection. Next to that the soft tip makes it very easy to cast small lures at big distances to approach the fish.

- Fuji SIC K-guides
- Fuji Reel Seat
- High Grade Carbon blank
- EVA Handle
- Mixture of 24T/30T carbon blank
- Short butt + Long tip construction

## REGIMENT II Series

The PENN Regiment II rods are a new generation of super light but powerful rods. Engineered to be fished with both mono and braided fishing line and will punish any fish. The new SLS3 blank construction provides a very thin diameter blank which overall makes for a smaller and lighter rod that is more ergonomic.

## RAMPAGE II series

Featuring progressively fast taper actions with exceptional bite detection, and constructed from a special blend of 24-ton carbon, the new Rampage rods are designed to be light in weight, slim in diameter, but deliver maximum casting and fishing performance. Fitted with Fuji rings and a heavy duty but lightweight reel seat, these rods are also supplied in a tough protective carry tube.

## Rampage II Surf

- Shrink Tube handle
- 24 Ton Carbon blank

## SQUADRON II Series

Offering exceptional value for money, the PENN Squadron II Cf series features a modern fast blank action and is designed to achieve high strength in fighting the fish. Due to its short length this rod is ideal for fishing from a boat or belly boat. The thin and sensitive blank make sure you won't miss a bite.

## Flotation Suit

New and improved floatation suit, more comfortable to wear and according to the newest specifications.

Jacket: Four front pockets that can be closed with Velcro. A heavy duty adjustable waist belt. One extra waterproof pocket. Reflective tape on the sleeves. Adjustable inner and outer cuffs. Inner cuff is made out of neoprene for a watertight design. The neoprene closes around the wrist. One inner pocket. The jacket is lined with fleece and keep you warm until -5 Celsius. Including crutch to prevent you loosing the jacket over your head when you fall in the water. Removable and adjustable fleece lined hood.

Brace: Two deep pockets in the front with zippers and a flap, reflective tape and reinforced knees and butt. Lower part of the trousers contain heavy duty zippers and Velcro for a perfect fit.

For longlasting performance we recommend to rinse the suit after usage.

- ISO 12405/6 certificate
- Minimum buoyancy 50N
- 100% PVC coating and lining
- Including buoyancy foam
- Hi Vis reflective tape

- Comfortable to wear
- EN 343 approved
- Marine grade whistle
- Delivered in carrybag
