WORLD RECORD

Yellowfin Tuna from Shore 230 lb (104 kg)

No matter where in the world you fish, you can rely on **WFT KG STRONG** lines. Wether you are spinfishing, deep sea fishing, Big Game fishing... you name it, this product will not let you down! More than 15 World Records have been caught with WFT KG STRONG.

World-renowned angler **DENNIS VERREET** caught this land-based world record tuna on the WFT 51 KG STRONG. He said:

"On average I make around 8000 casts per big tuna hookup and I found that a lot of braids don't last long enough to make the 8000th cast, let alone land the big tuna. I had fished just about every braid on the market before discovering WFT KG STRONG. It has proven its durability and performance over time and has landed impressive World Record fish. It is the braid I trust and it is the only braid I use."

RYOBI SPINNING REELS

SAOBI[®]

Japan – Reel Technology since 1966

The prestigious aluminium die casting specialist has been developing fishing reels for more than 50 years. Reels manufactured to the highest standard which are not only modern in design and they are very reliable whatever the price.

Sustainability and development are huge priorities. New technologies are tested to the max before they go into

production. The RYOBI Drag System is very popular, but RYOBI's new Carbon-Drag-System has surpassed this. The new NCRT material is constructed by pure carbon fiber with polymer. An extremely light and robust torsion free material. It's around 20% lighter, and still maintains its stability. Get a RYOBI Slam Pro in your hands and you will make this conclusion yourself!

SAOBI® PRO

Once again, RYOBI has set new standards in reel engineering! The new RYOBI Slam Pro is fully loaded with Japanese high performance stainless steel ball bearings. The new handle screws directly into the main gear delivering a super smooth performance. One of the lightest reels on the market the body and rotor are made from NCRT Material. It is extremely durable, completely corrosion and impact resistant, in fresh and saltwater conditions.

RYOBI's smooth and precise Carbon Drag System is very impressive.

Sizes 2000 and 3000 includes an ultra-light titanium main shaft. Size 4000 includes a Spool Supporter System including brass captive nut and strong carbon drag

SLFTT PRO 2000 / 3000

Perfect for light and medium spin fishing and the demanding trout angler. It is a very strong and lightweight reel.

CNC Handle

For the NCRT SLAM SLAR reel RYOBI uses all the know-how that the Japanese technology group has to offer. NCRT is a highdensity lightweight polymer-embedded carbon composite. Let it be understood: The "black crumbs" are pure fibers which are grinded in a special mill from Japanese carbonfiber strands. This is the only way to privilege components of a spinning reel with features such as extremely low weight and highest durability.

Weighing about 20% less than a reel made from aluminium or ABS the RYOBI NCRT SLAM is the perfect choice for lightweight spinning rods. But, there is more to the RYOBI NCRT material than that.

It is extremely durable, completely corrosion resistant, UV resistant and impact resistant. The incredibly strong body allows for an incredibly accurate assembly of the precision gear with the closest tolerances, the "heart" of

an incredible running smoothness. The reel is equiped with a titanium main shaft for additional strength and lightness. As of now the RYOBI NCRT SLAM in sizes 1000 through 6000 features the new "Spring Load Anti Reverse System" with a spring-loaded switch that automatically activates the anti-reverse function. A great benefit that enables you to release line without opening the bail, especially when fishing from a drifting boat.

Leadership **WFT** for Success

ULTRA LIGHT CARBON

Try the reel at your tackle shop and let yourself be amazed by its low weight.

RYOBI SPINNING REELS

0

The RYOBI NCRT SLAM 500 + 800 reels are made for all types of ultralight fishing. Wether for trout with the Tremarella rod, bognese fishing or ultralight spinning...

The two SLAM reels weigh only about 160 g due to the carbon/polymer technology. Configuration and performance basically match the larger models.

RYOBI®

The RYOBI 6500 NCRT SLAM FEEDER is the perfect reel for feeder fishing and any other type of fishing that requires long casting distances. The tough power-reel has an optimized spool-lift for a perfect winding contour and unhindered line release for distance casting especially with thin braids.

RYOBI SPINNING REELS

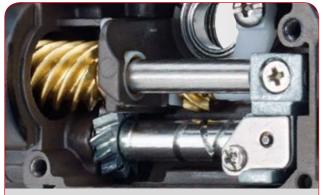

PERFECT LINE LAYOUT WITH VERY THIN LINES

The new RYOBI ZAUBER PRO delivers Japanese technology that simply sets new standards in spinning reel design.

A perfect combination of aluminium and carbon (NCRT) makes this reel perfectly balanced. Japanese stainless steel ball bearings and Japanese wormshaft gear with screw in handle, ensures incredible smooth running.

The RYOBI Carbon-Drag-System is extremely reliable and completely jerk and wear free.

JAPANESE

BALL BEARINGS

RYOBI SPINNING REELS

The ALERT from RYOBI, is a latest generation high-performance reel with a fantastic price / performance ratio.

Due to precise manufacturing techniques, the transmission is flanked by 2 Japanese KSF ball bearings which reduces friction, giving the angler an altogether new experience.

The RYOBI ALERT includes the new screw type CNC folding handle. When fixed to the body this makes the whole package extremely strong and robust without putting additional pressure on the gearbox.

The reel is partly made of metal and has an aluminium spool and drag cap. The reell overall is extremely robust even when under pressure from large powerful fish. The waterproof brake with carbon disc ensures smooth running of the reel when tested.

The RYOBI ALERT is perfect for all kinds of spin fishing with braided and monofilament lines.

VERUM 2000-4000

The RYOBI VERUM gets its power from the aluminium body, in which the precision driving gear is protected from any distortion. To optimize weight, the rotor is made from NCRT carbon fibre and the spool has been made from aluminium. Carbon drag and perfect line lay makes the RYOBI VERUM an ideal reel for light and medium spinning. The spool is designed for use with monofilament ! CNC-machined handle diirectly screwed to the main gears stainless steel bushing with a massive stainless steel thread - a connection as strong as it can be...

VERUM FEEDER 6500

A powerful reel, developed purely for feeder fishing.

Full metal body combined with an NCRT-carbon fibre rotor for torsion-free retrieve under high strain. This reel retrieves 90 cm of line per handle-turn and the 2(!) metal line clips are perfect for any feeder fishing situation.

The handle-arm directly screws-in to the stainless steel gear and provides the VERUM FEEDER 6500 with super smooth and precision retrieve performance. The handle material allows for a firm grip, even with groundbait residue sticking on your hands. A high-precision line management and the large spool head provide the VERUM FEEDER 6500 with excellent distance casting performance, especially when partnered up with our "GLISS SINKING" feeder line.

RYOBI SPINNING REELS

RYOBI® VERUM 20000

Don't want to compromise at the business end? Then this is your reel!

In addition to a massive 6 mm stainless steel main shaft this big-fish-reel has 2 infinite anti-reverse bearings for total reliability under maximum strain.

Equipped with 10 additional stainless steel ball bearings and a stainless steel driveshaft this full metal reel is the right choice for catfish, halibut and tropical big game species.

With 18 kg of drag this spinning reel is among the strongest of its kind. You will be amazed by the smoothness of this powerful "workhorse".

For strength and durability this reel has been designed without a flip bail or anti-reverse - let the drag do its job!

RYOBI SPINNING REELS

ALUMINIUM REEL FOR

HARSH CONDITIONS

RYOBI® TT.Power + ne

The RYOBI TT.POWER PLUS is even more powerful than its predecessor.

The new Spool-Support-System includes a brass captive nut fixed on a stainless steel main shaft and offers impressive drag power. In addition, the drag knob is larger for better handling.

The carbon rotor saves weight and in combination with a screw in handle with Japanese ball bearings, this makes the reel run smooth and powerful. Body and drag system are water and dust sealed.

The RYOBI TT.POWER PLUS is made for a heavy operating range.

TT.Power 🗲 4000 / 5000

The usage of high performance braided lines makes it possible to use smaller and smaller reels. The RYOBI TT.POWER PLUS, offers a reel which maintains these characteristics without losing any of its smoothrunning features. This is perfect for fresh and saltwater conditions.

Our next generation Surf Casting Reel.

A premium model made by the new king of reels, RYOBI. The RYOBI TANA Surf has a very fast gear ratio, 100 cm per turn of the handle.

Mainly developed for shore fishing but could also be used for heavy feeder fishing. The spool is fitted with two metal line clips, making it easier for cast to several hotspots at different distances.

The stable full metal body and 7+1 stainless steel ball bearings make it an ultra smooth reel. The powerful Carbon Drag system has a torque of 12 kg - serious drag power for hard fighting fish.

RYOBI TANA SURF is supplied with 3 aluminium spools.

RYOBI SPINNING REELS

The RYOBI PROSKYER NOSE POWER reels are traditionally perfect surf casting reels. However, more and more they are being used for carp and feeder fishing. RYOBI PROSKYER NOSE POWER reels have been unchanged for years, but even now, they are still state of the art! It's a long cast reel and due to its precision-wormshaft-gear with 40 mm spool stoke, it has a very precise line lay. The line is secured though a hole under the spool to ensure knots do not distort its winding contour or casting properties. The reel also features a bail lock system which prevents the bail arm closing when casting. The tangle guard system helps to prevent line getting caught under the spool.

The RYOBI PROSKYER NOSE POWER II includes 3 extra light ABS spools.

RYOBI® CYNOS II

RYOBI's CYNOS II offers great features for an unbelievable price. Every inch of it is testament to the abilities of Japanese engineering. The screw in handle and the 6+1 stainless steel ball bearings ensure super smooth running and maximum gear precision. The Carbon Drag System sets new standards in smoothness and long life.

RYOBI CYNOS II is the perfect choice for all kinds of spin fishing and many other styles of fishing. The line lay is perfect on the long cast spool. Body and rotor are also coated with black rubber. The coating is highly abrasion-resistant and will protect the reel in tough fishing conditions whilst fitting comfortably in your hands. CNC-handle is titanium coated and will be screwed directly into the main gear's stainless-steel bush, for minimum tolerance and maximum strength.

RYOBI CYNOS II is a perfect match to the WFT PENZILL rod series. This combination will far exceed the performance of much more expensive versions.

CYNOS II 6500 FEEDER

Excellent feeder reel with power and comfort. Very robust torsion-resistant body. 6+1 Stainless steel ball bearings and a massive main shaft ensure a confident appearance.

Where other reels have their limits, this will take you further. The smooth gears ensure total stability and strength. The long cast spool is armed with two metal line clips, which is perfect for fishing at several locations and distances. 90 cm line retrieve with every handle turn is perfect for feeder fishing. Soft-touch handle knob sits comfortably in your hands and ensures good grip even when your hands are full of groundbait.

RYOBI SPINNING REELS

Waterproof Drag

Xeños 2000 - 4000

The RYOBI XENOS is produced exclusively for WFT by RYOBI. It has the weightreducing LIGHT ROTOR which considerably enhances the reel's retrieving performance. This is an ideal reel for light, medium and heavy spinning as well as for trout fishing. The RYOBI XENOS is equipped with the new screw-fastened folding CNC-machined handle which is connected to the gear with little tolerance. The reel is a partial metal-construction with an aluminium spool and aluinium side plate, extremely torsion-resistant even under the weight of a big fish. The ceramic line-roller bearing withstands harsh saltwater conditions as well as the challenges of heavy duty spin fishing.

RYOBI® *ECUSIMA* ||

Since the beginning ECUSIMA has stood for excellent value for money. Armed with stainless steel ball bearings and a carbon drag system which offers a perfect jerk-free line release when fighting fish.

ECUSIMA II will sit comfortably in your hands. The smooth winding feels like a reel of much higher quality. The rubber ring ensures that braided line doesn't slip at the centre of the spool.

The ECUSIMA II is the perfect allrounder. Starting with small sizes for light spin and trout fishing up to bigger sizes for medium spin fishing for pike and pollack in Norway.

CATCH & RELEASE NET

Catch and release net features a soft, clear rubberized net material that's gentle on the fish and won't tangle, rot or mildew.

The clear colour won't spook fish because it virtually disappears underwater.

The frame is made from laminated bamboo and hardwood.

A series of reels combining comfort with strength.

The WFT SALZMEISTER has been developd specially for the saltwater angler. It begins with a 4000 for seatrout and light pilks, 5000 for light and medium pilk fishing or for pollack fishing in Norway and 6000, 8000 sizes the heavier lures and big cod.

The MOLECULAR-Plastic is incredibly stable. The precision engeineered CNC brass main main gear is one you would normally only find in full metal reels. The advantage here is you get all the strength of the full metal body but a much lighter reel.

The stainless steel spool bearing has a bronze tightly fitted nut to protect the cold forged spool when retrieving under full strain. The reel has 8+1 bearings, one being a ceramic bearing inside the titanium coated line roller for smooth running.

The CNC aluminium handle screws into the stainless steel socket of the brass gear for ultimate strength and protection. All these features have been developed to ensure the reel lasts for a very long time!

The WFT SALZMEISTER reels are a perfect match to the WFT SALZMEISTER rods on page 78.

The WFT PRO SALT is the series of heavy-duty spinning reels for any type of heavy fresh- and salt water fishing. Every components of the reels have been newly constructed with an uncompromising view to the heaviest workloads. Body, rotor. spool and crank handle are made from MARINEGRADE alloy that is used in shipbuilding and industrial boilers because of its strength and salt water resistance. The aluminium side plate is additionally secured with safetypins for torsional rigidity even under the hardest mechanical loads. Despite its tough design the WFT PRO SALT is not too heavy and its precision gear with aluminium, stainless steel and bonze components offers a comfortable retrieve that is unique in reels of this performance category.

The Line Roller is made from brass, double hard-chrome coated and equiped with a teflon bearing that is maintenance-free for its life-time.

The Aluminium Spool

is precision machined 100 percent tension-free from solid bar stock, golden anodized and equiped with a rubber ring on the arbor that prevents any type of fishing line from slipping. The Bail is made from solid stainless steel and has a maintenancefree spring-load system.

ALUMINIUM SALTWATER REEL

> **CNC-machined Handle** Directly screwed to the main gears stainless steel bushing with a massive stainless steel thread – a connection

as strong as it can be ..

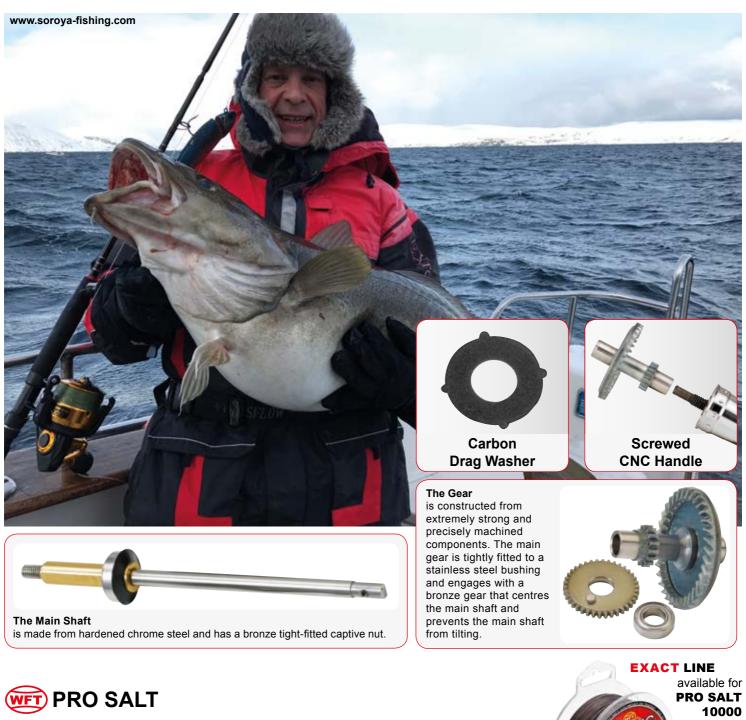

The Drag

Waterproof sealed power-drag with carbon, teflon and stainless steel drag discs. An watertight aluminium seal with an additional O-ring prevents the penetration of water and dust into the drag system. A double-sided sealed stainless steel ball bearing on either side, in the back and front of the drag system, centers the spool exactly on the main shaft with a tolerance of only a fiftieth of a millimeter, and holds it there safely even during the toughest fight. The drag is fine-adjustable, works absolutely smooth at any setting and generates a dragresistance of up tto 18kg. The large and easy-to-operate drag knob is equiped with an almost indestructible magnetic click (there is no spring).

The Handle Grip

consists of a non-slip microcellar rubber that also very comfortable in cold weather. 2 sealed stainless steel ball bearings ensure minimal effort during the retrieve.

We use the same sturdy gearing mechanism n the WFT LOAD reels as we have done for the tried, tested and proven WFT PRO SALT.

The main gear is tightly fitted to a stainless steel bush and engages with a bronze gear that sits centrally on the main shaft, preventing it from tilting.

All components used in the WFT LOAD have been constructed for maximum load. Body and rotor consist of highly torsion-resistant Nylon-ABS and are 100% corrosion resistant.

WFT LOAD is a supremely robust biggame reel for heavy spin-fishing, pikefishing and even successful catfish hunting.

The Gear

is constructed from extremely strong and precisely machined components. The main gear is tightly fitted to a stainless steel bushing and engages with a bronze gear that centres the main shaft and prevents the main shaft from tilting.

The Main Shaft

is made from hardened chrome steel and has a bronze tight-fitted captive nut.

SPIN

For years the PENZILL has been the flagship of value for money. We have done it again with our new PENZILL X SPIN, a reel that delivers exceptional value!

High-tech stainless steel ball bearings and a CNC-machined aluminium handle which is directly screwed into the stainless steel gearbox. Delivering an incredibly smooth performing reel. The full metal construction and the new Light-Rotor considerably enhances the retrieving performance whilst reducing the weight. The weight-optimised flat aluminium spool is made specifically for braided lines, meaning you do not have to add backing!

The PENZILL X SPIN has a reliable water and dustproof, sealed carbon drag system which is super smooth with ultra-fine adjustments. A perfect match for our popular P.

Our PENZILL Seatrout rods are becoming increasingly popular and due to this, we are pleased to introduce a reel to perfectly match the series; our PENZILL X SEATROUT reel. The PENZILL X SEATROUT meets all the expectations from a good sea trout reel.

Equipped with 5+1+1 precision stainless steel ball bearings (one being a ceramic bearing inside the line-roller) this reel has been developed for uncountable numbers of casts in saltwater. The CNC-machined aluminium handle is directly screwed into the stainless steel gearbox for an incredibly smooth performance. The new Light-Rotor considerably enhances the retrieving performance whilst reducing the weight. The PENZILL X SEATROUT has a reliable water and dustproof, sealed carbon drag system which is super smooth with ultra-fine adjustments.

FAST SPIN & BRAID 3500

An excellent spinning reel developed for braid.

The SPIN & BRAID 3500 doesn't just look great, it is packed with quality technical features too. It comes with 9+1 stainless steel ball bearings for a silky smooth non-twist operation.

The flat spool and the precise line-management system works perfectly for braid. The aluminium long-cast-spool has a spring metal line-clip.

The folding aluminium handle and the soft-grip, feels comfortable in the hand.

FAST TROUT & SPIN 2500

As it's name implies, the FAST TROUT & SPIN is designed specifically for trout fishing and light spinning.

The precise line lay allows for extra long casts and reduces tangles to an absolute minimum, even with low diameter lines. The stainless steel ball bearings ensure a silky smooth operation, which is an essential feature for slow trout trolling and spinning respectively.

The aluminium spool has a spring metal line-clip. The foldable aluminium handle with a soft-grip gives a comfortable feel, even after hours of fishing.

WFT BAITCASTING REELS

NEW GENERATION OF LIGHT TACKLE FOR DEEP SEA FISHING

Lighter, more sensitive rods – lighter reels – thinner lines....means: more bites, more fish, less reeling and less effort!

Sounds easy? It is easy! There are ways to change how you fish, just like the many styles now available for fresh water fishing.

The trend to use very light tackle for saltwater and deep-sea fishing is fast becoming more popular. Many anglers have recognized, that sensitive fishing styles will increase success in saltwater fishing.

WFT is a pioneer of the "New Generation of light Tackle Deep Sea Fishing" and now offers more light tackle products than ever before: There are Japanese constructed WFT SEN SEA reels and rods, WFT series like COASTAL KING, SALZMEISTER, B-Sea GIANT, BC Giant, BC KING, SALT & BIG FISH as well as WFT KG Strong lines in hundreds of lengths, sizes and colours we will equip you perfectly!

All models are smaller and lighter than current tackle on the market, but most importantly just as strong, because the target species are the same! You will recognise and detect more bites enabling you to fish effortlessly all-day long.

Put your money on WFT, we will enable you to fish lighter than ever before and put you on the path to more fish!

A premium saltwater reel delivering incredible performance. Its precise gears will set new standards in Light Tackle Deep Sea Fishing and trolling. All features of the WFT B-SEA GIANT ensure maximum performance with maximum comfort. This reel will enable you to control big fish with lower diameter lines. The ample 14 kg drag is enough power to tame monsters and the high precision gear with CNC cut frame is perfect for every target species.

Easy line release with free-spool button, powerful retrieve with Power-handle and high speed gear with gear ratio of 1:7.1 with 93 cm of line retrieved per handle turn, makes fishing with the WFT B-SEA GIANT extremely comfortable. This reel will enable you to make long precise casts. Includes an aluminium spare spool with integrated, easy to adjust centrifugal brake.

B-SEA GIANT

- 6 Bearing System
- 5 japanese stainless steel bearings

WFT BAITCASTING REELS

Our largest Baitcasting reel!

Due to the positive response from our WFT BC KING series, we knew larger baitcasting reels were becoming more and more popular. Not only for big pike fishing but also sea anglers from the shore. The WFT BC GIANT opens new opportunities for anglers, with a larger line capacity, stronger drag power and faster retrieve without losing any of its strength. This model can also be used with a spinning rod fish for catfish.

As an accessory we also offer a single power handle.

WFT BAITCASTING REELS

The WFT BC KING (Baitcast King) will meet all demands required from a large bait casting reel. The WFT BC KING features maximum drag power of over 12 kg – simply unrivalled in its class!

All components have to withstand this drag. The stainless steel / bronze transmission gear, stainless steel spool spindle and the extremely robust one-piece aluminium frame passes this standard with ease. The extra large gear delivers a high ratio

of around 5.4 : 1, delivering a powerful and smooth rotation even when under extreme pressure. In order to avoid over-runs (even with big baits over 100 g), the centrifugal brake system is oversized allowing a more controlled spool release. The extra long twin grip power handle makes retrieving big baits effortless. The reel has a line capacity of 300 m of 0,30 mm monofilament.

Perfect for fresh and saltwater as well as light and medium deep sea fishing.

per nandle

The oversized baitcasting reel. Especially made for "jerking" with large lures it is also a perfect choice for ultra-light deep sea fishing.

With an 8 kg+ torque this reel offers almost twice as much drag power as a conventional baitcasting reel. No unwanted spoolslip in case of hard tugs, easy control of trophy-sized fish.

The SUPER HIGH SPEED gear ratio of 1:7.1 provides a line retrieve of 75 cm per handle-turn. The large spool holds 220 m

of 0,30 mm line!! And all of that at a weight of only 230 g.

The large size of the reel offered us more internal space which gave us the opportunity to integrate another benefit: An extra large and extremely powerful gear. The extra-long crank handle makes it easy to pull big fish up from deep water.

The WFT SALT & Big Fish is your ideal partner for heavy spin fishing in freshwater and for ultra-light deep sea fishing.

* per handle turn

WFT BAITCASTING REELS

BAITCAST

Our PENZILL BAITCAST reel now in new matt black design, is amazingly light at just 185 grams! This sensationally low weight is made possible by using magnesium die casting technology.

A total of 14 stainless steel bearings ensure silky smooth operation. When you leave the spool in a free-running setting, the spool rotates for so long, you could almost grow a beard... Comfortable handling is also ensured by the rubberised double crank, the ergonomically designed spool release button, the almost infinitely adjustable centrifugal brake for controlling freewheeling, the star-brake that works smoothly thanks to carbon fibre brake discs, and the lightning-fast spool change.

To exert higher braking forces, e.g. for jerkbait fishing, the WFT PENZILL BAITCAST is equipped with two Teflon brake discs, which can be exchanged for the factory-installed carbon fibre brake discs. The WFT PENZILL BAITCAST is the ideal partner for your WFT Penzill High Carbon Baitcast rod.

WFT BAITCASTING REELS

WFT 'THE JERK' is a classic!

This bait casting reel is getting better and better. The new 'LIGHT JERK' is perfect for fishing with lighter jerk baits, but also perfect for light spin fishing.

Long, precise casts, also with small lures will not be a problem. The perfect bait casting reel for the beginner or experienced spin fisher.

WFT MULTIPLIER REELS

WFT MULTPLIER REELS

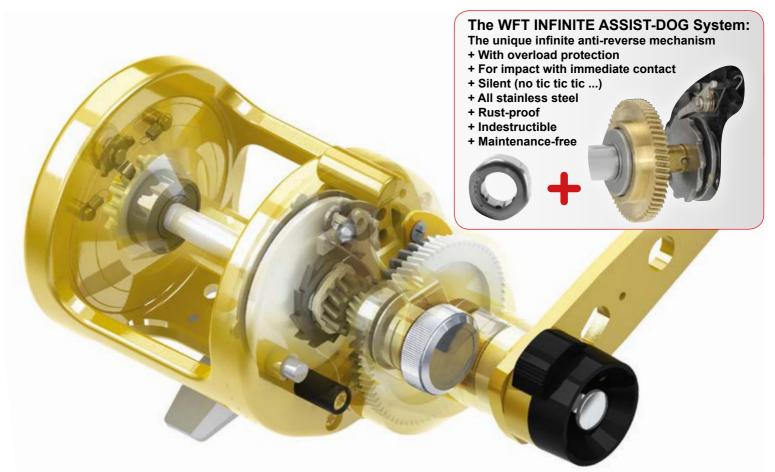

MULTIPLIER REELS

For many anglers WFT stands for deep sea fishing. Especially

in the development of multiplier reels WFT possesses a longterm treasure trove of experience in deep sea and big game fishing. We offer a wide programme of multiplier reels for all kinds of applications and preference. More than 20 models in different price ranges, plus 6 models of electric motorised (Electra) power reels...and the development continues. Our WFT ASSIST DOG has been built into many of our WFT multipliers. The WFT ASSIST DOG enables us to use an infinite anti-reverse system with all its benefits, even under enourmous loads in heavy-duty fishing situations.

Our design principle is and always will be based around a simple strategy: No matter what price-range, a WFT multiplier reel has to work flawlessly when the fish of a lifetime is on!

WFT ASSIST DOG -

The robust and silent anti-reverse mechanism for WFT multi-reels.

The benefits of an infinite anti-reverse mechanism for multi-reels are obvious. The sought-after IMMEDIATE CONTACT of lowstretch braided lines is not interrupted or delayed as with conventional anti-reverse mechanisms. Especially when jigging and pirking, the antireverse mechanism is, however, heavily strained - too much to handle for such a small bearing, especially when there isn't much space in a compact reel design.

WFT ASSIST DOG -

However, the robust and silent infinite anti-reverse mechanism for WFT multiplier reels protects the bearing by means of a stainless steel pawl in front of it, so that excessive strain does not occur. This technique is simple, robust, and invisible to the angler. Even at subzero temperatures - a challenge for any anti-reverse mechanism - the function remains completely reliable.

WFT ASSIST DOG -

The robust and silent anti-reverse mechanism for WFT multiplier reels ensures that you are right up close even when fishing in the greatest depths.

WFT MULTIPLIER REELS

Superb lightweight Japanese constructed trolling and deep sea reel. Frame and all other CNC parts are machine cut precision engineered from hi-grade aluminium, making the WFT SENSEA extremely robust. Its high speed gear with a ratio of 1:6.8 delivers 70 cms of line retrieved per handle turn. Perfect when fishing in deeper water. Precise level wind ensures perfect line lay for the thinnest of braided lines too. The level wind is also strong enough for heavier braid too.

THE PERFECT REEL FOR ULTRALIGHT DEEP SEA FISHING

The strong 12 kg carbon drag perfectly controls and will stop every fish. 10 capsulated stainless steel ball bearings plus 1 roller bearing ensure the smoothest running and easy retrieve, even when under pressure from the biggest fish.

Very strong reel weighing only 345 g. One of the lightest of its class and perfect for ultra-light deep sea fishing, in countries such as Norway.

HARD-EDGED BIG GAME REELS

An uncompromising machine for fighting the hardest fighting sea fish. One piece machine cut frame and side plates, stainless steel gears, cold forged spool and a super carbon drag system, make this the perfect reel for tropical species such as marlin, sailfish or big shark. A perfect alternative for the more experienced angler.

OFFSHORE 2-SPEED 30 LW LD

The robust WFT all-rounder!

Made for deep sea fishing in Norway. Better than any other multiplier reel, it combines a convenient 2-speed gear with automatic line guide and precise disk brakes. 4 sealed stainless steel ball bearings ensure easy hauling, even in the high gear and when fighting tough fish.

The impressive carbon fibre disc provides finely adjustable braking while delivering HIGH maximum braking power. Nevertheless, the reel provides very smooth free running - a must for deep-sea fishing.

The extremely robust gear is designed for use with low-stretch braided lines such as the WFT KG Strong 39KG or 51KG. The high-strength aluminium spool, allows you to comfortably use monofilament also. The high-strength nylon ABS material makes the WFT Offshore 2-gear a very robust yet lightweight tool.

A high 1 : 3,8 transmission ratio along with the stainless steel, 2-speed gear, enables very fast hauling even from great depths.

The low 1 : 1,5 transmission ratio provides abundant power to exert appropriate pressure even on large fish.

The WFT Offshore 2-gear 30 LW LD provides a unique combination of comfort and practicality.

Rod Clamp included

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item-No.: 1D-F 800-008

WFT MULTIPLIER REELS

All exposed metal parts in our two high-power disk brake reels are elaborately finished in gold anodised or titanium coated. This provides maximum protection against corrosion.

The high speed transmission ratio of 1 : 6,1 enables extremely fast line retrieval - perfect for deep sea fishing.

The powerful disc brake with the large carbon fibre brake disc ensures smooth line release even under the most demanding of conditions. The gear, which is made of bronze and stainless steel, withstands high loads. This makes the reels perfect for light gear too.

Five stainless steel ball bearings ensure smooth running even under the strain of large fish. The robust line guide and the aluminium spool provide large power reserves for fishing with braided KG lines or monofilament.

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item-No.: 1D-F 800-008

The WFT OFFSHORE is our robust, universal reel, designed for years of trouble-free operation and is superb value for money.

Principly, the well-known design is based on a high-strength, one-piece nylon frame for maximum rigidity. The spool is supported by two strong, sealed stainless steel ball bearings. The robust line guide is perfect for fishing in waters such as deep fjords such as Norway.

The star drag lies close at hand and in combination with the two carbon fibre discs, this provides smooth adjustment under great pressure. A MUST when using strong braided lines!

The reel comes complete with an integrated and robust line meter counter.

The WFT LINE COUNTER reels with high precision, electronic line counter and automatic line guide.

Thanks to the light weight and compact design, the WFT LINE COUNTER 875/855 are particularly suitable for the increasingly popular deep sea fishing with light tackle.

Large, waterproof, and easy-to-read LCD display with low power consumption. The WFT 875/855 LINE COUNTER are pre-programmed for use with WFT KG STRONG round-braided lines of different strengths (Exact spools available). The infinite anti-reverse mechanism and another 7 stainless steel ball bearings provide superior silky gear running.

The wear-free new CARBON DRAG brake system enables smooth braking without sudden load spikes. The risk of line breakage is therefore significantly reduced.

The counter mechanism is non-contact and extremely accurate.

The star drag works smoothly - it can even handle thin-diameter lines. This makes the reel highly attractive for downrigger fishing too, especially when using monofilament lines. The length of the crank can be adjusted to control the force exerted.

The 875 LC offers a line retrieval rate of 100cm per handle turn and thus avoids turning deep sea fishing into "endless cranking". The line guide of the WFT 875 LC is forcibly guided through 2 additional cross-pieces to avoid tilting.

The WFT 875 LC and 855 are also fitted with the WFT ASSIST DOG - THE resilient and noiseless infinite anti-reverse mechanism for WFT multiplier reels.

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item-No.: 1D-F 800-008

With simplified programming functions and a clearer display, the WFT 875 LC will be a favourite amongst deep water anglers during the 2018 season.

The small and smart WFT LINE COUNTER 825 SOLAR is the perfect reel for controlled light trolling und spin fishing. The digital metric counter works from 0 - 999 m and shows even one place after the decimal point!

By its unique memory technology, for all WFT LC reels, there is no sophisticated programming necessary before the first line wind. The display is supplied by standard coin-type lithium battery and additionally assisted by solar power for a long battery life. Therefore, changing the battery is required at rare intervals.

The freespool release on the WFT 825 LC SOLAR activates comfortably with a push button similar to bait casting reels. This can be reengaged by turning handle or by pressing down the push button. Therefore, allowing the hand to stay on the rod with no need to change the grip.

Shurely the WFT 825 LC SOLAR offers automatic line guidance. A centrifugal brake regulates the freewheeling function. The WFT 825 LC SOLAR is due to limited suitability casting !

Leadership with for Success

WFT POWER REELS

The trend of exploiting ever-increasing water depths continues. The deep fjords of Norway have not yet revealed their greatest secrets.

15 years ago, WFT was one of the first manufacturers to offer motorised reels for ambitious deep sea fishers.

Sales immediately surpassed all expectations. Before long, we received a flood of unusual fish catch reports.

Today, many thousands of electric reels later, the technology has been refined, the reels have become easier and more comfortable to handle, and most of the critics have been silenced. It has become common knowledge that exceptional catches are only possible away from the "grazed" places.

Of course, at depths greater than 150m, perhaps even at 300m or more, you can hardly achieve anything with a manual reel. Especially since slight currents, which are nearly always found in the North, demand frequent hauling and boat relocation.

During our test trips, participants initially wanted to try their luck with our E-multipliers fitted with the "Muscle-Multiplier". That, however, worked for about an hour and the fun was soon over afterwards. E-Multi does not mean throwing sportsmanship out the window.

That being said, it is extremely relaxing to haul eaten bait in electrically, ideally with the rod in the rod holder. In time, the new system can be perfectly baited. Needless to say, you can still pump your catch to the surface like before, without any electrical assistance whatsoever. On the other hand, "pumping loses fish!" still holds true, especially for long lines. Most Nordic deep sea fish such as cod, ling, and tusk have a soft mouth. If you repeatedly pull on a hook, the hole will get bigger and the fish can easily slip off the hook. Many big fish are lost this way in the midwater zone - almost everyone has had this experience. Therefore, electrical, steady, and slow-hauling proves much more successful as well as protecting the fish. Of course, this requires a finely adjusted brake. Electric hauling by no means detracts from the drill or replaces angling ability.

WFT electric reels have set deep sea fishing trends.

We have thus helped to make motorised multiplier reels a class of their own. This applies especially to the exceptional catches achieved in recent years using these reels. Tight Lines !

Neoprene bag included!

of the WFT ELECTRA reels to increase by an extra 10 to 20%. All WFT ELECTRA reels are already precharged to this voltage.

It is also possible to run two WFT ELECTRA reels from a WFT SUPER LITHIUM Akku at the same time.

The low weight of SUPER LITHIUM Akku is 4 times less than conventional lead-storage battery with the same power. The SUPER LITHIUM Akku, you can use all of the energy – meaning you can use 6 times more energy. Another major advantage found when testing, in colder conditions there was no decrease of power.

SUPER LITHIUM Akku comes with two well identified and accessible poles.

Neoprene protection bag, special charger and manual are included.

The SUPER LITHIUM Akku meets all requirements regarding taking with you on an aeroplane too! However, it is always best to check with your airline as some airlines have different policies.

Specifications:

14,8 Volt 8800 mAh 130 Wh 220 x 80 x 50 mm (w/o neoprene bag) weight 1.100 g (w/o neoprene bag) Item-No.: 1D-A 800-088

Higher voltage output of 14,8V, will allow speed and power

WFT SUPER LITHIUM Akku is the perfect power point for

Due to it's the slim shape and low weight, the new WFT

to fit into a pocket of your flotation suit.

ELECTRA reels and fish finder. It stores enough power for 2

days of fishing or more than 20,000 metres of mono retrieved.

SUPER LITHIUM Akku gives total flexibility. It is small enough

The WFT ELECTRA 700 PR BI-MOTOR is the cream of our WFT ELECTRA series.

In its size class, the WFT ELECTRA 700 PR BI-MOTOR has the highest hauling speed in the world. The Hauling speed is seen as the most important factor in electric reels so that valuable fishing time is not wasted, even with heavy sinkers.

The thumb-operated wheel control is also a great feature. This allows the WFT ELECTRA 700 PR BI-MOTOR to be operated quickly and precisely, like a baitcast reel. The freewheeling can be turned on and off manually or automatically via 1/4 crank turn.

The WFT ELECTRA 700 PR BI-MOTOR achieves a speed of up to 270 meters per minute thanks to the 2 Japanese high-performance electric motors. Similar motors are also found in high-quality Japanese cordless screwdrivers. Depending on performance requirements, both motors work together or individually, delivering the optimum power in terms of reasonable use of the battery at all times.

5 Japanese NSK stainless steel ball bearings minimise the force exerted, even when retrieving the line manually. The 1: 3.2 transmission ratio (which is high for electric reels). represents a perfect combination of force and hauling speed.

The WFT ELECTRA 700 PR BI-MOTOR has an extensive menu, which is displayed clearly on the large screen in a variety of display modes. Operation can be restricted to a few, easy-to-handle functions.

A detailed English manual can be requested from WFT.

FLIP-Button

WFT)

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item-No.: 1D-F 800-008

WFT POWER REELS

The ELECTRA SUPER COMFORT 700PR HP combines extremely strong line retrieving power with newest comfort features.

This is the market leader for the WFT ELECTRAseries.

Well-known from WFT ELECTRA BI-MOTOR, the FLIP-button for freewheeling clearance will make the need to change your grip a thing of the past. Now freewheeling can be served easily with the push of a switch without taking your hand away from the rod.

You can regulating the speed of the line on the ELECTRA SUPER COMFORT 700 PR HP from 0 -MAX on the left side with your thumb. An invaluable advantage because freespool- and speed-regulation are the most commonly used functions. Now you can respond much more efficiently in all conditions.

The technical side of the reel is incredible. It will haul up 24 kg at 220 m per minute with sufficient reserves, even for bigger fish.

We recommend the WFT SUPER LITHIUM AKKU for all ELECTRA reels. Art.-Nr.: 1D-A 800-088

WFT POWER REELS

The WFT ELECTRA PRO 700 PR features the so-called jigging / stimulus function, whereby you can start line retrieval immediately by pressing a control button. The reel stops as soon as the button is released. This feature is essential for all fishing methods with partially or constantly moving baits, but also very practical in bottom tracking with ascending sea beds.

Furthermore, the general on-board handling is greatly simplified by the quick access to this function.

The ELECTRA PRO 700 PR HP (HIGH POWER) with its high-performance electric motor and Japanese NSK ball bearings, achieves a pulling force of 20 kg!

Despite the larger motor, the HP weighs only 705 grams, just 35 grams more than the standard model. The increased retrieval force not only helps in fighting heavy fish, but also accelerates the hauling of heavy sinkers and complex configurations with high water resistance.

PRO 700 PR HP

WFT POWER REELS

The WFT ELECTRA is one of the best-selling electric reels in Europe and the new, large 1200 model will be an impressive addition to the series. Strong brakes, extremely powerful motor, and a unique hauling speed make the WFT ELECTRA 1200 PR HP the first choice for fishing in the deepest fjords of the Norwegian Sea.

The new jigging program takes on the complex task of searching for fish schools in uncertain depths. Once found, redfish schools can be fished systematically - fish are repeatedly found by the reel program and the jigging action encourages the fish to take the bait !

In Norway, the huge line capacity cannot be exceeded by any depth - and if it does not work, there is nothing left...

The harness eyelets also offer a huge advantage for the angler. They are perfect for clipping to a fighting belt.

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item.-No.: 1D-F 800-008

WFT KG STRONG EXACT - lines for ELECTRA reels

WFT Expert Tip: Of course, the WFT ELECTRA reels were designed from the outset for the electrical hauling of even the largest and strongest-fighting fish. Keep in mind that this also optimises fish protection and minimises the chances of losing them during the fight. This does not in any way diminish the fighting experience, as you must still adjust the brake and interrupt the electrical hauling to counter any fish escape attempts if necessary. Fighting a fish that takes line from the reel with a fixed-spool reel is not really an exciting prospect for anybody...

WFT Expert Tip: When using WFT ELECTRA reels, always choose a rod with one line class higher, e.g., 50 lbs. instead of 30 lbs., as you would with a manually operated reel. The reason: the high torque of the electric motors can increase the reel rotation speed lightning-fast, which is very important in ground tracking on drift and ascending sea bottoms, for example. For lighter rods, short "acceleration bursts" put the rod tip in fast forward and backward motion, which can be distracting. For WFT ELECTRA reels, we recommend our - SPEED JIG - and - SPEED JIG TRAVELLER - rods

PENN MULTIROLLEN

PENN MULTPLIER REELS

PENN Commander

The PENN COMMANDER PRO by WFT was specifically built for deepsea fishing in Norway and the use of high-strength braided lines.

Indisputably sublime, the extra strong gear is made from V2A stainless steel. This includes all gears, the anti-reverse mechanism, the ball bearing and the spool shaft.

With this product, we are offering unprecedented quality in the entry-level price range.

This gear has an approximately 5 times longer life than conventional gears. All mounting points of the gear inside the reel are significantly strengthened (see detail photos) to hang the stainless steel gear in the one-piece composite reel frame in a torsion-proof way. The stainless steel ball bearing is sealed on both sides.

All COMMANDER PRO LH models are equipped with the WFT - developed LWS system.

The COMMANDER PRO LWS's disable line guide, enables you to detect the original winding contour. An old problem of all reels with line guides is finally eliminated.

6
ABS NYLON od Clamp included

The Power-Crank tremendously facilitates hauling from deep water. The crank arm is 3-way adjustable to control the force exerted.

Leadership **WFT** for Success

In recent years, the sturdy, thoroughly tried and tested PENN COMMANDER LINE COUNTER by WFT has become the friend of many visitors to Norway.

The fully-developed design withstands any stress. Furthermore, it offers the useful luxury of constantly indicating how much line has been released from the reel.

Thanks to its smooth operation, the counter which goes up to 999 meters, neither affects theway the bait is released nor requires any maintenance or care.

The robust gear allows easy reeling under load. The strong brake can tackle any fishing situation, and the robust line guide eliminates the need for distributing the line or braid by hand on the large aluminium spool.

The PENN COMMANDER LINE COUNTER by WFT offers the luxury of a deep sea reel with mechanical line counter and the reliability of a large-scale manufacturer at an affordable price.

TIP: The Ardent Line Conditioner significantly increases the sink rate of braided lines. As a result you can use lighter sinkers and fish a lot more sensitive. Item.-No.: 1D-F 800-008

PILK

Since we started our business in 1999, WFT has stood for

innovation and reliability. Especially reliability, our aspiration is to provide our customers with an outstanding product and this is reflected in our range of fishing rods.

We attach great importance to the selection of the best blanks and finest components. However, functionality is just as important – in every price-range! What this means: Only when a rod meets our high standards and requirements, will it go on sale. Our team constantly controls the quality, the look and functionality during the entire development and production process. Extensive prototype testing by our team and consultants world-wide is the last step before the product finally gets the "GO" for series-production and market-launch.

Have a look at our rods in your tackle shop – you will be impressed with their looks, dynamics and actions!

=1

HAD CONTROL R

PIRIT OF BIG FISHING

The lightning rod blank ensures perfect lure control also even when using light soft lures. An enhanced action and the blank is complete with the finest lightweight guides for casting further and bite indication. You'll feel every touch. The use of PREMIUM-CARBON and lightest components make this rod a perfectly balanced unit. You will be amazed, how light this rod sits in your hands.

DENZILLE SHAD CONTROL & X-FAST

The X-FAST is optimized for medium soft lure fishing at slow moving waters, harbours and lakes.

Lure control is perfect when using smaller weights. The tip action offers sensitivity for secure hook ups and much more power in back bone for fast and powerful strikes.

WFT PENZILL SHAD CONTROL R X-FAST

Item-No.	Length	Transport Length	Casting Weight	Weight	pcs
1D-B 341-265	2,65 m	1,38 m	9 - 42 g	160 g	2

DENZILLE SHAD CONTROL & XX-FAST

The XX-FAST, is the ideal shad rod when fishing for Zander. Extremely fast blank to ensure that you never miss a strike and set the hook immediately. The XX-FAST is perfectly balanced for secure landing of the fish.

WFT PENZILL SHAD CONTROL R XX-FAST

Item-No.	Length	Transport Length	Casting Weight	Weight	pcs
1D-B 342-265	2,65 m	1,38 m	14 - 58 g	170 g	2

DENTILL SHAD CONTROL & XXX-FAST

If you normally use heavy soft lures, the XXX-FAST is perfect for you. This rod enables you to make long casts with heavy lures. Not designed for nursery fish, the XXX-FAST is made for big zander and pike. Despite its massive backbone, the XXX-FAST is not so heavy.

Leadership wir for Success

The WFT SHAD CONTROL collection offers the perfect rod for the smallest or the biggest of rubber baits for still or very fast running water.

The very slim blanks are very powerful and a tip action that isn't too soft allowing for perfect control. These rods are extremely fast and a perfectly matched reel will allow for perfect balance, even without counterweights. The solid backbone can set the hook as fast as a lightning and will easily control the bigger fish too! In conjunction with a pleasant FUJI screw reel seat the fine EVA foam handle offers an ergonomically perfect combination.

The 3 strongest rods from this collection we have applied SIC guides with reinforced frames, adequate for strongest lines.

THE SPIRIT OF BIG FISHING

TITANIUM

Our PENZILL rods are for anglers who favour longer rods for use with the latest generation of wobblers.

FP

BS BS L

These rods combine very sensitive tips with a strong backbone and feel almost ridiculously light thanks to the extensive use of high modulus 36 and 44-tonne compression carbon fibre. This explains the extended weight-casting range.

Furthermore, these rods feel extremely good in your hand due to the pleasant natural cork and the skilfully incorporated Fuji screw reel seat. It's hard to go back to your old rod once you've had this one in your hands...

SEN SEA RODS

=///

Reel not included! in delivery

With our WFT SEN SEA rods, a new era begins.

WFT SEN SEA is manufactured from a solid (not hollow) blank with high carbon composition. This construction can offer a very thin tip with highest sensitivity and maximum strength, no matter what depth you're fishing at.

The WFT SEN SEA rod concept is a totally new breakthrough for ultra-light fjord and deep sea fishing. There is no limit regarding size of game fish – 1 kg or 50 kg, it doesn't matter!

Bait movement, strike, and fight are all similar to feeder rods. Bite indication is perfect, due to the sensitive tip. The strong back bone overtakes and absorbs the fight. The tip always follows the line and therefore you'll never have a slack line and will safely land you more fish.

Only the handle is made from a hollow carbon construction, keeping it stiff. The large TRIGGER reel seat makes it very comfortable to hold the rod with one hand.

Features of WFT SEN SEA are best quality: SOLID CARBON blank combined with original SeaGuide SIC-guides (under-wrapped), ABS/ NYLON "TRIGGER" reel seat, finely flatted down EVA handle and gimbal.

76

COASTAL KING RODS

Our new COASTAL KING continues the trend to make fjord and deep sea fishing light, sensitive and sporting.

For ultimate performance, combine this light blank with a light reel, such as our WFT B-SEA KING and WFT SEN SEA. Under extreme fishing conditions, this blank is virtually unbreakable. COASTAL KING has a perfect bite indication, whether fishing at depths of 200 m or 20 m. When fighting fish the rod tip absorbs the power easily to ensure you land your fish securely.

Features of COASTAL KING are best choice: WFT NEVER CRACK HIGH CARBON blank combined with original SeaGuide SIC-guides (under-wrapped), ABS/NYLON reel seat, finely flatted down EVA handle and gimbal.

WFT COASTAL KING is also perfect for fishing with WFT Power Reels, WFT ELECTRA 550 PR-SHP and WFT 22KG Strong line.

SECTION JIGGER

WFT OCEANIC rods represent state-of-the-art in carbon fibre boat rod construction. With a WFT OCEANIC from "P450", you are the master of the seven seas and all situations. Whether trolling in Kenya, conger eel fishing in Scotland, deep-sea fishing in Norway etc...

All components of the Oceanic series are top class. Titanium SIC rings sealed against salt water with upper and lower winding and 2-component paint. Screw reel seats made of ABS with titanium-coated inserts or solid aluminium screw reel seats.

All front handles made of the exclusive NITRO handle material.

Close and large ringing allows for the use of fixed-spool and multiplier reels. The practical division results in convenient transport lengths. The main areas of application of these strong rods are deep sea fishing in Norway and heavy catfish fishing in Spain. All rods are fitted with gimbals.

DOWNRIGGER

ELECTRA RODS

A series of carbon fibre sea rods, developed by us for deep-sea fishing with WFT ELECTRA reels.

These rods have a strong backbone and a special tip action which can handle heavy sinkers, but still offer good bite detection. This is important to time the impact correctly, even if hundreds of meters of line have been released from the reel.

We have placed particular emphasis on the robustness of the equipment to provide high utility in tough everyday boat conditions. Equipped with a sturdy carbon fibre blank, LTC double-leg rings (our strongest!), one-piece aluminium milled screw reel seat and gimble fitting. All rings have an elaborate insert and are epoxy sealed. The extra-long front handle with sturdy blue ethafoam rubber can be held comfortably for hours.

WFT Expert tip: Due to the high retrieval speed while fishing with WFT Electra Reels, rods with soft tips or parabolic action are NOT recommended.

In collaboration with Captain Marc van Roie, we have developed strong new rods that not only offer the desired actions but also have to brave harsh daily boating conditions. Continuous use on a charter boat requires the highest reliability. WFT LTC FLEX rings in an extremely stable design are the best option for

this, since there are no sensitive ceramic inlays.

In just 12 months, this rod has defeated hundreds of fish over the 30 pound mark. Several fishing journalists have tested the pre-production models of the WFT SØRØYA SPECIAL "Inspired by Marc van Roie" and loved the rod's strength and endurance.

It only makes sense in combination with large and robust, high-quality multiplier or fixed-spool reels.

MISSION RED RODS

Two extremely strong travel rods, specifically developed for extreme deep-sea fishing. With these models, large reels are required, preferably electrically powered multiplier reels for fishing at water depths over 200m.

For example, redfish schools really put the device to the test. The extremely robust and reliable LTC Flex ringing withstands these loads as does the entire rod blank. Also a very good choice when reef fishing for groupers and amberjack!

Supplied in an extra strong padded case.

ID-B 865-265

THE EUROPEAN-RECORD-ROD

On 17 February 2009, the professional charter captain and fishing guide Marc van Roie caught a record size cod in his northern norwegian home waters off Sørøya. The cod weighed exactly 39 kg. With a length of 1,40 m this fish set the official European record. Marc caught this record-cod with our WFT 68° NORTH LTC rod.

The WFT 68° NORTH LTC is our top-selling boat rod, equipped with our strongest line guides. The WFT LTC guides withstand any strain easily. Like no other guides they are almost completely corrosion resistant and require only a minimum of care. Apart from that the WFT 68º NORTH LTC rods feature the same blanks and components as our other established models yet are a little bit heavier due to the weight of the ultra strong LTC guides.

PRION INLINE

High-performance rods for large fixed-spool reel fishing. Whether for freshwater giants such as the Nile perch, mahseer, or for tarpon and giant trevally in salt water - the INTERNATIONAL OCEAN FIGHTER will not let you down.

The positive response of enthusiastic big fish anglers to these "extreme spinning rods" presented back in 2004 was enormous. From the titanium nitride-coated rings to the large rubber end cap for easy rod support, everything is consistently focused on large fish. The underside of the rod is effectively protected by a special cork and rubber covering. The front NITRO handle is designed for a strong hand.

The 80-220 g version is available as a pirk or big fish rod for all occasions. The 3-meter model is suitable for all situations requiring a longer rod. The PACIFIC BAY reel seat is specially designed for strong rods and provides greater sensitivity

- an excellent choice !

POWER was the emphasis on CHARISMA SENSO PILKs, latest generation...

For many years, CHARISMA is one of the top-selling series in Europe. The WFT CHARISMA POWER series - now made of a new, almost indestructable carbon fibre.

Originally designed as a pilk rod, several catfish anglers enjoys this robust full carbon fibre range of rods. New lengths and casting weights were added. The WFT CHARISMA POWER comes with a thinner blank and is even more robust than before. Included is a processed natural cork-handle, Fuji reel seat and SIC guides with stainless steel frames.

CHARISMA RODS

Peerless rod with a very sensitive and extremely sensory tip. It delivers a checkback signal at the moment when the pilk touches the bottom and tells you wether the bottom of the body of water is as hard as rock or as soft as sand – you know it immediately. As expected from a WFT rod the configuration includes these high end features: an all-through carbon blank, Titanium SIC guides, a long natural cork handle and a FUJI DPS reel seat.

SEA LORD CARBON

Leadership wir for Success

SEA LORD RODS

The SEA LORD LTC equipped with WFT's legendary LTC guides for the toughest of conditions and highest possible protection of braided lines.

Because of the slightly heavier guides, we revised the blank to preserve its tight action. The WFT SEA LORD is mounted with high quality cork grips, so it feels more comfortable in your hand, even when under pressure from big fish!

Further additions are high quality Nylon 7 ABS -screw reel seat and rugged metal / hard rubber - butt cap.

BLUEWATER STAND UF

Leadership with for Success

NEVER CRACK RODS

Our big series for big fish.

A wide range of rods for all situations where heavy duty gear is the minimum requirement. Indestructible Never Crack technology with highend components and a cross wrap finish for total strength. Our NEVER CRACK rods are equipped with strong stainless steel* guides which encircle the SIC inlays for enhanced protection and durability. Each guide is under-whipped, finished with an epoxy finish. The rods come with highend reel seats and a large diameter hook keeper designed to hold the biggest hooks.

NeverCrack FJORDSPIN

The development goal of the NC FJORDSPIN was to return to the origins of one of the most popular sea rods Europe. The sensitive tip is good for perfect bite indication even at great depths. Thanks to its close and large rings, it can be used to fish with correspondingly large and stable fixed-spool reels - as well as with multiplier reels. Its large ring diameter averts the risk of icing in the wintertime. We have also once again given serious consideration to corrosion protection with double hard chrome-plated ring frames and screw reel seats. The robust gimbal is hidden under a foam rubber cap when delivered.

LOOM EEL ROD

Strong composite rod, developed for ground and eel fishing. Equipped with an EVA handle, nylon/ABS reel seat and SIC guides with stainless steel frames. Highlight of this rod are the fluorescent pigments, which will glow in total darkness. Enables you to locate the rod when the fish picks up the bait and runs and also detect bites in the darkness.

Die Lieferung erfolgt in einem extra starken Polsterfutteral.

The well known catfish rods, also with the new CARBON NEVER CRACK blanks - the WFT NEVER CRACK technology of carbon fibre. These blanks are light, thin and pretty much unbreakable. The configuration with WFT LTC guides and extremely long handle was proven a thousand times. The lower weight has allowed us to offer the often requested 3,5 meter version.

WET CARBON NEVER CRACK BANK CAT

Item-No.	Length	Transport Length	Casting Weight	Weight	pcs
1D-B 446-270	2,70 m	1,40 m	200 - 1000 g	495 g	2
1D-B 446-300	3,00 m	1,55 m	200 - 1000 g	545 g	2
1D-B 446-320	3,20 m	1,65 m	200 - 1000 g	585 g	2
1D-B 446-350	3,50 m	1,80 m	200 - 1000 g	615 g	2

The WFT HIGH CARBON NEVER CRACK CATFISH makes impressive use of the latest rod technology. Instead of being heavy and awkward like many other rods, the WFT HIGH CARBON NEVER CRACK CATFISH remains pleasantly light and sensitive throughout. However, the blank is pretty unbreakable and has enough in reserve for hooking and fighting the biggest fish. The stable aluminium screw reel seat keeps even biggest reels stable and the LTC guides offer maximum strength and sturdyness.

WFT MANHATTEN DROP SHOT

A nice lightweight rod, not only for drop shot fishing.

Drop shot rods are becoming increasingly popular. These rods are specifically designed for this style of fishing, featuring a pronounced tip action for perfect strike indication. At the same time the soft tip creates very small resistance meaning the fish feels next to nothing when it bites. These rods are an ideal choice for fishing other techniques and rigs such as texas, carolina and kickback-rigs. These lightweight rods are being used more and more for trout fishing too!

This is the super light Tremarella-rod. This is an unbelievably thin and lightweight carbon fibre rod. Manufactured using the very best components including ultra-lightweight guides and premium reel seat. Fishing with this rod will become a great experience for professionals and also for beginners.

This rod is developed for angling with glass, glass-feather-chain or glass-lead-chain, with or without float. Also the classic trolling with small sbirolinos or floats is possible. The very good casting characteristics leave nothing to be desired. The butt section provides a very good grip, so the rod will remain steady in your hands even after several trout.

TROFEO TROTA SUPRA

Item-No.	Length	Transport Length	Casting Weight	Weight	pcs

1D-B 267-390	3,90 m	1,20 m	No.3 / 2-5 g	120 g	7

Very slender carbon fibre trout rod, developed for angling with glass, glass-feather-chain or glas-lead-chain, with or without float. Also the classic trolling with small spirolinos or float is possible. Good casting characteristics and excellent curve.

The very sensitive tip offers super bite detection.

Regardless of its low price tag, the high grade components are astonishing. Premium guides and high quality reel seat offer a perfect price – performance ratio.

ROFEO TROTA STYL

The WFT LAKE 'N 'RIVER rod is a series of highquality rods and covers many types of sensitive freshwater fishing. In addition to top workmanship and high-quality materials, we have placed a special focus on dynamism and sportiness. All rods have sufficient capacity for big fish - although fish of ALL sizes are great fun!

All photos were taken by person at WFT's testers waters. This testing opportunity, which is rare in the

German fishing tackle scene, opens up completely

new dimensions in the in terms of development and product optimisation. New prototypes can be immediately tested and vulnerabilities detected and eliminated so that only fully-developed models are released. Many new models are already in development - you can find continuously updated information at :

www.world-fishing-tackle.de

All rods in the LAKE 'N`RIVER series are equipped with high-quality silicium-carbon (SIC) rings.

WFT LAKE'N, RIVER STALKING ROD

2 and 3-piece rods with a strong backbone, perfect for fishing medium to large fresh water fish but without losing any sensitivity. As usual with WFT LAKE 'N`RIVER Rods, the blanks are made of pure carbon fibre. That is why these rods are extremely light and fast. The large SIC rings are advantageous in all situations and emphasise the versatility of these fishing rods for carp, tench, sturgeon or pike, and zander, especially when we need that extra effort because of the current, water depth, or the expectation of catching the next big fish...

1D-B 017-365	3,65 m	1,27 m	20 - 55 g	340 g	3

AKE .N⁴ RIVER 2 SECTIONS

Light weight float rods for all types of sensitive non-predatory angling. Carp, tench, roach, bream: no fish is too big or too small, you never lose sensitivity and always have enough in reserve. Equipped with fast blanks made of pure carbon fibre, the best SIC rings, and natural cork handles. The large rings allow trouble-free usage of stop knots, increase casting range and will not freeze up as quick in the wintertime.

1D-B 005-335: Perhaps the "star" of the series! This 2-piece model weighing only 195g quickly became the favourite of all testers. Deep water, heavy waggler, long distance, light floats at night, converted in the morning to a 3 gram float ! From small roach to a 20 pound carp, everything was caught.

1D-B 005-365, 1D-B 006-365: For anglers who would venture far out and enjoy ample casting space. Ideal with heavy floats on deep lakes or on rivers. When you need to keep a float at a great distance even in currents but be careful if you're wading! If in doubt, cast further than you can bait ...

\sim	,

1D-B 006-365	3,65 m	1,27 m	4 - 26 g	245 g	3

WET LAKE ,N' RIVER COARSE

Four rods designed for delicate trout fishing, with the thinnest leaders and light floats, but equipped with all the reserves needed for large fish. Nevertheless, smaller fish can be also caught sensitively and carefully. The large rings are also suitable for rubber stoppers and frosty winter days. The long natural cork handle sits perfectly in your hand.

WET LAKE ,N' RIVER TROUT

1D-B 009-365	3,65 m	1,27 m	3 - 18 g	235 g	3

Three rods with the length of 3,35 meters that we so value. Specially designed for natural bait fishing - whether with small baitfish, shreds, or worms, and of course, also with ground weights. It works brilliantly - the casting distance with small fish and a 20 g weight is approximately 35 meters.

You can also reach very far with a float and a worm. Even at this distance, you can set the hook securely but sensitively. Even eels up to 500 g can be easily handled, wrote one of the testers.

ABGEMETERT BLTZSCHLAG

WFT presents in cooperation with "Abgemetert" team, a new reel to match the new "BLITZSCHLAG" rod series.

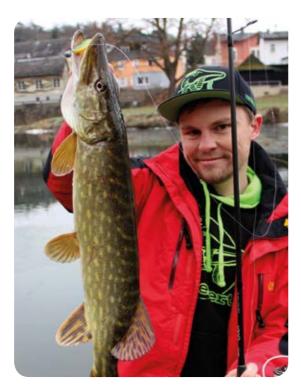

Premium quality metal reel combined with carbon rotor makes this reel light but very strong.

Armed with stainless steel ball bearings and screw-in handle for a precise and smooth running reel.

Spool-Support-System with brass captive nut and carbon drag makes this reel even stronger.

Specially made for braided lines, the BLITZSCHLAG 3000 has a flat spool, and therefore no need for mono backing.

Basically: Quality meets Style!

WFT ABGEMETERT BLITZSCHLAG 3000

- 6 Bearing System
- 5 stainless steel bearings

Leadership with for Success

WFT MICRO BRAID KG is one of the thinnest diameter braids ever! Specially developed for ultra light fishing at long distances.

Manufactured from high quality Japanese UHMPE fibres, then manufactured using the world's most modern braiding machines in Germany.

WFT MICRO BRAID has a very slick and even surface and lays perfectly on your spool for maximum casting distance.

Due to the unique electronic manufacture, the specifications stated are completely accurate. An important point when fishing in technically demanding conditions.

Note: WFT Micro Braid Chartreuse in 0,04 mm has a breaking strength of 3 kg. Depending on the knot used the braking strength could increase or decrease. Please note, when you use this line, the diameter is much thinner than the hairs on your head!

Leadership **WFT** for Success

Without a doubt the WFT KG STRONG is one of the most successful WFT fishing lines. The technical development of this braided line started 15 years ago and has never stopped. The "kiloline" is totally sophisticated and now demand from other countries is growing. More and more we hear success stories coming from around the world.

We have Dennis Verreet, possibly the best-known German who catches tuna from the shore! In July 2015, he landed a 230 lb yellowfin tuna, fishing from the rocks on land! This was a World Record and guess what line was he using? WFT 51KG STRONG of course!

Two major features make KG STRONG Dennis

Verreet's #1 choice in line: tremendous abrasion resistance and the fact that a sufficient length of line fits onto his spinning reel!

We received reports from Malaysian GT-anglers. Since they started to use KG STRONG lines (with similar diameters to lines they had been using) they couldn't believe that after tough fights with big GTs they ended up with bent hooks and not broken lines!

These are only a couple of examples that motivate us to keep on improving our lines, in order to enhance your chances to land your fish of a lifetime.

ENORMOUS GTs Malaysian GT-anglers report catches of monster size giant trevally with WFT KG STRONG.

LANDBASED PELAGICS More and more spin-angers catch tuna and other pelagic predators from the shore, with WFT KG STRONG.

The line of world champions!

For the 2015 season we have significantly improved the KG STRONG. The now even tighter braid is protected by a new coating for an even better protection against abrasion – a real advantage for deep sea fishing over rocky bottoms, reefs or in areas with many submerged obstacles.

No matter where in the world you fish – you can rely on the WFT KG STRONG. Whether you're spinfishing, deep sea fishing in Norway, Big Game fishing... you name it, this product will not let you down!

Jakub Vagner uses WFT KG STRONG on all his worldwide fishing adventures which are featured and broadcasted in higly expensive NATIONAL GEOGRAPHIC film productions. For all these multi-million dollar productions Jakub Vagner relies on WFT KG STRONG and has set several world records using this too!

WFT KG STRONG Features:

Leadership for Success

A Complex Braid – the 51KG STRONG has been braided from 8 filaments and has been around way before others were introduced to this technology. Woven braid is the key to producing a truly round profile and when done correctly, creating a high knot strength. Round braided line is the future because the round profile will cast far, uncoils nicely from the spool and does not cut into the lower layers on your spool. The round profile will also slow the drift because it has less water restistance.

The WFT KG STRONG is also extremely colourfast. High-quality colour pigments are embedded in a special coating. This technology reduces colour fade by the factor of 10 and prevents abrasion too.

WORLD RECORDS

WFT KG STRONG is also available in Chartreuse. The extremely colourfast KG STRONG Chartreuse is clearly visible above the water, even in bad light conditions. It shares all other properties with the green KG STRONG. Chartreuse is a particularly interesting colour for spin fishing and deep sea fishing. We recommend the EXACT yardage (32KG STRONG 480 m) for ALL WFT Electra 700PR reels and for the WFT DEEP WATER ,N' models. This fishing line is stronger than any fishing rod and any reel drag!

The smaller diameter reduces drift significantly.

Photo © www.soroya-fishing.com Rod WFT GO NORTH TRAVEL, Reel WFT SALZMEISTER Line WFT KG STRONG Multicolor

Our tried and trusted WFT KG STRONG is available in a "TRANS" (translucent) colour version. Many anglers appreciate the advantages of the KG lines for a long time. The "TRANS" colour has established itself with other lines since it is translucent when seen from the fish's perspective and appears almost invisible against the waters surface. It is also less conspicuous at a vertical angle because in the water it changes from "white" to a "milky" appearance, losing its silhouette.

APA

This colour, which is especially popular amongst deep-sea anglers, offers outstanding visibility above the water and up to approximately 1,5 meters under water. This makes it easy to track the submerged line in the water, which can be a big advantage when you are fishing from the boat. You can easily control the line and prevent it from touching the boat hull or tangling with other fishing lines in the water.

TRÒNG

KG STRONG lines are available in various EXACT running lengths for lossless winding of many reels!

WFT GLISS KG is the completely different fishing line from WFT.

The mechanical properties of the WFT GLISS KG are very similar to a monofilament. However, WFT GLISS KG has 4 times the breaking strain of high-performance monofilament! The surface of the WFT GLISS KG is slick, very smooth and perfectly round.

Thanks to its very high dimensional stability and extremely low absorbtion of water WFT GLISS KG lies perfectly on spinning reels and produces a perfect winding contour after each cast. The casting distance that you can achieve easily with the WFT GLISS KG clearly exceeds conventional fishing lines. WFT GLISS KG is almost unlimited UV resistant and highly colourfast.

WFT GLISS KG offers tremendous strength, high abrasion resistance and extreme flexibility for the longest casts. The stretch of WFT GLISS KG is less than any other braided fishing line. WFT GLISS KG replaces monofilament lines for all types of fishing, even in the thinnest diameters. Computer-optimized production processes ensure that you can rely on the technical specifications – which is very important for lines with small diameters.

Chartreuse is a very popular colour for spinning anglers because of its high visibility at low light conditions. However, under the water GLISS KG Chartreuse appears somewhat unsuspicious. Now the GLISS KG Chartreuse is available in a 10 kg breaking strain as well, closing a gap in our existing range.

WFT GLISS KG CHARTREUSE

Item-No.	Ø mm	Breaking Strength	Length m / yds

1D-C 196-025	0,25	19 kg / 42 lbs	2000 / 2190

Computer-optimized production processes ensure that you can rely on the technical specifications – which is very important for lines with small diameters.

WFT GLISS TRANS

WFT GLISS KG TRANS is a semi-transparent line that is virtually invisible under water. In particular, the small diameters of 0,12 or 0,14 mm will enable you to fish in crystal clear trout streams with 4 times the breaking strength of a conventional fishing line.

WFT GLISS KG TRANS

Item-No.	Ø mm	Breaking Strength	Length m / yds
1D-C 214-008	0,08	3 kg / 7 lbs	150 / 165

Computer-optimized production processes ensure that you can rely on the technical specifications – which is very important for lines with small diameters.

WFT GLISS FAST SINKING offers both enormous linear breaking strength and knot strength in the smallest diameters.

It is abrasion resistant and has a very slick surface for long-distance casting. WFT GLISS KG has less stretch than any other braided fishing line. This makes it ideal for feeder fishing. WFT GLISS KG replaces all other braided and monofilament lines for any type of fishing - even in the thinnest diameters!

A little tip: Try GLISS FAST SINKING as a leader material for method-feeder fishing.

WFT FIRST 8KG is our premium new 8-strand braid.

A super new product made using the thinnest UHMPE filaments, manufactured in Japan. Our process uses the latest generation of sensor-controlled German braiding machines. This technology guarantees closest weave and absolute uniform pretension of the filaments during the production process. Therefore, we offer you a unique, multiple stranded braided line with a diameter of only 0,065 mm.

Not only this we guarantee a unique suppleness and premium knot strength. This enables you to cast even the lightest lures long distances with tremendous accuracy. WFT FIRST 8KG's drag is minimal because 100 meters of this 0,065 mm line weighs no more than 1,2 g !

This amazingly slick braid glides silently through the guides due to the new GEL-COAT coating. This can be applied in extremely thin layers - down to 1000-th of a millimeter! GEL-COAT enhances the surface smoothness and abrasion resistance without altering any mechanical properties of the line.

The WFT FIRST 8 KG has the highest breaking strain and knot strength. It is the smoothest braided fishing line that we have ever produced. Due to its superiority in all mechanical properties, we're pretty confident you will never want to use another line again !

Computer-optimized production processes ensure that you can rely on the technical specifications – which is very important for lines with small diameters.

starting from 0,065 mm

- Best visibleness in all lighting conditions,
- but unremarkable in the water
- Extremely quiet when jiggening with shads, even with High-Carbon rods
- Very pliant, but not too soft
- Ideal for fishing with small lures in "Japan-Style

WFT TUNGSTEN KG "SINKING" is our fast sinking braided fishing line.

Coating the UHMPE surface and infeeding the braid with tiny "TUNGSTEN"- particels ensures the fast sinking of WFT TUNGSTEN KG over its full life expectancy. As by the use of tungsten (more than 20 times heavier! than UHMPE fibre), we entirely can renounce using other fibres, for example aramide. This benefits unrestricted knot strength, smoothness and much higher abrasion resistance.

We designed WFT TUNGSTEN KG especially for feeder fishing and several varieties of carp- und groundangling. Due to its fast sinking behave, this line is much less susceptible for irritating by surface flow, wind, waterfowl, boats, bathers and so on..., because it percolates the surface tension of the water faster, even in shallow waters.

Also in deep waters the fast sinking provides attaining elongated mountings on the feeder position. Less retension, faster fit to play ...

Attention!

WFT TUNGSTEN KG "SINKING" is real very fast sinking!!

The use in obstacle waters has to be considered carefully. Particularly at longer retention times the line will sink completely to the water bed and the risk of line hangings rises.

A higher rate of retrieving will remedy.

Computer-optimized production processes ensure that you can rely on the technical specifications - which is very important for lines with small diameters.

CARRIER

The outstanding abraision resistance will give you up to ten times longer durableness than normal braid.*

In spite of this effective abrasion protection we were able to preserve the preferred mechanical properties of this high-class 8-carrier braided line thoroughly. WFT 8 ROCKS KG makes far casts, soaks very less water, slides nearly soundless through the rods guides, has exceptionally knot strength and is highly fade-resistant. Although it is not too soft, so the excellent casting characteristics are granted even in the wind. We recommend WFT 8 ROCKS KG especially for spin- and wobbler-angling in rocky und obstacle rich flowing waters.

- extremely abrasion resistant
- absolutely round
- do not soak water
- for the really rough use at the riverside, that requires all from your equipment
- extremely good casting characteristics
- smooth, but with firm structure
- less susceptible in cross-wind
- very silent at jigging, even with High-Carbon rods
- perfekt for shadfishing
- vest contact for nibbles and strikes

*depending on fishing conditions

WFT 8 ROCKS KG GREEN: An all natural colour. For spooky fish and stricky presentations.

For the manufacture of the WFT SILENT EIGHT KG, we employ the most advanced technology available for highperformance fishing line!

Eight single multifilament threads (made in Japan) are braided extremely tight and permanently colour sealed (plasmafused), without reducing the WFT SILENT EIGHT KGs amazing suppleness.

The WFT SILENT EIGHT shoots almost silently through the guides and produces record-breaking casts without any extra effort. The coating enables the line's inherent stiffness for

detecting even the most tentative bites.

Our tightly woven 8-filament braid also produces top marks in roundness, knot strength, abrasion resistance and durability.

The colour "CHARTREUSE" provides the spin angler with highest contrast and thus perfect visibility on the water. This effect disappears almost completely when the line becomes submerged and therefore becomes very difficult for the fish to detect.

Leadership **WFT** for Success

Silent Eight *B-Carrier* performance braid *TRANS*

The "colour" TRANS is recommended especially for fishing in clear mountain

especially for fishing in clear mountain lakes, reservoirs and rivers where lines with minimal visibility are mandatory, or simply whenever you want to be on the safe side!

The WFT PLASMA KG is a braided line with a breakthrough combination of properties:

Perfectly round and tightly woven, this line provides perfect line lay and casting performance with all fixed-spool and baitcast reels.

The surface of the WFT PLASMA KG is so effectively sealed that the line does NOT absorb ANY water and is extremely abrasion-resistant. The durable surface coating makes the

WFT PLASMA KG glide almost silently through the rings and guarantees maximum casting ranges.

The knot strength, which is on a level with the linear load-bearing capacity, is also outstanding and consistent whatever your knot preferences are. The lasting colour properties are also exceptional. This is achieved by an entirely new method of bleaching protection. The plasma surface treatment ensures the continuous high-end quality of this line.

Chartreuse is one of the most popular colors when it comes to light and medium predator spinning. Exspecially at low light conditons CHARTREUSE stays visible. Combined with our new "LAZER SKIN TECNOLOGY" you receive a super smooth and supple surface previously known before only by 8 carrier constructions. "WFT LAZER SKIN TECNOLOGY" also minmizes abraison and UV related color fade. Great features added to our legendary PLASMA line set the new standards.

The semi-transparent WFT PLASMA KG.

The basic raw material of all WFT PLASMA KG lines is already "snow white", but only after a special bleaching process with a subsequent coating it becomes partially translucent. Not only this, it will stay like this for the entire lifetime of the WFT PLASMA KG!

An exceptional advantage for all kind of angling is dependant on lots of running line, for example when surfcasting or deep sea angling. Multicoloured braid in equal colour lengths make it easier to track the distance you're fishing at and how much line must be retrieved.

By request of many sea anglers the WFT PLASMA KG is available in a multicolor version and also in new lengths of 330 yds.

Color change is every 10 meters (blue-green-yellow-red-orange). So each color is repeated after every 50 meters!

WFT PLASMA KG PINK is specially designed for cloudy weather. A clearly visible color on the surface of the water and is therefore perfect for light and medium freshwater spin fishing for perch, zander or trout.

For use wherever the bites are extremely sensitive.

1D-C 109-035	0,35	32 kg / 71 lbs	3000 / 3280		

Color changes as for diameters 0,10, 0,16 and 0,20 = 5 x 10 m (blue, red, yellow, green, white)

Exactly all 2,5 m color changes as for diameters 0,25, 0,30 und 0,35: 4 x 25 m After 4 colour changes (blue, red, yellow, green) the sequence is repeated.

Accordingly, you can estimate the casting distance, water depth, and line left on the reel fairly accurately by observing the colour of the line released.

Especially for catfish angling we have developed WFT CAT KG.

Although this braid has other uses, we have specifically designed this for catfish. Super strength to diameter ratio and the highest possible abrasion resistance. Catfish prefer waters with many obstacles and sunken snags, therefore a good catfish line has to be robust enough to resist obstacles such as sunken trees, mussel beds and other sharp-edged snags. We use a very special braid process together with an extremely smooth and high quality coating.

Semi-transparent WFT CAT KG trans is nearly invisible under water. WFT CAT KG is the pefect catfish line, spliceable and knot resistant.

WFT CAT KG TRANS (high performance 8-carrier)

Item-No.	Ø mm	Breaking Strength	Length m / yds
1D-C 916-040*	0,40	35 kg / 78 lbs	300 / 330
1D-C 916-050	0,50	60 kg / 133 lbs	300 / 330

* 0,40 = 4-carrier

Computer-optimized production processes ensure that you can rely on the technical specifications – which is very important for lines with small diameters.

WFT TARGETFISH 8

Our newest 8 strand round-braided fishing line. The WFT TARGET FISH 8 is particularly attuned to certain species and fishing conditions.

Thanks to the 8 strands TF8 is incredibly supple without being too soft. It glides silently through the guides. This braid

achieves maximum casting distances and superb strike detection because of its low water-absorption.

TARGETFISH 8 PILK

The WFT TARGETFISH 8 is developed for light to medium pilk fishing. The yellow color ensures optimum control. This is especially important when several anglers are fishing in tight corners from the same boat.

TARGETFISH 8 KARPFEN/CARP

Black lines have proved their worth over years in carp fishing. The WFT TARGETFISH 8 offers optimal casting features as well. And "black" just looks good on any reel.

Very inconspicuously coloured line for groundfishing for eels and zander. Smooth but strong.

TARGETFISH **3** SURF & DEEP SEA

Multicolor is becoming increasingly popular. Even without a line-counter you have a perfect clue in which depth you fish, how much line is still on the reel, or, how far out you are fishing. With a color change of 5×10 m the color, with which one started, appears again after 50 m, 100 m, 150 m and so on. Ideal for deep sea and surf fishing.

TARGETFISH 8 SURF & DEEP SEA MULTICOLOR

1D-C 450-050	0,50	48 kg / 105 lbs	2000 / 2180

The WFT TARGETFISH 8 FEEDER offers best casting distance and, despite its suppleness, has no tendency to create birdnests - even on large

reels. The dark red color can be seen well in all situations.

Our WFT TARGETFISH 8 DEEP SEA is unobtrusively green. Especially in crystal clear water, as in Norway, the inconspicuousness of the line is very important to many anglers. This line is also very supple and soft in the guides.

BLUE WATER IGFA

WFT BLUEWATER IGFA is a superb monofilament, configured to IGFA standards. A prerequisite for registration of IGFA world records. WFT BLUEWATER IGFA line is very visible in the surface – very important when trolling with long lines! Due to a special UV filter coating, WFT BLUEWATER IGFA has an excellent UV resistance.

Perfect abrasion resistance and high knot strength. Ideal for using with WFT BLUE WATER reels on page 41.

TUFF STUFF FLUOROCARBON

Pure fluorocarbon leader material. It has almost the same refractive index as water and is virtually invisible to fish. Fluorocarbon is heavier than water and therefore sinks rapidly.

Running length of 50 meters.

5 x 15 m crystal clear leaders on one spool.

These leaders can be easily knotted to your monofilament or braid main line. The WFT TAPER LEADERS were developed for surf fishing. Crystal clear, very supple and abrasionresistant, gradually tapered before getting to 0,57mm.

Without any knots this allows for maximum casting power and distance. Depending on the diameter, the WFT TAPER LEADER is also suitable for carp and feeder fishing.

WFT TAPER LINE is designed for surf fishing. This line is crystal clear, very supple and abrasion-resistant, gradually tapered on the last 15 meters before getting to 0,57 mm. Without any knots this allows for maximum casting power and distance. Depending on the diameter, the WFT TAPER LINE is also suitable for carp and feeder fishing.

opple long-cast high pet

This high-performance monofilament has been specially developed for trout fishing.

The line is crystal clear and almost invisible in the water. The mono has a particularly good knot strength and suppleness, which is second to none and will set new standards. With the WFT TROUT MONO you have mono that does not spook the fish, perfect for casting at distance, less resistance when the trout takes line from the reel and also a line with optimised stretching characteristics to land the fish safely.

FLUOROCARBON

PENZILL Fluorocarbon has been developed specifically for spin fishing. This high performance fluorocarbon is crystal clear, has excellent abrasion resistance and a high knot strength. It has a rigid profile which prevents tangles when casting and avoids getting stuck between rocks. A smooth finish making it perfect for knotting and when fishing with small lures. Fluorocarbon has same refractive index as water. PENZILL Fluorocarbon has a crystal clear finish, making it nearly invisible underwater.

Available in two lengths:

- 200 m perfect as mainline for your reel
- 100 m on a dispenser spool. Perfect for use as a leader material.

The dispenser spool ensures easy removal of the leader and stops it falling off the spool and tangling in the lure bag.

There are two variations of PENZILL Fluorocarbon:

PENZILL Fluorocarbon STRONG is uncompromising in strength and PENZILL Fluorocarbon SMOOTH, a softer alternative.

TIELFIECH MONOFILHMENT

STRIKE PRO Fishing Lures since 1973!

STRIKE PRO's commitment to quality is legend. STRIKE PRO has been in the fishing industry for 29 years and has established a proud reputation all over the world. STRIKE PRO founder and CEO Michael Tsai, enjoyed fishing and spending time outdoors. So far, he has produced 485 different models of fishing lures with 4,000 different colors. Together with his team STRIKE PRO creates highly effective and modern lures that will cover all fishing situations.

The TrueGlide GUPPIE has been the gold standard for custom glidebaits since 2002.

IKE PRO

Due to the shape and precision weighting, the GUPPIE glides with ease on the lightest tap of the rod. Flashing it's sides and wobbling with a slight belly wobble on each pause. Even a straight retrieve sends the GUPPIE on an exaggerated s-curve that drives big fish crazy!

The GUPPIE's compact shape ensures that hook coverage is always maximized. While the convex body shaping from the top to the belly exposes the hook points for better hook sets. The body profiling also adds extra flash and belly roll.

BUSTER JERK is an extremely versatile predator catching machine. With a simple retrieve this jerk swims from side to side and with little movements of the rod you can add glide and side-flashing action.

Extremely effective throughout the season in all pike waters, fresh or at sea.

Deadly side-to-side action with hot "belly flash". This is also a great lure to crank. Rip, twitch, pull, or jerk ...just remember to pause in any combination.

It's the easiest and best glide lure you've ever worked! Runs to 1-3 meter.

STRIKE PRO

PIG SHAD is a soft-plastic shad inspired by the classic jerkbait The Pig. PIG SHAD has a seductive rolling action while the head is rocking from side to side. The tail paddles and twists in a low frequent rate.

A perfect imitation of an injured baitfish that slowly trudges forward with its last bit of strength! PIG SHAD has a unique profile that resembles a fat baitfish. Incredible rolling action. Slow retrieve works best.

PIGLET SHAD is molded with two densities of PVC. The belly half of the bait is salted which makes it sink belly down with more balance and stability in retrieve.

The rounded paddle tail of the PIGLET SHAD results in a slight belly-flash. If you want a more steady swing to it, trim

the upper and lower part of the paddle with a pair of scissors. It also has a swimming action created by the articulated tail section of the body.

PIGLET SHAD has a slot in the back as well as in the belly for easy rigging and higher hook-up ratio when texas rigged.

HALI BANDIT is a soft body swimbait for halibut, cod and coalfish. The slim "Bandit"-profile of this lure gives it an amazing belly flash swimming action that similar lures don't have. In addition, HALI BANDIT cuts through the water, thanks to the slim body profile, sinks very fast, and can be used in heavy current! Try HALI BANDIT for trolling as well. It comes rigged with a "Paddle Tail" body. The total weight of the HALI BANDIT is 360 g. The jighead, weighing 290 g, has a super sharp and super strong saltwater grade hook and an extra eye for attaching a stinger rig.

C204

C205

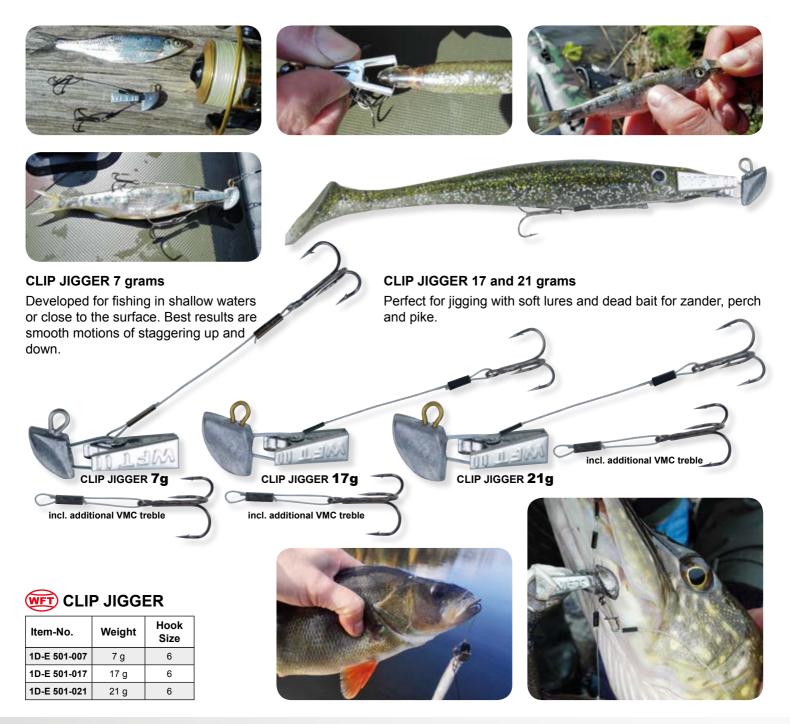

Very easy to use but genius in design. The CLIP JIGGER is a combination of a jig head and a metal-clip. It is developed for spin fishing with dead bait. Defrosted dead bait will also stay locked at the CLIP.

When tested, the results were very impressive! The VMC treble hooks will hook lightly under the skin to prevent bait getting damaged and ensure positive hook-ups. In testing, 5

pike were caught with only one dead bait!

The Clip Jigger also could be used with soft lures. It enables the soft plastic bait freedom of movement due to minimum restriction. There are no bait limits for this system: Night crawler, fish, plastic foil or wool for example.

Includes an additional VMC treble hook with a short shank. If needed, it could be placed near the head of the bait.

The brand "ORIGINAL RUBLEX SPINNERS" bails for 50 years fabrication experience in France.

100% Made In Europe, all trebles made by VMC.

RUBLEX STRIPE

Its long modelled blade rotates very close to its shaft and generates a perfect twist, even by very slow retrieve. Hook with quick release system.

The illustration of spinner with hooks nearly match originals size.

Ever since decades RUBLEX[®] spinners rank among the most successful spinbaits worldwide.

Nº 3

Those french spinners and blinkers were produced for 100% by strict quality requirements in Europe. The ennoblement for spinnerbody and spinnerblade is identical with the german "State Of The Art" 100% silverplating for jewellery. So we can assign those unique lures accurately the desired attributes in brilliance and reflection. Steady quality for colour, weight and manufacturing arrange for a long lifetime and guarantees, even your special favourite lure can be reproduced and replaced in any case if you may lose it.

CELTA LONG

Nº 1

RUBLEX CELTA LONG

A newcomer in the CELTA-family. Its blade is modelled like a willow leaf and rotates very close to the shaft. This is ideal for deep and fast

running waters. With integrated antitwist system and hook with quick release system.

Once MEIHO, always MEIHO.

MEIHO box-systems are becoming more and more popular. For over 50 years MEIHO produces well-conceived fishing tool boxes in Japan. Exclusively made from first raffinate raw material that guarantees the best quality with maximum breaking resistance, accuracy of fit, form stability and UV-resistance. Thanks to precision workmanship drawbacks like mixed-up items in the boxes or unintentionally opening lids are problems of the past. All hinges and locks are constructed for long-term reliability. All boxes have soft edges for protection against damages. With passion for detail MEIHO has not only developed a box-in-box without comparison but also many more innovative improvements, like their MICRO DIVIDER SYSTEM, which provides a compartment subdivison that is accurate to the millimetre and allows for optimal space utilization. Many boxes come with one long locking mechanism instead of two tiny clips. This provides a lot more stability and it enhances operability at the same time. MEIHO has even constructed a toolcase that does not open up even though one has forgotten to close the locks. The incredible variety of options and features may appear a bit confusing at the first glance, but it offers such a great possibility to individualise your boxes to match exactly your personal needs.

MEIHO's success proves they are doing right: Once MEIHO, always MEIHO.

MEIHO QUALITY FEATURES

- Only top Japanese quality
- Guaranteed only refined raw materials
- Extremely break-resistant even in sub-zero temperatures
- Perfect fit for lids, dividers, etc.
- All metal parts (hinge pins, etc.) made of stainless steel
- Good dimensional stability even under high loads
- Large carrying handles for convenient handling
- Safe-closing fasteners to prevent accidental opening
- Perfect design, among other things, not even the smallest parts can get mixed up as the box is closed
- Extremely clean processing
- Polished shapes for super-smooth and contaminationresistant surfaces

MULTI FUNCTION BOXES are getting more and more popular. Many anglers appreciate the versatility of these well thought out Box-Systems. Everyone can customise these stable boxes due to its large range of accessories. They are not only for spin and boat fishing but for coarse, feeder and trout fishing at put 'n' take waters. Depending on the size, the boxes will also double up as a seat.

MEIHO MULTI FUNCTION BOXES VERSUS VS-7070 + VS-7055, VERSUS WAVE VW-2070 + VW-2055

Sturdy seatboxes made from impact resistant polymer plastic. Can either be used as an extremely tough pilkboxes or as perfect spinnerboxes for the hiking spinfisher. Angular shape for easy onboard stowage. Four rubberized footpads eliminate vibration noise and prevent slipping. The trout fisherman is pleased with the flat table that sits on top of the broad handle.

An oversized transparent lid-compartment with adjustable dividers holds leaders, pliers, swivels and many more items neatly organized in place. All compartments have safety-locks. Can be fitted with up to 4 rod holders, a shoulder strap and a variety of accessories (accessories, rod holders and shoulder strap not included - see pages 174 and 175).

SPECIAL FEATURE: THE TOP BECOMES A TABLE

ACCESSORIES Complete program on pp. 174-175

The tops of these four MULTIFUNCION BOXES can be used as a stable table. In the folded-up state, the carrying handle serves as a foot and stabilizes the ..table" reliably. An extremely handy feature.

MEIHO VERSUS VS-8010

One of the biggest tackle cases in the MEIHO range. Made of extremely durable polymer plastic and reinforced with side frames. Hinges and fastener supports are made of stainless steel. All fasteners are secured against accidental opening so that everything stays put, even on rough seas or bumpy car rides. The four spacious drawers can store a well-equipped assortment in their practically divided compartments if necessary.

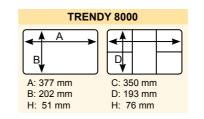

⁴²⁰ x 245 x 326 mm weight 3.490 g Item-No.: 1D-F 300-420

MEIHO TRENDY 8000

Large tackle box made of extremely resistant polymer-plastic with reinforcing side frame as well as hinges and fasteners made of stainless steel. All locks are secured against unintentional opening. The spacious upper compartment and two large drawers offer plenty of space in their intelligently divisible compartments.

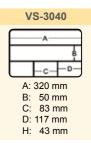

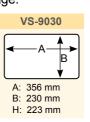

420 x 245 x 326 mm weight 2.840 g Item-No.: 1D-F 300-422

MEIHO VS-9030

Four variably-divisible MEIHO VERSUS VS-3040 boxes with practical carrier and locks. Thus, even if it falls over, nothing falls out of the boxes. Perfect for storing and transporting wobblers, pilks, etc. Carrier with drainage.

equipment not included

Includes:

4 x MEIHO VS 3040 + Carrier.

Dimensions Carrier: 378 x 250 x 230 mm Item-No.: 1D-F 350-378

The VERSUS VS-3080 is MEIHO's flagship product and one of the most practical tackle cases around. The transparent polycarbonate top cover allows you to see the fully customisable configuration easily. With the micro-ribbing system in the upper case, each small angle can be used by changing the dividers. The BOX-IN-BOX components from the MEIHO program fit exactly into the compartments. In the extremely spacious base compartment, which is also freely dividable, you can also fit larger items such as fishing reels.

TELES (**MEIHO** CLEARBOX SERIES

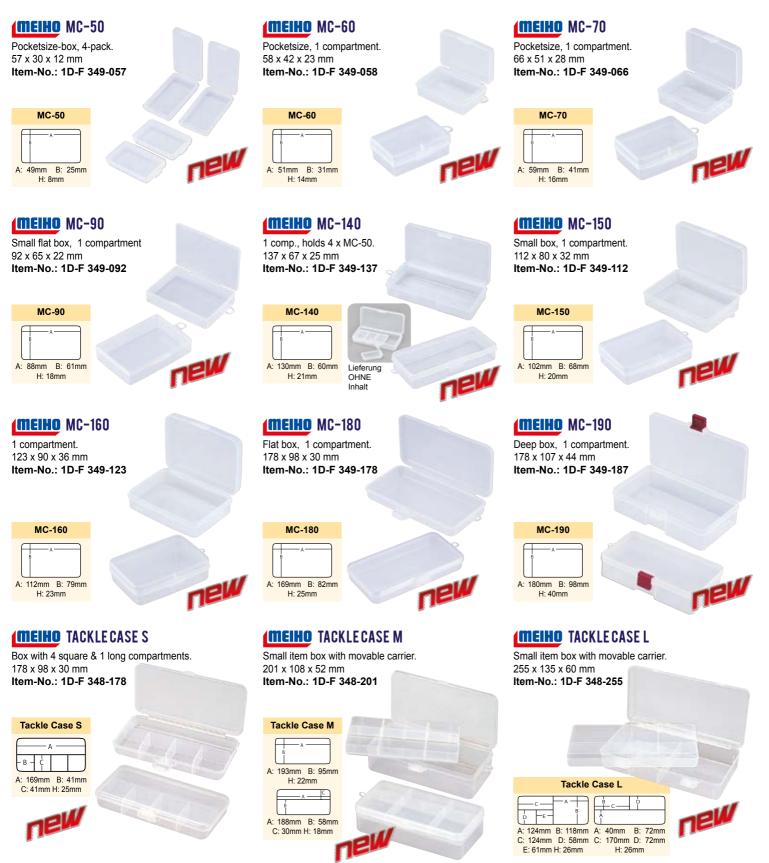

The MEIHO range of clear lure and parts boxes ranges from the smallest "pocket-size" box to midsize tackle cases. Many boxes fit into each other (BOX-IN-BOX), resulting in meaningful combinations, for every conceivable application. From feeder fishing to spin fishing to sea angling.

In these boxes each angler stows his items from the biggest lure to the smallest splitring - well sorted, protected and always ready to hand. The transparency of the boxes helps as well: You immediately see what you are looking for!

MEIHO LIVEWELL SERIES

MEIHO AYICAN CYCLONE

Ingeniously designed container for transporting and keeping fish alive.

Due to the special current wedge, a commercially available oxygen pump (not included) generates a one-sided water current, which the fish instinctively oppose, without swimming around and unnecessarily touching each other. At the same time, fish are always supplied with sufficient oxygen. Very gentle in comparison with other methods, can also store fish for extended periods. Stable positioning due to rectangular shape, very tightclosing double lid. Option to connect to a second oxygen pump to generate

an even greater current. 297 x 180 x 126 mm volume 10 l Item-No.: 1D-F 359-383

(MEIHO IKIESA BAG

Special container for the live storage of shrimp, crabs and other live bait. A commercially available oxygen pump (not included) ensures permanent oxygen supply via the integrated sparkling stone. To cool the water, you can add crush ice or ice cubes to the integrated ice box. The IKIESA BAG has an easy-to-clean interior basket, a bracket for the included scoop net, tightly closing lids for the bait removal opening and the ice box and an adjustable shoulder strap.

300 x 190 x 200 mm volume 7 l Item-No.: 1D-F 359-300

MEIHO VERSUS E-6550 SOFTBOX THE PERFECT SPINFISHER'S BOX!

Reintroduced to our programme by popular demand!

A solid hybrid between a box and a satchel with a large capacity. A built in metal frame, rigid base and an overlapping flap provide this box with a stable shape despite its low weight. Extraordinary for a box of this construction type! This is the ideal box for the spinning angler, on the bank as well as in the boat. It comes with an adjustable divider, an exterior pliersholder and a strong shoulder-strap. The box has no-skid rubber feet that prevent the box from slipping in the boat. The main compartment is splash-water proof.

Dimensions fit for e.g.:

3 x VS-3043NDD plus 1 x VS-3010ND

5 x VS-3043ND plus 1 x VS-3010ND

Leadership **WFT** for Success

The series of WFT PROFI COOLERS are extremely robust – will carry up to 300 kg!

They have a waterproof seal and include the same stainless steel fittings as the WFT MULTI COOLER. All three PROFI COOLERS include an outlet valve and integrated carry handles on both sides for easy transportation. This is the ideal COOLER for everyone who travels afar to Norway or to the Ebro by car. It's also perfect for travelling by plane as they are so stable. It's also no problem to store them in a fridge as are stable when fully loaded.

WFT PROFI COOLER are made from extremely shock-proof plastic - almost everlasting!

WFT MULTICOOLER

The WFT MULTICOOLER is an extreme practical and multifunctional carry cooler- and seating. Made from shockresistant polypropylene the WFT MULTICOOLER are up to all your requirements. The double wall construction allowed a circular, up to 2,5 cm thick rigid foam insulating material. Like this, cold stuff stays cold and warm stuff stays warm and baits are protected from heat or cold. By the multifunctional additional options like for example with the MEIHO boxes, the WFT MULICOOLER will become the "better" fishing box and is easy to carry with the enclosed circumferential carrying strap. By its power rating from 100 kg the WFT MULTICOOLER is the perfect, robust seating. The WFT MULTICOOLER is by its smooth and pore-free surface of the inside food safe and easy to clean.

SEAL A doubled, circular waterproof sealing, which prevents water from going out or in.

NON-CORROSIVE All WFT MULTICOOLER come with stainless steel fittings which are fixed with stainless steel screws.

RETRACTABLE With a recessed handle, the MULTICOOLER offers a comfortable and stable seating surface.

SHOULDER STRAP Circular super tough nylon carrying strap - quad guided - avoids the tipping of the box whilst carrying.

CLIP-IN BASIN Clip-in basin (dishwasher proof) to store for example the bait separate with easy access.

LID STOP A built in lid stop stops the lid at 100° and prevents it from accidentally flipping over.

Equipment not included

PUMP ATTACHMENT Fixed clip on the box to store the WFT MULTICOOLER air pump for transport.

FEEDTHROUGH Custom-fit feedthrough for the air pump hose.

ALWAYS SAFE! The feedthrough for the hose of the oxygen pump can be closed with the captive plug. It also takes the pressure relief on air travel.

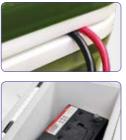

WET MULTICOOLER AIR PUMP

Powerful 2-step membrane pump to run optional with 2 AA batteries or the enclosed 12 Volt car adaptor. Circular rubber seal and stainless steel strap to fix on the WFT MULTICOOLER. Including 0,7m silicon hose and weighted exhalation stone.

Item-No: 1D-F 920-000

TIP: OPTIMUM PROTECTION Cold temperatures can drain your batteries and lower the efficiency. By the use of the efficient isolation of the WFT MULTICOOLER your battery will stay perfectly protected. The built in valve takes care of the pressure relief.

Grating for 12 L Cooler Item-No.: 1D-F 930-012

PLASTIC GRATING

12 mm high, filets do not sit in the wet!

Grating for 18 L Cooler Item-No.: 1D-F 930-018

WET MULTICOOLER 28L WHITE

The 28L WFT MULTICOOLER comes with every feature. With 2 or 4 robust built in rod holders for easy transport of rigged rods, it can also be used for safe rod storage when on a boat.

Warning - Only this article comes without the custom hose feedthrough for the air pump!

Welcome to a world of silent motoring on the water.

WATERSNAKE's electric outboard motors have been used 100,000 times around the world for decades and have been specially designed for fishing. High quality materials, exclusive design and precise manufacturing make these motors durable, reliable and easy to operate.

WATERSNAKE T18 KAJAK

Jarvis Walker WATERSNAKE T18 motor has a unique and patented system which makes it easy to fit to all models of kayak. The motor holder is secured by screws to the kayak and ensures quick release or quick attachment of the motor in seconds. This system is equipped

with a longer tiller handle for more control. The motor is very light too! The units low weight of 3,5 kg doesn't affect the dynamic of the kayak.

WATERSNAKE T18 KAJAK

max. Thrust	18 lbs
Volt	12 V
Shaft Material	Steel
Shaft Length	24" / 61 cm
Overall Length	33" / 84 cm
Propeller	2 Blade
Weight	3,5 kg
Item-No.:	1D-J 101-018

WATERSNAKE ASP T-18 FRESHWATER

The ASP T-18 Freshwater motor is the smallest in the WATERSNAKE range and is ideal for powering kayaks and canoes.

WATERSNAKE has added 12V powered 18lbs thrust. The Jarvis Walker engineers have done a remarkable job to design this motor utilizing a very low unit diameter to make it extremely light. The ASP features a high or low speed control, forward or reverse switch in a very easy to use scheme, includes 2 forward speeds and 2 reverse speeds. Also it has a stow away handle and a two-blade propeller.

ATERSNAKE

AJVANCE

The ADVANCE SWAD-TV54 features the "Quick Shift Rotating Head", a "7-Step Tilt Design" that provides you with an edge for success on the water. This model is available in 54 lbs thrust.

This electric motor is powered by infinite variable speed control forward and reverse.

The ADVANCE SWAD-TV54 has a strong, durable steel shaft and alloy transom mount brackets. An LED battery meter is formed into the top of the motor head so you always know your remaining battery power.

You can position the head in any direction within 180° degrees, control the height of the tiller with the ADVANCE Tilting Head in seven positions and feature a fast tilting lever by the transom mount with multiple tilt positions and an adjustable hight adjuster.

WATERSNAKE

PROPELLER KITS

WATERSNAKE propeller kits each contain 1x propeller, 1x propeller nut and 1x shear pin. It is recommended you keep a propeller kit on your boat at all times.

2-BLADED PROPELLER KIT 18 - 24 lbs Item-No.: 1D-J 000-001

3-BLADED PROPELLER KIT 28 - 34 lbs Item-No.: 1D-J 000-002

3-BLADED PROPELLER KIT 44 - 54 lbs Item-No.: 1D-J 000-003

PROPELLER ACCESSORY KIT

A very handy kit and we suggest keep one at all times. Consists of a propeller nut wrench and shear pins.

Item-No.: 1D-J 000-005

50 AMP FUSE KIT

We strongly recommend the use of an in-line fuse kit to protect your motor from shorts and electrical problems that can lead to overheating of circuit boards in your motor. Fuse kits com with a 50amp fuse and are completely waterproof. A simple to install essential accessory.

Item-No.: 1D-J 000-006

CURCUIT BREAKER

The circuit breaker activates in situations where your motor becomes over-loaded or locked up. Disconnect the motor from the battery and locate the fault. Once the fault has been located and repaired, push the reset button on the side of the circuit breaker.

Item-No.: 1D-J 000-007

Rod- and Reelcare Products

When it comes to maintaining and looking after high-quality fishing tackle, ARDENT "Made in the USA" is the no. 1 choice : top-quality care products for your top reels.

Maintains function and value through reduced wear - saves money on expensive spare parts and repairs.

Corrosion resistant performance pliers, equipped with a pair of tungsten carbide cutters built specifically for braided & mono lines; even good enough to cut trace wire. The coated carbon steel jaws are what every salt water angler needs and the pliers come with their own embroidered ARDENT pouch and heavy duty, coiled nylon lanyard. Spring loaded jaw to help hold them open making them easier to use when you are trying to unhook a mad fish.

Item-No.: 1D-F 800-051

Set with 7["] fillet knife, made from 420 Stainless steel, serrated backbone blade, 22 inch folding cutting board with mesh glove and blade cover.

ARDENT PRO OVERGRIP

The ARDENT PRO ROD OVERGRIP is a reel seat cover for your rod.

The super-soft material feels very comfortable and covers all metal components on your reel seat, giving you more grip whilst protecting your hand from the cold.

The material is extremely elastic and is perfect for most rods. Prepare the PRO ROD OVERGRIP with a washing up liquid soap/water mix and slide or twist the Overgrip into position, then add your reel. There are two variations:

Item-No.: 1D-F 800-061

Item-No.: 1D-F 800-060

ARDENT

ARDENT REEL BUTTER BEARING LUBE

Synthetic running oil specifically for ball bearings. A MUST for baitcast reels to ensure 100% lubrication and casting performance, protects against corrosion, high penetrability.

Item-No.: 1D-F 800-006

ARDENT REEL KLEEN

A universal reel cleaner, removes grease, oil, and dirt, protects against corrosion, and dries completely. Always use before the big inspection!

Item-No.: 1D-F 800-005

ARDENT REEL SUPREME 7,1 ml

The best high-tech micro-lubricant with anti-corrosion effect. Reel Supreme removes oil, grease, and dirt from all surfaces and forms an extremely smooth surface from microscopically small particles, which is significantly more long-lasting than any conventional

lubricant. Perfect for the reel axis, line rollers, and crank handle.

Attention! Use only in very small quantities.

Item-No.: 1D-F 800-016

ARDENT REEL BUTTER OIL

Fully synthetic reel oil, resin-free, super high lubricity, temperature resistant - damages no plastic material.

The KING of oils!

Item-No.: 1D-F 800-003

ARDENT REEL GUARD

Special anticorrosion protection for fishing tackle. Simply spray rod, reel, rings, reel rings, etc. after fishing. Salt and other contaminants have no chance. No need to rinse or rub reel guard - it is selfcleaning!

Item-No.: 1D-F 800-009

ARDENT LINE CONDITIONER 59 ml

High-tech care for all fishing lines. Whether mono or braided, ARDENT LINE CONDITIONER increases surface smoothness, casting range, and the life of the line by reducing abrasion. In addition, individual line strands on the reel spool do not stick to each other, and thus are

more easily released during casting.

Item-No.: 1D-F 800-008

ARDENT REEL BUTTER GREASE

Fully synthetic reel grease adheres to all metals and plastics, noise-reducing, anticorrosive.

Item-No.: 1D-F 800-004

ARDENT REEL KLEEN SWABS

Synthetic soft foam tips, solventresistant and without self-abrasion, ideal for cleaning gear parts or difficult-toreach reel parts.

Item-No.: 1D-F 800-015

ARDENT RIGGER

ARDENT's clever multi-function tool for anglers ! Includes line clipper, jig head piercer, hook sharpener, line cutter, and knot binder. Thanks to ergonomic design many functions can be used with one-hand.

ARDENT CLEANING KIT FRESHWATER

The "no. 1 aid kit" for your high-quality reel. Contains the most important products from the Ardent range: REEL KLEEN, REEL BUTTER OIL, REEL BUTTER GREASE, the precision screwdriver and chemical-resistant micro brush, soft cloth, and foam tips.

ARDENT SCREEN CLEAN 59 ml

Special ARDENT monitor cleaner for echo sounders, GPS, digital cameras, MP3, PDA, etc.. Alcohol free! Dries completely streak-free. Includes microfiber cloth to remove stubborn dirt.

Item-No.: 1D-F 800-017

ARDENT CLEANING KIT SALTWATER

In addition to the ARDENT freshwater kit, the ARDENT REEL GUARD corrosion protection is included.

Your high quality salt water rollers will thank you for this care with many years of faithful service. And for the small kit there is a place in every travel bag.

Item-No.: 1D-F 800-002

ARDENT PRO PART CLEANER 236 ml

Synthetic soft foam tips, solvent-resistant and without selfabrasion, ideal for cleaning gear parts or difficult-to-reach reel parts.

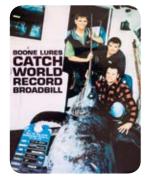

The ARDENT cleaner can be refilled several times (up to 10x) and reused.

BOONE RIGGING KIT

RIGGING KI

BOONE, the legendary American brand, available exclusively from WFT.

For over 50 years, BOONE has dominated the world market for high-quality trolling lures, rigging tools and accessories. Practicality is always the driving force behind its development. The effectiveness of catching fish is down to the high-quality components such as MUSTAD hooks used for rigs and bait and the stainless steel crimping tools and fishing pliers.

BOONE STAINLESS STEEL CRIMPING TOOL

This tool is for crimping double brass sleeves and aluminum sleeves. With mounting point for small to medium sleeves. A defined pressure point prevents damage to the leader material.

<BOON

Item-No.: 1D-F 700-000

BOONE UNI. SNAPRING PLIERS Stainless steel, length 15,2 cm Item-No.: 1D-F 700-005

BOONE FISHING PLIERS Stainless steel, length 20,3 cm Item-No.: 1D-F 700-010

FULL HD

POLARIZED SUNGLASSES

HighDefinition + HighContrast ENLIGHTEN for target objects

PENZILL polarized sunglasses are optical instruments of premium quality with superior ergonomics and wearing comfort. The frames are individually adjustable.

The FULL HD models are equipped with an amazing feature. A special filter technology superelevates the perception of signal colours! This special feature enhances the visual control of your float antennas and fishing lines even in diffused light conditions. All PENZILL polarized glasses are supplied with a protective hard case and a retainer strap.

DENTILL FULL HD SKELTON

Lightweight sunglasses with polarized FULL HD lenses. The SKELTON frame has side openings next to the glasses and in the temples for a good air circulation, which counteracts the fogging of the glasses in particularly warm weather.

Supplied with hard case and a retainer strap. Fit: large - medium.

Item-No.: 1D-F 905-001

PFNTILL FULL HD ADJUST

Lightweight sunglasses with polarized FULL HD lenses. The temples of the ADJUST can be individually adjusted in height resulting in a perfect horizontal fit for your maximum comfort.

Supplied with hard case and a retainer strap. Fit: large - medium.

Item-No.: 1D-F 905-002

PFNTILL FULL HD FOLD

Lightweight sunglasses with polarized FULL HD lenses. Thanks to its foldable temples and the foldable frame, the FOLD can be folded to the smallest possible extent. It fits into the smallest shirt pocket.

Supplied with hard case and a retainer strap. Fit: large - medium.

Item-No.: 1D-F 905-003

PENTILL FULL HD CONVI

The CONVI has polarized FULL HD lenses and a tight-fitting frame. Rubberized frame edges in the temple area shield the eyes particularly well against the wind. Highly recommended on windy fishing trips and for fast boat rides.

Supplied with hard case and a retainer strap. Fit: large - medium.

Item-No.: 1D-F 905-004

DENTILL FULL HD COMFORT

The COMFORT with polarized FULL HD glasses with its flexible frame and extremely flexible temples made of a special plastic provides excellent wearing comfort. The rubberized temples ensure a reliable hold.

Supplied with hard case and a retainer strap. Fit: large - medium. **Item-No.: 1D-F 905-005**

SCHWARZ-ROT-GOLD WF1

Stylish, and modern polarized glasses with high UV protection. Complete with neoprene strap, lens cloth and hard case with carbon optic. Fit: medium - narrow.

Item-No.: 1D-F 905-101

Polarized glasses with decent matt-camou-snake-design with high UV protection. Complete with neoprene strap, lens cloth and hard case with carbon optic.

Fit: medium - narrow.

Item-No.: 1D-F 905-102

CONDOR FISHFINDER

Condor HIGH TECH FISHFINDER

The Condor 242 DC and F-238 are extremely easy to use. Their intuitive menu invites users to try out all functions because, thanks to its clear menu structure, vou are never worried about getting lost in the menu.

All settings are stored in the device even after shutdown. No settings that have been changed are lost when you turn the device on again. The large 4.3" screen offers excellent readability from any angle, in any light - even with polarised alasses!

MultiPulse Technology

Both fishfinders have the following features:

- Sophisticated fish-recognition software that shows suspended targets, such as fish, on the screen as symbols with a digital depth readout
- Large easy-to-read digital depth, temperature and voltage readouts
- Automatic range control
- InstanTrack shows in a column at right the instantaneous sonar returns in the form of signal-strength indicator bars
- Alarms: shallow water, fish, low battery
- Dual-function gray Shadeline bottom display, providing useful information about the nature of
- the water bottom - High-intensity, fully dimmable backlighting
- Adjustable chart speed

- Stable memory retains all settings
- Hydrodynamic transom-mount transducer, with built-in temp probe, standard feature and suitable for high boating speed
- Outstanding depth performance, thanks to the high-sensitivity receiver, capable of revealing even the weakest echo signals from the column of water below the boat
- Single-plug connector, for fast installation and removal
- Compact waterproof housing
- Incl. Simulationsprogramm
- Display 190 x 110 x 98 mm

Item-No.: 1D-F 100-238

- Comes with display unit, transmitter, cable, transmitter mounting kit and English manual

- The dual-frequency technique provides a highly detailed picture and covers a larger area.
- The precision of the 20° beam angle provides high-precision signals, for detailed images of fish, structures, and the seabed profile. - The 60° angle of substantially
- expands the search area and enables you to find fish quicker.

The 60° beam angle provides a search field with a 1.15 fold diameter of the water depth.

183/200KHZ 3

242 dr

Item-No.: 1D-F 100-242

120

Sturdy mounting base for installation on board or in the CONDOR sounder bag (1D-F 100-015)

* Englisch, German, Spanish, French, Italian, Portugese, Dutch, Norwegian, Swedish, Dänish, Finnish, Polish, Ungarian, Russian, Turkish, Greek, Korean, Japanse, Chinese

* English, German, French, Italan

software, the Condor F-238 represents all identified targets as fish symbols and provides an exact depth indication for each one. Experienced users can of course disable this function at any time and display the signals actually received instead (fish crescents).

Thanks to its modern

recommed the WFT SUPER LITHIUM AKKU for CONDOR fishfinders. Item-No.: 1D-A 800-088

CONDOR SOUNDER BAG

Robust echo sounder bag in waterproof Cordura. Can be opened from the front and rear, robust zippers - high stability! Inner foam padding for safe transportation of all CONDOR echo sounders. A transparent splashguard for the front cover can be rolled out when needed and secured with velcro. A perfect transportation bag, a practical and protective container for your CONDOR echo sounder.

Item-No.: 1D-F 100-015

CONDOR POWER FILTER

The boat battery is charged by the boats alternator. Alternators can produce load peaks reaching over 180 Volt. Even if those peaks are very short (usually a few milliseconds) they could damage the main switch of the sounder, who cant tolerate high voltage. The CONDOR POWER FILTER serves as an overload protection purging all voltages over 18 V. By a permanent capacity overload the safety fuse of CONDOR POWER FILTERS will burn through, while the CONDOR fishfinder is protected always. More commonly in Europe, used outboard engines rarely possess alternators with overload protection.

Item-No.: 1D-F 101-010

CONDOR TRANSDUCER MOUNT TELE

Ruggedly built telescopic transducer mount with a square profile, infinitely adjustable from 80 - 130 cm. Extremely strong rail clamp, up to 110 mm wide. The transducer fit is optimized for CONDOR fishfinders – easy-as-pie-assembly with an included screw.

Item-No.: 1D-F 100-012

a

CONDOR TRANSDUCER

Robust aluminium transmitter rod, 125 cm long, also suitable for boats with high freeboard height such as diesel fishing boats, highly stable rail clamp with up to 140mm wide slot, which can also be

mounted horizontally. The transmitter slot is optimised for CONDOR echo sounders - easy installation with the included screw.

Item-No.: 1D-F 100-010

For all CONDOR range transducers. Easy mounting without holes or screws.

Item-No.: 1D-F 100-200

CONDOR TRANSDUCER MIRROR HOLDER

Item-No.: 1D-F 108-000

CONDOR TRANSDUCER MOUNT

Same as 1D-F 100-010, but with railclamp up to 40 mm.

Item-No.: 1D-F 100-009

THE SECRET OF THE SEA Catch fish like other fish do - without batteries!

Catch More Fish...Guaranteed!

Get the light that makes fish bite! The ESCA Lure Light is an amazing saltwater game fish attractor.

It uses the power of bioluminescent light to draw fish in from long distances in both daylight and nighttime fishing conditions. It makes its own power using salt water.

The light frequency is the same as other sea creatures that create light, like shrimp, squid, jellyfish and krill...all prime food sources for game fish.

And it creates an electromagnetic field that fish sense as a living creature, so when they bite, they hang on. ESCAs come in two colours: blue and green.

The most common colours on aquatic life, and in two patterns...fading and fast blinking.

Use the green in stained water and the blue in clear water conditions.

These are amazing, and ESCA guarantees you'll catch more fish.

Use it in combination with your favorite lures and live bait rigs, or fish it alone with the attached treble hook.

When used in salt water, the ESCA light unit has a service life of at least 150 hours. After fishing in salt water, it is advisable to rinse the light units with fresh water.

ESCA SQUID

The ESCA Squid is a super soft squid lure that can have an ESCA light attractor inserted inside the body to make the lures glow in the water. It allows a variety of different rigging configurations.

Tip: Try using the squid on a harger combined with a jig/ spinner and an ESCA attractor at the bottom.

ESCA SHRIMP

As an additional accessory to the ESCA attractor, ESCA Global has also developed a shrimp made from robust rubber into which the ESCA light attractor unit can be inserted. This makes it easy to swap between the various Esca light wavelength and frequency variants.

Tip: Try using the shrimp on a harger combined with a jig/ spinner and an ESCA attractor at the bottom.

Leadership **WFT** for Success

THE BAIT BINDER

Have you ever gone fishing only to find your bait elastic is a no-go? After all the time and effort you put into preparing, the trip is now ruined because your bait elastic is almost decomposed, rancid and binding on your crab is a no go, and as a result the elastic keeps snapping... Well, no more!

The INOVA BAIT BINDER is a bait elastic dispenser that delivers quality elastic so you can find and grip it successfully each and every time. Unlike their competitors, INOVA BAIT BINDER comes with a lanyard. Therefore, it can be hung anywhere. It also has a range of different gauges of elastic for different sizes of bait and most importantly it always has the elastic in a position ready to use.

The Binder gives anglers a superior bait elastic dispenser, and it does exactly what it boasts! To provide you with the best equipment possible for all types of fishing, the INOVA BAIT BINDER includes 3 grades of elastic (100 m each) for different bait presentation, and a more professional controlled approach to aid you in The Ultimate Catch! Orange spool for delicate baits, green spool for general bait set up, blue spool for boat fishing.

1D-F 622-003	100 m 0,04 Spool blue (heavy)	

FLEXI BEADS

Flexi Beads are made from a 100% UV day glow compound which are tough but with a softer centre. They give extra attraction to your rig and are quick to apply by simply sliding over your hook and onto the snood line. They grip onto the snood line allowing them to work as both an attractor and bait stop. Being soft they do not damage even the lightest of snood lengths. They are slow sinking allowing them to add attraction whilst still allowing the bait to waft naturally in the current. They have multiple uses in one bead, re-useable bait stops, fish attractor and pennel hook holder for boat and shore and being tough means that you can reuse them time and time again.

Contents per package: 25 pcs 5 mm

Aluminium/Stainless Steel Gaff 1,20 m

An incredibly lightweight gaff with a stainless steel hook and an aluminium shaft. The EVA foam handle with a roughened surface ensures a solid slip-free grip even with wet and cold hands.

Item-No.: 1D-F 950-120

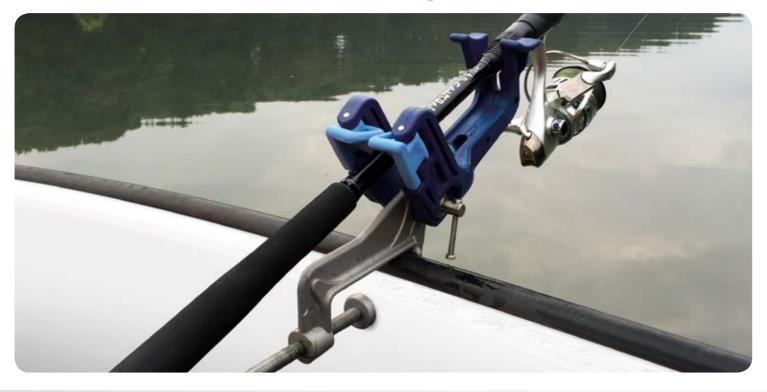

Incredibly solid boat rod-holder with a "snap-lock" system.

Thanks to a special mechanism, fishing rods (even with long butt sections) can easily be clipped and un-clipped from this rod holder. It works even with the rod under full strain from a big fish. The rod is held totally secure and cannot be levered out when it is clipped into the rod holder. High performance plastic with a metal rail-clamp and stainless steel screws guarantee a long-lasting and reliable performance.

Rail-clamp spreads up to 8 cm.

Item-No.: 1D-F 940-001

WFT GROUNDBAIT

NET LAKE 'N, RIVER GROUNDBAIT

LAKE ,N' RIVER Groundbait is completely ready made ground bait, created from specialists, especially for your success. Best raw material and sophisticated compositions from quality flours and flavours, makes this series unique in its effect. Tip: You'll get best results, if you moisten and strain the day before fishing. If you like ground bait which is more active, you have to keep some dry ground bait (ca. 5%) and add it close before fishing to the mixture. This is not only for feeder fishing a good strategy.
